## Vizoo Material Digitization Solutions

Company Presentation  
Vizoo GmbH, 2023

# About Vizoo

## Based in Germany

Founded in 2013, Vizoo has grown from a startup to the leading global provider of material digitization solutions.

### Management

- Martin Semsch – CEO & Founder
- Renate Eder – Chief Commercial Officer

# About Vizoo

## Mission

## Democratize Material Digitization

- Previous digitization processes involved complicated manual capture and processing.
- Digitization should be **fast, easy, and consistent.**

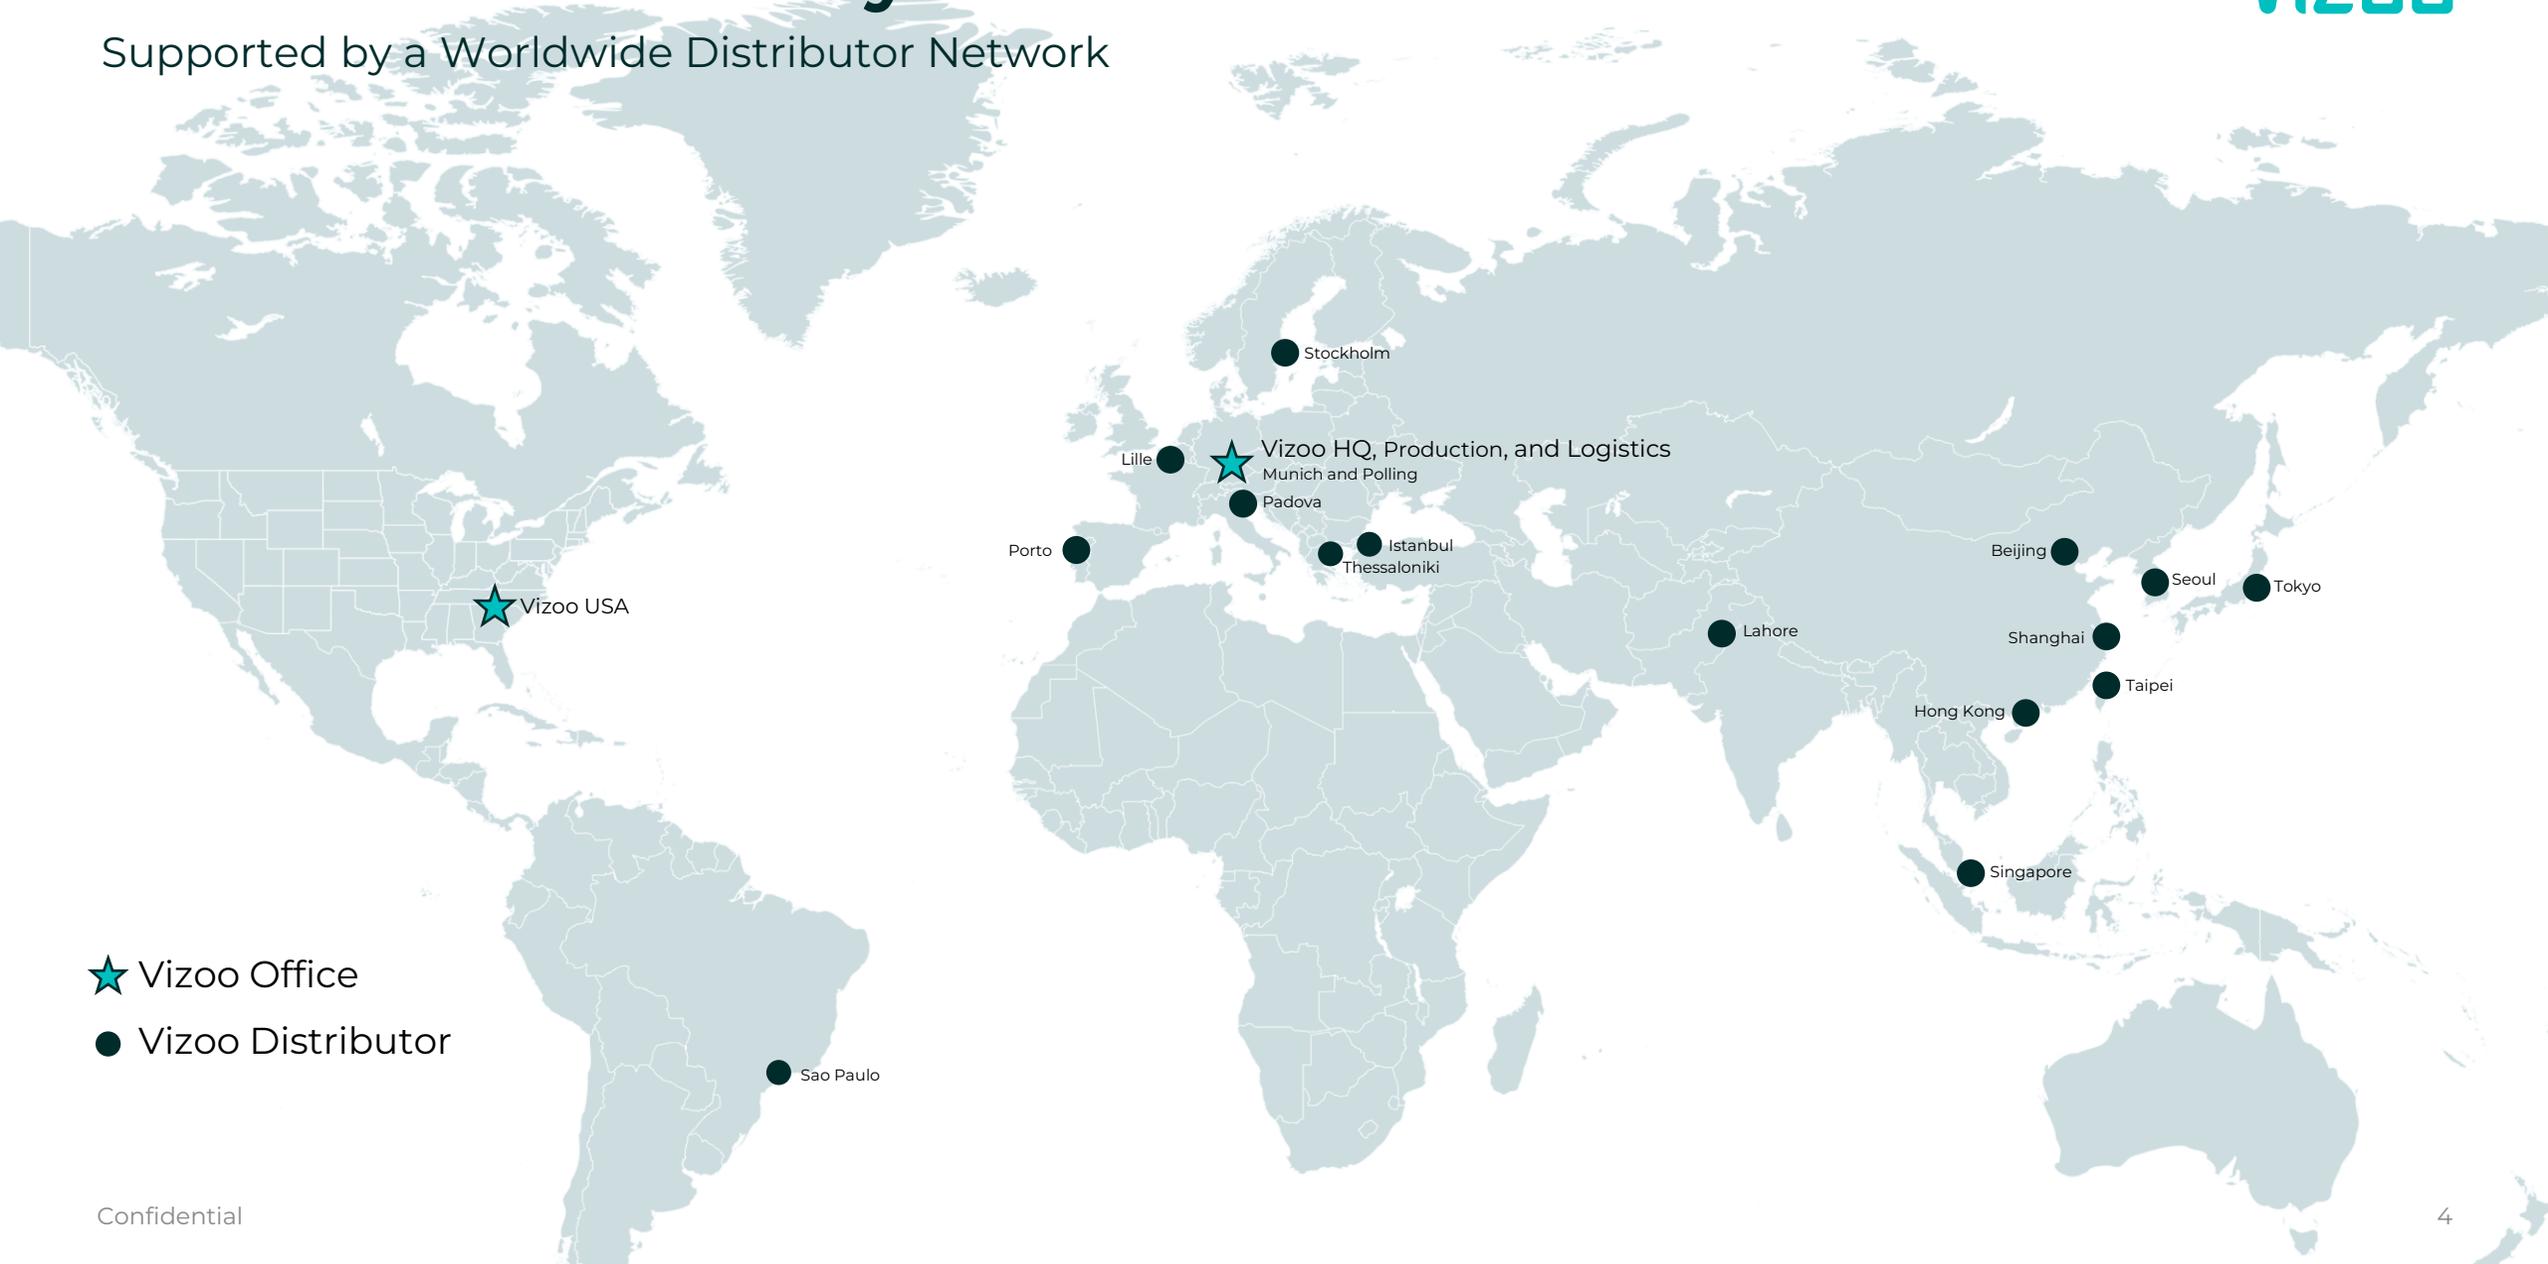

Vizoo's xTex technology provides:

- Rapid capture and processing
- Simple to use but advanced functionality
- User-independent, consistent output

# Offices in Germany and USA

Supported by a Worldwide Distributor Network

★ Vizio Office

● Vizio Distributor

# Our Client Base

400+ Clients in 45+ Countries

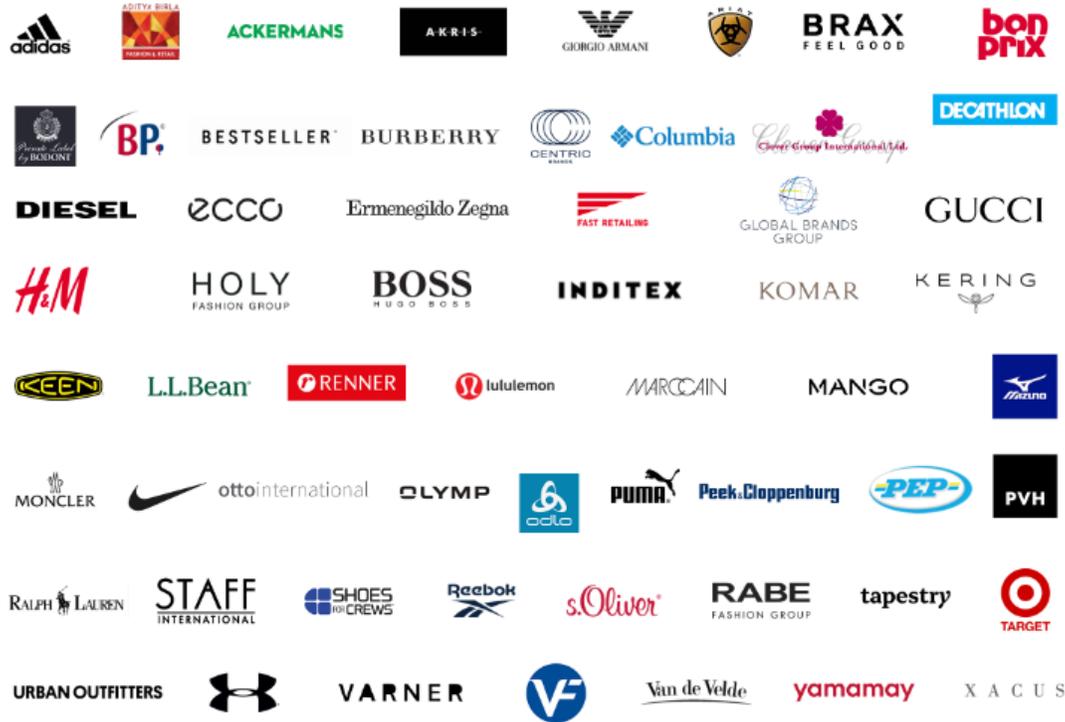

## Many Industries Rely on Vizoo Technology

- Automotive
- Fashion
- Apparel and Footwear Manufacturers
- Fabric Mills
- Interior / Home Fashion
- Gaming and Entertainment
- Creative Agencies
- Universities

# Our Client Base

Apparel & Footwear Industry

## Brands

Fashion, Footwear, Lingerie, and Sportswear

## Supply Chain

OEM, Fabric Mills, and Fabric Trading Companies

# What is a **Digital Material**?

Before using a digital material, it is important to define the term.

# What is a Digital Material?

Digital Material Have Two Main Characteristics

## 1. Visual Properties

- How a material looks.
- Color, reflectivity, surface structure, and transparency
- A 3D program requires an image-based description of the individual surface properties to visualize a complex material structure.

## 2. Physical Properties

- How a material behaves.
- Bend, stretch, weight, and thickness.
- 3D fashion design programs such as BrowZwear, CLO3D, and Optitex require fabric physical properties for simulating garment drape simulation.

Scanning Hardware

VIZOO

## xTex A4

- Desktop scanner
- Scanning area up to 20 x 28 cm / 7.9 x 11 in.
- High resolution output up to 950 dpi
- Simple installation
- Full PBR support (physically based textures)
- Works in any office environment

# Vizoo Products

## Scanning Hardware

### xTex A2

- Large format scanner
- Scanning area up to 60 x 40 cm / 23.6 x 15.7 in.
- High resolution output up to 700 dpi
- Full PBR support (physically based textures)
- Works in any office environment

Software

VIZOO

## xTex Software

- **Capture** - Controls xTex A4 and A2 hardware
- **Tile** - Powerful algorithms for seamless materials
- **Recolor** - Create color variants with a single scan
- **Render** – Produce photorealistic images of materials
- **Physical Properties** – Add fabric drape properties
- **API** – Connect to 3<sup>rd</sup> party software

