

LMT Leuchten + Metall Technik GmbH

for more than 35 years our name has stood for high-quality platform and object lighting, as well as sophisticated metal constructions for a variety of projects around the world. As an owner-managed family business with around 50 employees, we work in close co-operation with our national and international customers and partners and develop sophisticated lighting solutions for architecture and technology, as well as high-quality housings and metal structures for medical technology, industry and construction. We are certified according to ISO 9001:2015, DIN 1090, DIN EN 15085-2 CL1/P, as well as ISO 14001:2015.

To extend our team at Hilpoltstein/Bavaria, we are looking for a

## Engineer (m/f/d)

for the task of project and product engineering

at the earliest possible date, full-time and permanent position

### Your tasks

As a team member, you will work together with designers, engineers, media technicians and lighting designers to develop and optimize our product portfolio. You work independently on demanding projects across all project phases - from the first draft to static calculations to compliance with deadlines. In this process, you actively implement your ideas and drive them forward constructively.

### Your profile

You have a degree in engineering (Bachelor/Master) e.g. in the field of mechanical engineering or similar disciplines. As possible, you have several years of experience in the design of luminaires, product or prototype development and project work. Dealing with a 3D CAD system, ideally PTC

Creo and Windchill, is a matter of course for you. Thanks to your hands-on mentality, you were also able to gain knowledge in sheet metal processing.

You have an independent way of working, a pronounced ability to work in a team and flexibility. You convince with your high social-communicative competence as well as your pronounced sense of responsibility towards colleagues and upcoming work tasks. You speak German business fluently but can also communicate in English at any time and optionally master a second foreign language (ideally Spanish).

You will find yourself in our understanding of values of an open-minded, partnership-based and team-oriented cooperation with the awareness of innovative and sustainable product solutions. Personally, you have a keen interest in helping to shape future technologies and convince with a pragmatic search for solutions. You have the incentive to constantly develop themselves and to further automate the internal design process.

### Our offer

You will receive a permanent employment contract with attractive social benefits in the responsible working environment of a healthy medium-sized family business with the latest software and hardware as well as modern machinery. Our flat hierarchy offers you short decision-making paths for optimal ability to act, as well as a high degree of self-determination and personal responsibility in the implementation of projects.

### Location

LMT Leuchten + Metall Technik GmbH, Dieselstraße 5, 91161 Hilpoltstein

### Contact

If you have any initial questions, please do not hesitate to contact Ms. Janett Hemmeter on +49 9174 4797 0.

Please send your advertising including cover letter, CV and photo, as well as the indication of your salary expectations by e-mail to:
