

From clever solutions to a Smart Home.

From clever solutions to a smart home

Trust Switch-in makes a smart home accessible. With a wide range of affordable and wireless products, it is possible to easily control or even automate your home – from lighting to curtains to security – remotely, or even with one app.

Our product range is divided into a Start-line and a Premium-line. The Start-line consists of transmitters, receivers and sets. These products work directly with each other and, if paired with a Smart Bridge, can also be controlled via our app.

In addition, we offer a Premium-line of smart products that use Zigbee. This allows their status (on/off/dimming rate/battery) to be viewed in our app and makes it possible to set push notifications. To use Premium devices a Smart Bridge is required.

From clever solutions to a smart home
From a remote-controlled lamp to your complete home in one app.
How smart you make it is up to you.

SMART CONTROL

A clever solution in 2 steps

Step 1: Choose your receiver

What would you like to control the smart way? Do you want to make your favourite lamp smart or automate the electric window coverings? There are build-in and plug-in receivers available for every lamp and appliance to make them smart.

Step 2: Choose your transmitter

Choose the transmitter that suits your situation. You can choose from numerous remote controls, wireless wall switches and sensors. Pair the transmitter(s) with your receiver(s) and your lamp or appliance is ready to be controlled remotely.

Step 3 (optional): Pair with the app

Use the Smart Bridge and add your receivers and transmitters to the app. This way, you use your smartphone as a remote control and have the ability to automate your devices through smart rules, scenes and timers.

SMART ENERGY SAVING

Minimise standby consumption

With today's hefty energy prices, even the smallest savings can make a big difference to your wallet. With the help of Trust Switch-in, you can easily save some extra energy, for example by reducing standby consumption in your home.

In cooperation with Enpuls, research has been done into the standby consumption of the average household and how much you can save on this. Enpuls concludes that an average household can save up to €100,- a year by reducing standby consumption.

SAVE UP TO €100,- PER YEAR
ON YOUR ENERGY BILL

With a socket set alone, you can completely switch off three devices. In that case, use the ALL OFF button on the supplied remote control before going to bed and the standby consumption of the connected devices is gone. In the morning, use the same remote control to turn everything back on.

More smart saving features from Trust Switch-in:

- Never forget to turn off the lights again thanks to adjustable switch-off time on wireless wall switches and sensors
- Use timers and rules in the app to turn devices off completely at night
- Turn off large consumers automatically: Pair an air conditioner with a window sensor and it will automatically switch off when the window is opened

SMART SECURITY

Instant alert in case of emergency

Trust Smart Home

now

Smoke detected!

Smoke in the corridor, lights come on.

With our smart detectors and sensors, you secure your home in a smart way. All Premium security devices send a push notification to your smartphone the moment smoke, carbon monoxide, leakage or movement is detected. That way, you are always and everywhere immediately informed in case of an emergency.

You can even go one step further and combine your security with other Trust Switch-in devices. For example, you can switch on all lights in case of smoke (by combining the smoke detector with a build-in switch) or switch off the boiler automatically in case of a carbon monoxide leak.

OUR BENEFITS

01. **Make every lamp smart**
Whatever light you have in your home, with Trust Switch-in you can easily control them remotely. So instead of having to buy smart bulbs, you can just keep using your existing bulbs. And the great thing is, the wall switches already connected remain functional.

02. **Wireless convenience**
Find out after a renovation that you forgot a connection point? No problem: thanks to a wide range of wireless products, pulling wires and complicated wiring schemes are a thing of the past. Simply stick your wireless wall switch, motion or window sensor anywhere in your home.

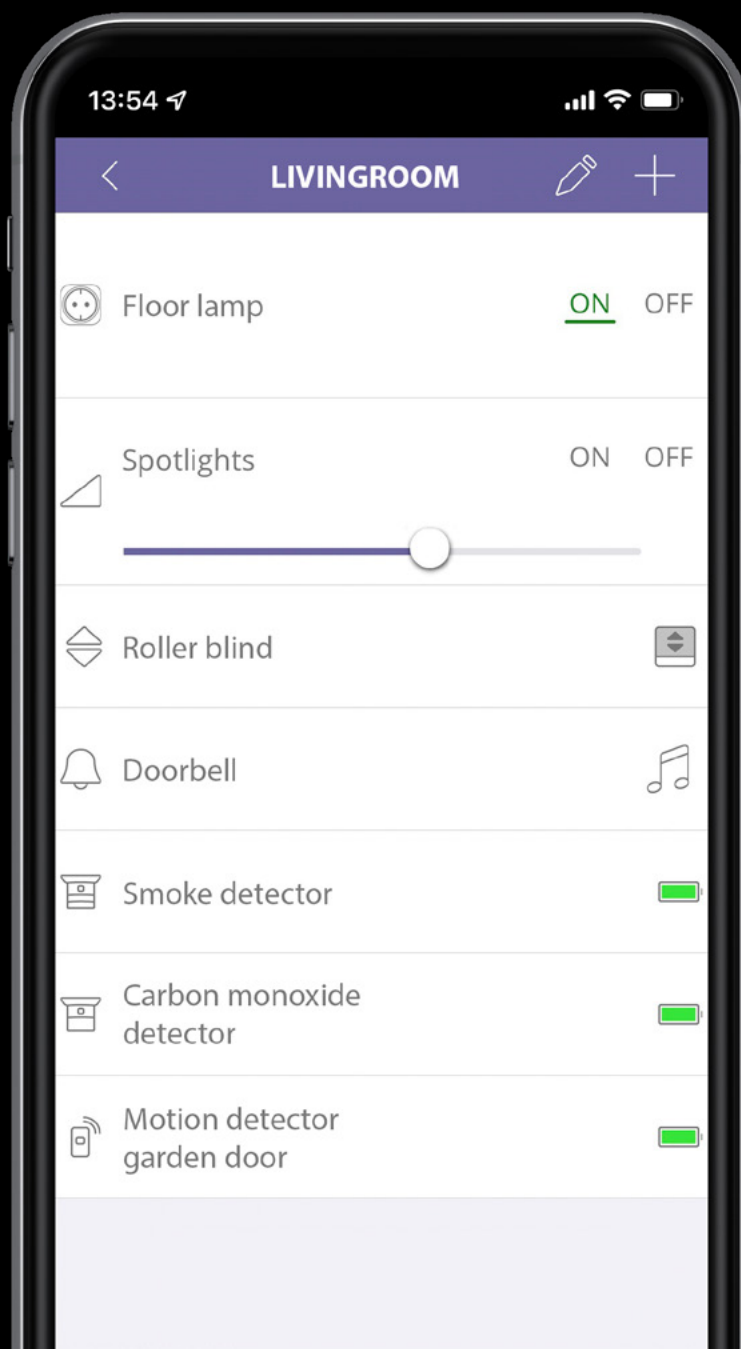

03. **Super-fast installation**
Installing Trust Switch-in really is something anyone can do. Just place or mount your receiver, put it into pairing mode and at the touch of a button your transmitter is paired.

04. **A smart home at your fingertips**
From clever solutions to a smart home. Our Smart Bridge - the heart of your smart home - allows you to add all your Trust Switch-in devices to the free app. That way, you manage and automate all your connected lights, devices and window coverings with your smartphone, wherever you are.

05. **Price-quality**
Trust Switch-in wants to make a smart home accessible to everyone. This is why we offer a very affordable and complete smart home solution, without compromising on performance.

06. **Simple expansion**
All Start-line transmitters and receivers can be combined, allowing you to control your lights and devices as you wish. You can also link several transmitters to a receiver if, for example, you want to switch or dim from several places in the house.

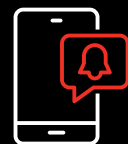

If you use the app, you can also combine Premium devices with transmitters and receivers from the Start-line.

Smart Bridge

The foundation of your smart home

Link all your Trust Switch-in products to the Smart Bridge and control everything - from lights to electric curtains - with your smartphone or tablet. Or set timers, rules and scenes as you wish to fully automate your system.

Receive push notifications on your smartphone

Use your voice as a remote control with Google Assistant or Amazon Alexa

Automate with smart timers and rules

Works with all Start-line and Premium products from Trust Switch-in

THIS IS HOW WE ENSURE VISIBILITY

We believe it is important to invest in our brand and visibility.

Some examples*:

- Social media advertising: average reach of 1,000,000 per month
- TV programmes
- Monthly newsletters (with promotions, tips, news) 50,000 subscribers
- Discovery section in the app (with promotions, tips, news)

*Reach figures mentioned concern the Netherlands. Plans to gain awareness in other countries are in place and ready to kick off.

SUSTAINABLE FUTURE

Transition to more sustainable products

100% recycled high-grade plastic

The Smart Bridge is made of 100% recycled high-grade plastic.

17,000 kg of plastic per year

In recent years, we have greatly reduced the use of plastic in our packaging. Saying goodbye to plastic blister - packaging has saved a huge amount of plastic. On average, this is around 17,000 kg per year.

50% sustainable high-grade plastic

A number of products in our range already consist of 50% recycled plastic. In the near future, we aim to produce more and more products more sustainably.

FSC-certified

To print our packaging, manuals and other printed matter, we use FSC-certified parties wherever possible. You will therefore find the FSC logo on almost all our packaging.

TRANSMITTERS

Control it your way, wirelessly

With Trust Switch-in transmitters, you have a suitable solution for every application. Control lighting, electric curtains, blinds or other devices remotely with a remote control or wireless wall switch.

Or choose automation by using wireless motion sensors and contact sensors, so that lights and devices automatically switch on when you pass by or a door or window is opened.

YOU CAN FIND THE ENTIRE RANGE AT TRUST.COM

Remote control with 16 channels | AYCT-102 71001

Control all your Trust Switch-in Start-line receivers remotely.

- Linking of up to 16 lamps/devices
- Transmission range of up to 30 meters
- Group function for simultaneous switching

Wireless dimmer | AWRT-1000 71236

Dim your Trust Switch-in build-in and plug-in dimmers wirelessly from anywhere in the house.

- Wireless: can be attached anywhere
- Simple dimming with a transmitter of your choice
- Transmission range of up to 30 meters

Wireless motion sensor | AWST-6000 71013

Switch on lights or devices automatically when motion is detected.

- Wireless: can be attached anywhere
- Range of up to six metres

Wireless outdoor wall switch | AGST-8800 71151

Control your outdoor lighting and devices wirelessly.

- Wireless: can be attached anywhere
- Transmission range of up to 30 meters
- Splash-proof: suitable for outdoor use (IP44)

Wireless wall switch | AWST-8800 71075

Control your lighting and devices wirelessly.

- Wireless: can be attached anywhere
- Transmission range of up to 30 meters

Wireless dusk/dawn sensor | ABST-604 71034

Switch on your lamps and devices at Sunset or sunrise.

- Wireless: can be attached anywhere
- Transmission range of up to 30 meters
- Splash-proof (IP56): suitable for outdoor use

Remote control with timer | ATMT-502 71090

Control and/or automate all your Trust Switch-in Start-line receivers.

- Set up to 12 timers
- Linking of up to 16 lamps/devices
- Transmission range of up to 30 meters

Wireless wall switch single/double - white | AWST-9000 71235

Switch and dim multiple Trust Switch-in Start-line receivers wirelessly.

- Wireless: can be attached anywhere
- Transmission range of up to 30 meters

Wireless outdoor motion sensor | APIR-2150 71091

Switch your outdoor lighting and devices to motion.

- Transmission range of up to 30 meters
- Splash-proof (IP64)
- Detection range up to 6 meters

RECEIVERS

Make everything smart!

Trust Switch-in receivers allow you to remotely control all lighting and devices in and around the house. Use build-in switches and dimmers to control existing lights and devices with a Trust Switch-in transmitter. These modules can be installed invisibly in a junction box or behind a lamp's ceiling cap.

Want to be able to smartly control a lamp or device that has a plug - such as a desk lamp or fan? Then choose a plug switch or dimmer. Plug the socket switch into the socket, insert the plug of your lamp or appliance and pick a transmitter.

YOU CAN FIND THE ENTIRE RANGE AT TRUST.COM

Build-in switch - 2000 W | ACM-2000 71269

Switch a lamp or a device remotely. Note: Does not work with existing wall switches.

- Suitable for lamps and devices up to 2000 W
- Compact design
- Linking of up to 32 transmitters

Build-in dimmer for LED | ACM-250-LD 71213

Switch and dim your existing lighting remotely while keeping the connected wall switches functional.

- Suitable for LEDs up to 50 W
- Also suitable for halogen and incandescent lamps
- Works in combination with existing wall switches

Build-in switch | ACM-2300-HC 71229

Switch your existing lighting remotely, leaving the connected wall switch(es) functional.

- Suitable for lamps and devices up to 2300 W
- Works in combination with existing wall switches
- Easy to install

Build-in switch 3-in-1 | ACM-3500-3 71053

Switch three different groups or devices remotely.

- Suitable for lamps and devices up to 3500 W
- Suitable for three units or lamps

Universal Build-in switch | AMU-500 71109

Switching low-voltage motors, automatic door openers and remote-controlled doorbells.

- Max. 500 W

Outdoor socket switch | AGC-3500 71263

Switch outdoor wired lights and devices that have a plug on them remotely.

- Spray-water-protected (IP44)
- Socket protector: safe for children
- Suitable for lamps and devices up to 3500 W

Build-in switch for blinds | ASUN-650 71017

Control electric window coverings such as shutters, blinds, awnings and electric curtains remotely.

- Suitable for remote control of blinds
- Suitable for remote control of electric curtains
- Suitable for remote control of roller shutters

Socket dimmer | ACC-250-LD 71167

Remotely control wired lamps and devices.

- Simple dimming with a transmitter of your choice
- Socket protector: safe for children
- Suitable for LED lamps up to 50 W

Socket switch | ACC-2300 71181

Remotely control wired lamps and devices.

- Suitable for lamps and devices up to 2300 W
- Compact design
- Socket protector: safe for children

PREMIUM

Always up to date, everywhere

With smart detectors and sensors from Trust Switch-in, you secure your home the smart way. All Premium security devices send a push message to your smartphone via the Smart Bridge the moment smoke, carbon monoxide, leakage or motion is detected.

For lighting and devices, a smart build-in switch and build-in dimmer are available. These are controlled with your smartphone and always show the latest status (on/off/dimming percentage) in the app thanks to Zigbee 2-way communication. The smart build-in modules can also be paired with the Philips Hue Bridge.

YOU CAN FIND THE ENTIRE RANGE AT TRUST.COM

Wireless leak detector | ZWLD-100 71216

Immediately informed when a leak is detected thanks to a push notification on your smartphone.

- Receive a push notification in case of leakage
- Wireless: can be attached anywhere
- Compact design

Socket switch | ZCC-3500 71255

Switch lights and devices with your smartphone and see the current status in the app.

- Control the plug with your smartphone
- Display of the current status in the app
- Suitable for lamps and devices up to 3500 W

Wireless carbon monoxide detector | ZCO-900 71260

Immediate notification of carbon monoxide detection thanks to a loud alarm and push notification on your smartphone.

- Wireless: can be attached anywhere
- Receive push notifications when carbon monoxide is detected
- Gives a loud alarm (85dB) in the event of a carbon monoxide leak

Contact sensor | ZCTS-808 71169

Switch lights or devices when you open a door or window and receive a push notification on your smartphone.

- Wireless: can be attached anywhere
- Push notification when opening a window or door
- Automatically switches on the light when you enter a room

Wireless motion detector | ZPIR-8000 71170

Switch lights or devices when motion is detected and receive a push notification on your smartphone.

- Wireless: can be attached anywhere
- Receive push notification, when motion is detected
- Angle of detection 120°

Wireless smoke detector | ZSDR-850 71197

Thanks to a loud alarm and a push notification on your smartphone, you will be informed immediately in case of smoke development.

- Wireless: can be attached anywhere
- Receive push notification when smoke is detected
- Gives a loud alarm in an emergency (85dB)

Build-in dimmer | ZCM-300 71317

Control the lights with your smartphone and see the current status in the app thanks to Zigbee 2-way. Also works with the Hue Bridge.

- Control the module with your smartphone
- Display of the current status in the app
- Works in combination with existing wall switches

Works with Philips Hue

Build-in switch | ZCM-1800 71318

Switch lights and devices with your smartphone and see the current status in the app thanks to Zigbee 2-way. Also works with the Hue Bridge.

- Control the module with your smartphone
- Display of the current status in the app
- Works in combination with existing wall switches

Works with Philips Hue

SETS

Turnkey solutions

Trust Switch-in sets consist of a transmitter and one or more receivers. One of the most common combinations is the socket switch set, consisting of three socket switches and a 3-channel remote control that allows you to switch three wired lights or devices.

Several doorbell sets are also available, where you can choose between a socketed doorbell/gong or a battery-operated wireless doorbell. These sets include a wireless push button and a portable or plug-in chime.

