

New TUNNABLE WHITE lighting system for more sustainable cities.

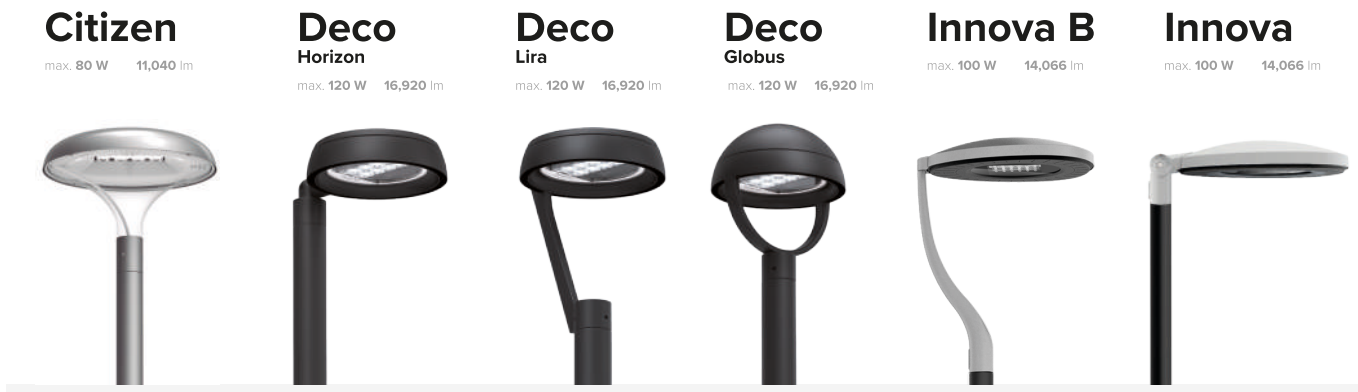

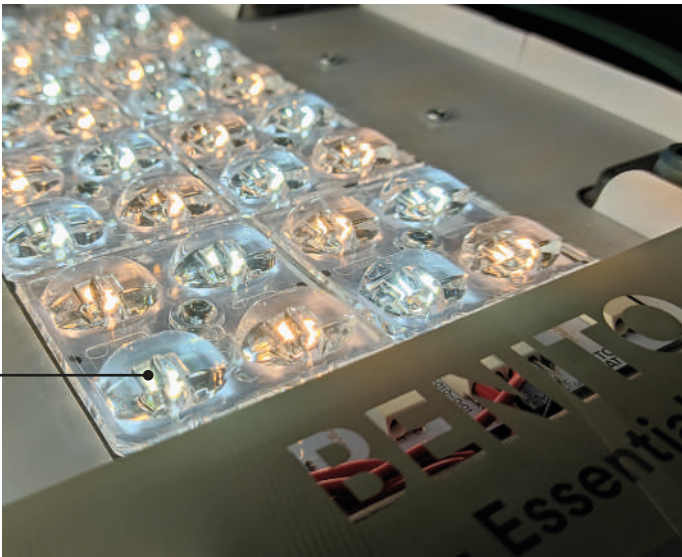

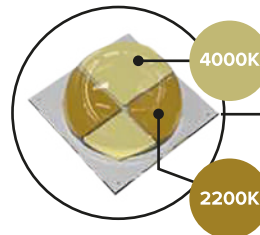

TUNNABLE WHITE

The technology that better imitates natural light, adapting colour temperatures to each hour of the night to provide greater atmospheric comfort.