# Vizoo Products

Compatible with Industry-Leading Tools

## xTex Materials Work Everywhere

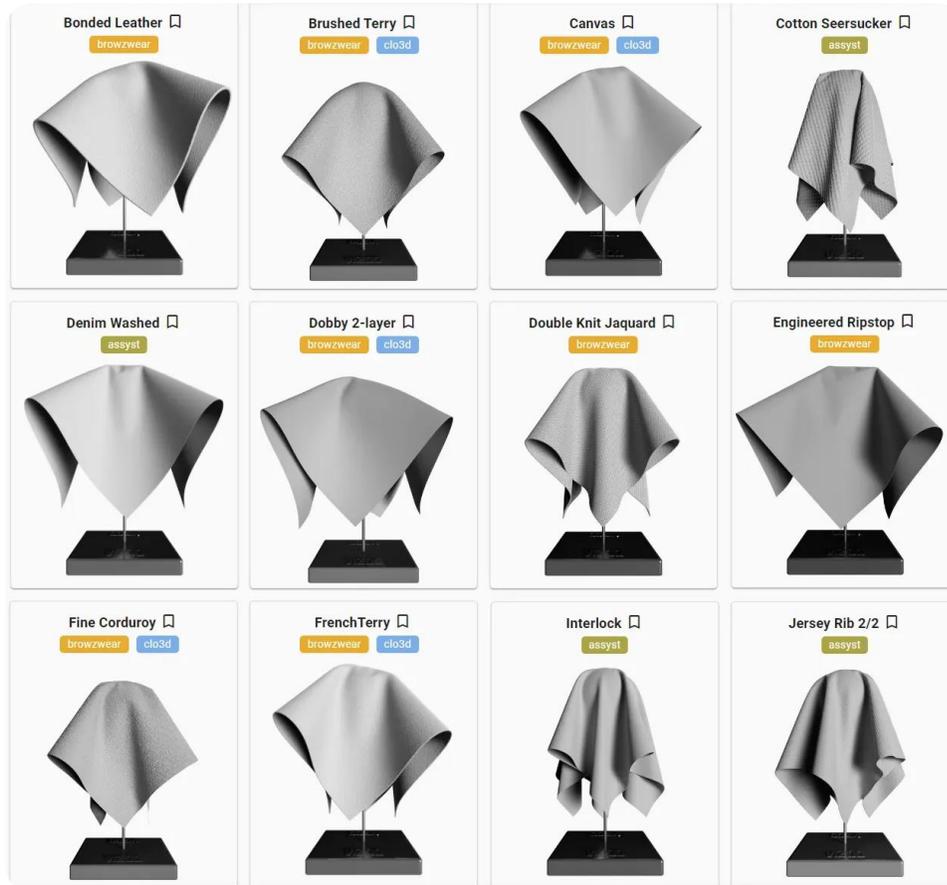

- xTex supports Phong (Specular) and Metalness (PBR) workflows with its .xTex and .U3M project files.
- Export: Substance SBS, SBSAR, and Nvidia's MDL.
- Image formats: 8 or 16 bit images, .jpg, .png, and .tif.
- Some of our clients' most common tools are shown on the right.

...and many more.

# Vizoo Products

physX Fabric Platform

## Accelerate Physical Property Acquisition

- Traditional fabric measurement is a time-consuming task.
- physX platform makes high-end fabric for 3D apparel simulation more accessible by giving instant access to high-quality physical properties.
- Physical properties are available for Browzwear, Assyst vdyia, and CLO3D

# Vizoo Services

## Implementation Support

### Training

- Online and onsite
- Become an expert in material creation

### Certification

- Take it further by having Vizoo audit and accredit your staff or scanning facility with our material digitization certification program.

### Process Consulting

- Leverage our vast experience in material digitization processes

### Supplier Onboarding

- Bring your vendors up to speed on material digitization
- We help formulate the right quality standards and experience a smooth implementation

# Vizoo Services

## Material Digitization Service

### Utilize our expertise

Are you new to 3D, need more digitization resources, or want your materials captured quickly? Leverage Vizoo's decade of digitization experience as your own.

### On-Demand Digitization

- Let us be your scanning hub.

### 3D Content

- Showcase your materials with high quality content.
- We offer product previews, look books, material preview renders, and more.

# VIZOO Services

Create a best-in-class workflow with material creation assessment processes and tools

## Reference geometries

- Link the physical and the virtual world
- Support your QC process

## Process Consulting

- Leverage our vast experience in material digitization processes
- Achieving the perfect digital twin needs the right tools as well as a quality process.

# Why **Vizoo** Technology?

## High Quality

Complete, high-quality digital materials bring photo-realism to any 3D workflow.

## Lightning Fast

Vizoo's xTex™ and physX™ provide the fastest and easiest material digitization solutions available to enable scaling and mass production.

## Universally Compatible

Capture once and use everywhere. Our universal output works with any 3D software, process, or workflow.

## Trusted

As a proven and long-standing digitization solution, clients trust Vizoo systems in mission critical initiatives.

## Made in Germany

Vizoo hardware and software solutions are engineered and developed in-house to meet industry specific needs.

## High Value

High quality output, ease of use, and speed add up to a fast return on investment.
