**FIS Energy supports you in creating transparency of all energy flows.**

Applicable everywhere, the right solution everywhere: From kindergarten to university, from small office buildings to distributed properties, for process automation and manufacturing automation.
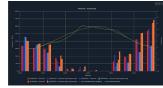

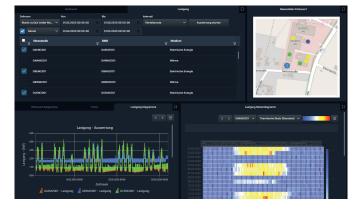

**FIS Energy is the right choice.**

» Flexible, open and modular – **FIS Energy grows with your requirements and can be optimally integrated into your infrastructure**

» As a **stand-alone module** or **integrated** in the control system

» **Manufacturer-independent, high-performance and investment-proof**

» Load curve analyses, continuous lines, weather-adjusted consumption, grid diagrams, volume flow diagrams

» Connection with your process data, own KPIs, automatic plausibility check, substitute value creation

» Limit value monitoring, cost center assignment

» **Automatic (customer-specific) reports** via e-mail

» **BAFA eligible,** energy audit according to DIN EN 16247-1

» **Interfaces** for data exchange with other systems (3rdParty, ERP systems, CAFM systems)

» All functions and communication protocols integrated, **transparent licensing model, no hidden costs, no follow-up costs**

» **Your tool to a $CO^2$ neutral footprint**