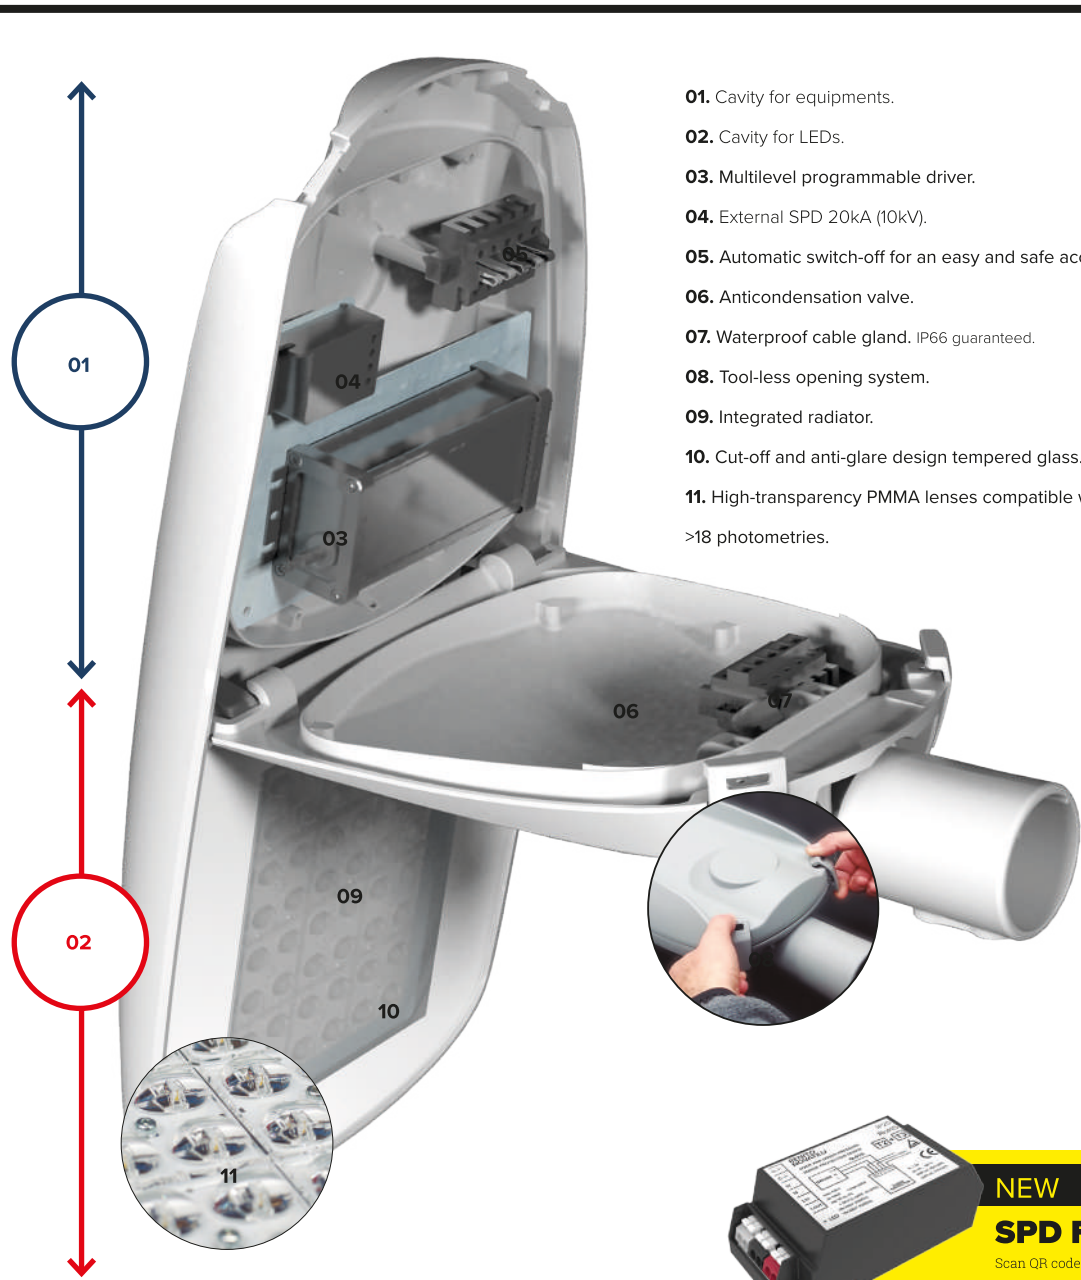

Dual colour temperature technology

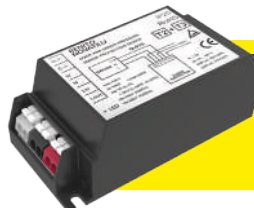

Creates the perfect balance in lighting at night. Gives a sense of security and well-being for people while conserving energy and protecting ecosystems, automatically adjusts the level of light emitted from a light fitting, mixing dimmable light from warm and cool LEDs. Cooler LEDs dim when night falls and increase when traffic levels rise in the morning, leaving warmer LEDs on throughout the night.

New FUSION luminaires, the preferred ones by installers.

- 01. Cavity for equipments.
 - 02. Cavity for LEDs.
 - 03. Multilevel programmable driver.
 - 04. External SPD 20kA (10kV).
 - 05. Automatic switch-off for an easy and safe access.
 - 06. Anticondensation valve.
 - 07. Waterproof cable gland. IP66 guaranteed.
 - 08. Tool-less opening system.
 - 09. Integrated radiator.
 - 10. Cut-off and anti-glare design tempered glass. IK10 guaranteed.
 - 11. High-transparency PMMA lenses compatible with ZHAGA standard.
- >18 photometries.

Milan Zhaga Certificate

new luminaire

FUSION

- The only one that can be opened, closed and **DISASSEMBLED** without tools.
- **+33% of dissipation** compared to competing products of the same size.

New poles made of concrete.

THE NEW PETRUS LIGHT POINT

- 4 metres high.
- Does not rust.
- Pole TOP Ø60.
- Compatible with all luminaires.
- With inspection door, according to standards.
- Anchoring with bolts and standard base plate.
- Optional: anti-graffiti treatment.
- Citizen luminaire.

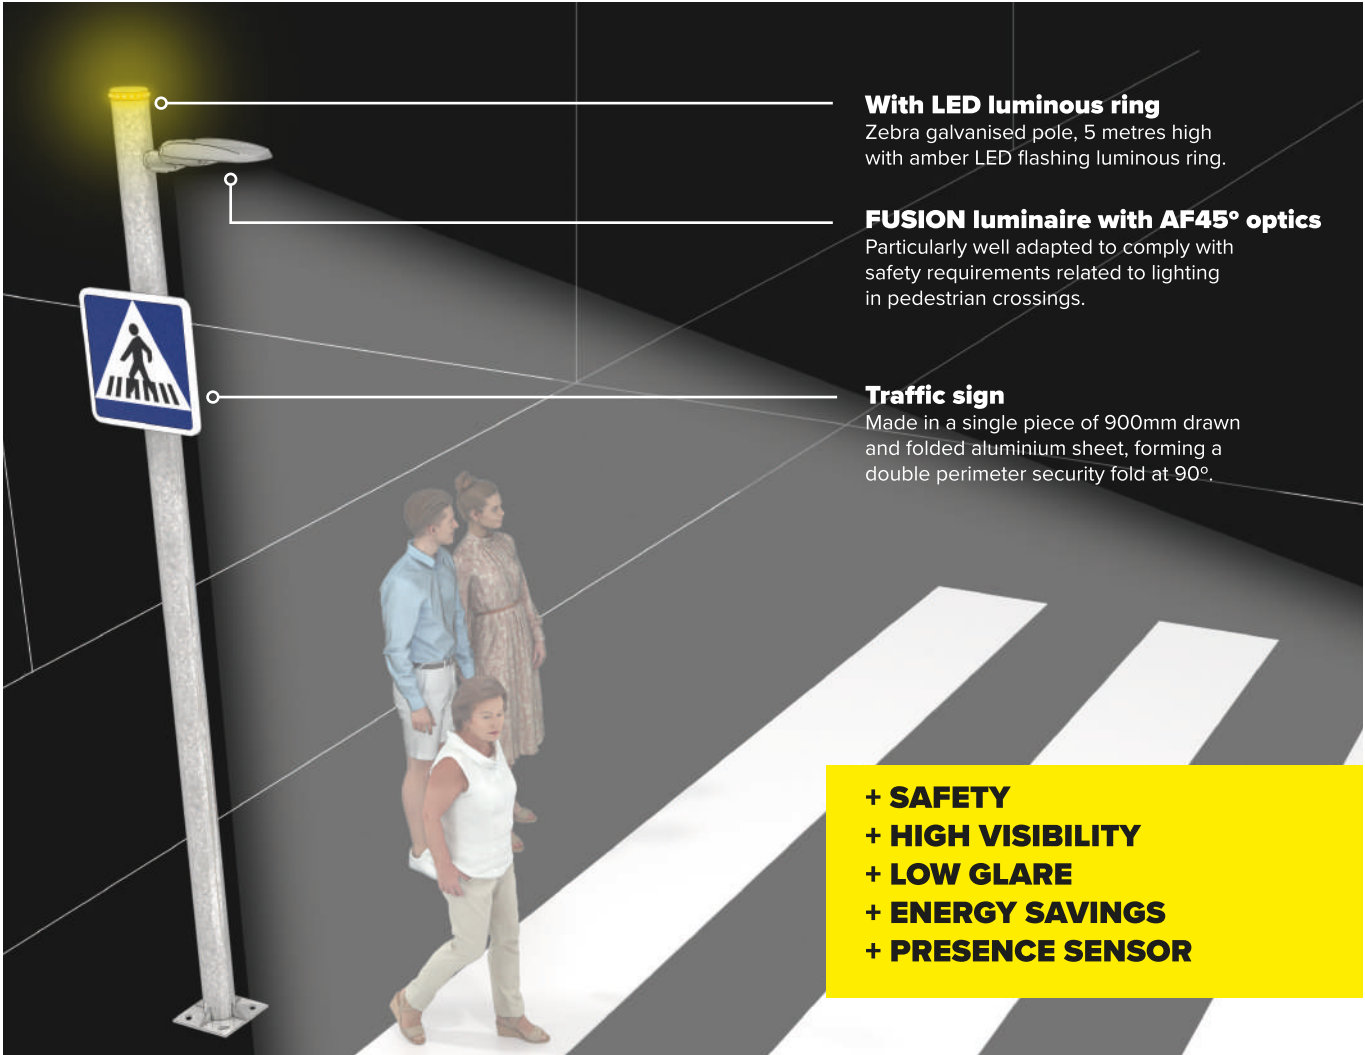

LIGHT POINTS FOR YOUR MOST ARCHITECTURAL PROJECTS

New product line to improve road safety.

ZEBRA light point, especially designed to improve safety in pedestrian crossings and cycle lanes.

With LED luminous ring
Zebra galvanised pole, 5 metres high with amber LED flashing luminous ring.

FUSION luminaire with AF45° optics
Particularly well adapted to comply with safety requirements related to lighting in pedestrian crossings.

Traffic sign
Made in a single piece of 900mm drawn and folded aluminium sheet, forming a double perimeter security fold at 90°.

- + **SAFETY**
- + **HIGH VISIBILITY**
- + **LOW GLARE**
- + **ENERGY SAVINGS**
- + **PRESENCE SENSOR**

Flexible bollards for safety beaconing.