YOU CAN FIND THE ENTIRE RANGE AT TRUST.COM

Socket switch set | APC3-2300R 71182

Remotely control wired lamps and devices.

Suitable for lamps and devices up to 2300 W

Control of three lamps/ Devices from a distance

Transmission range of up to 30 meters

Socket dimmer set | ACC2-250R 71199

Remote control and dimming of wired lamps.

Compact design

Socket protector: safe for children

Suitable for LED lamps up to 50 W

Outdoor socket switch set | AGC2-3500R 71258

Remotely control wired outdoor lamps and devices.

Spray-water-protected (IP44)

Transmission range up to 71 meters

Suitable for lamps and devices up to 3500 W

Plug-in doorbell set | ACDB-8000AC 71273

Plug the ready-to-use doorbell into any indoor socket. Place the wireless push button on or near the door and create your own doorbell system.

Transmission range of up to 150 meters

Four adjustable volumes

Six different melodies to choose from

Plug-in doorbell set - for existing bell buttons | ACDB-8000BC 71274

Combine your existing bell push with a wireless doorbell from Trust Switch-in.

Transmission range of up to 30 meters

Four adjustable volumes

Six different melodies to choose from

Portable doorbell set | ACDB-9000AC 71275

Place the portable doorbell anywhere in the house. Place the wireless push button on or near the door and create your own doorbell system.

Transmission range of up to 150 meters

Four adjustable volumes

Six different melodies to choose from

BECOME A TRUST SWITCH-IN RESELLER

Convinced by the endless possibilities of Trust Switch-in? We will be happy to think along with you to look for a mutually beneficial cooperation.

What you can expect from us

- An assortment of 48 sku's. In consultation with you, a suitable assortment can be put together
- Complete shelving proposals customized to your needs
- We can also offer you a mobile launch display, with the advantage of not having to give up valuable shelf space
- Mobile seasonal displays

Also for online sales, Switch-in provides optimal support, including complete and high-quality product content and a digital product selector.

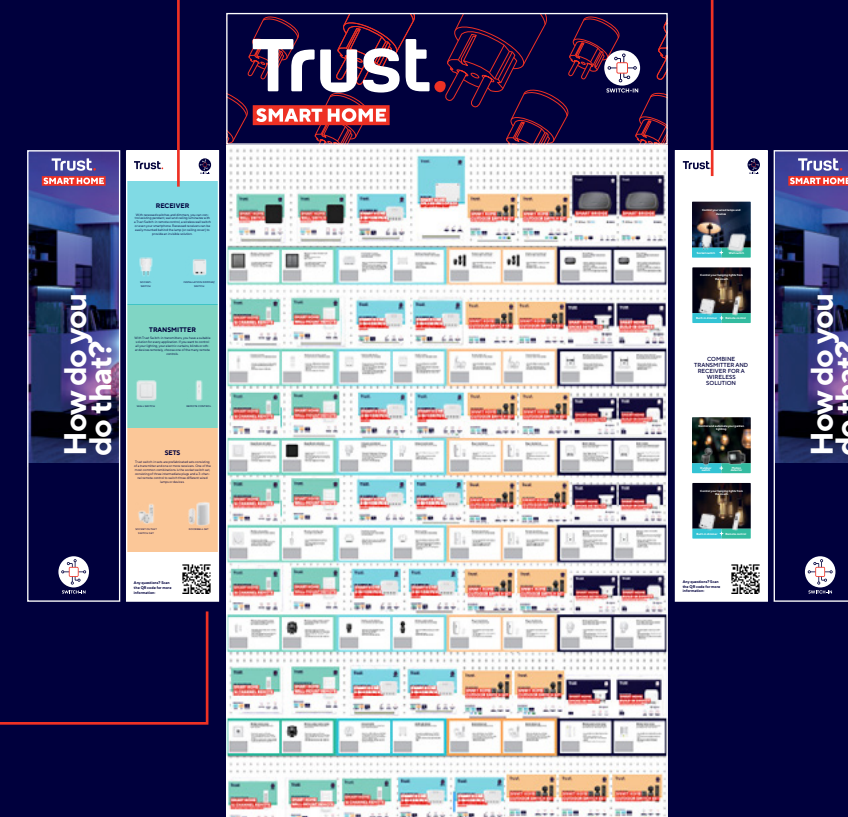

Interested? Contact us via reseller@trust.com. We are happy to think along with you to achieve the best possible result.
