

JISO ILUMINACION

| Lighting specialists in an exciting and creative world. Lighting is an art that can transform any space and make it attractive. JISO helps you to create them.

THE ESSENCE --- FAMILY BUSINESS

JISO is a young and dynamic family business. Its values are quality, creativity and a job well done.

JISO Lighting has been growing for more than 20 years and creating incredible spaces that can only be achieved thanks to the power and the essence of light. JISO started this adventure in 2001 with the aim of offering customers luminaires that would transform each room, enriching it with new colours and ambiances.

The company has evolved since then and currently offers high-quality lighting solutions, always at the leading edge technologically, aesthetically and in terms of environmental sustainability.

OUR HISTORY

2023

NEW IMAGE

OUR TEAM

OUR FAMILY

JISO is a family business and each of our customers is part of our family. They are not just another number on our balance sheet, they are companies made up of a team with names and surnames. That is why we offer them a personalised, quality service, accompanying and advising them at every stage of their lighting projects. We prioritise their needs and expectations; we get involved and work together until the end. Their projects are our projects; their satisfaction is ours.

OUR VALUES

MISSION

For JISO Lighting, lighting means satisfying a fundamental need. We are inspired by our customers' lighting requirements, respecting the environment as much as possible with the materials used and production processes.

VISION

JISO creates and offers customers innovative lighting solutions that enable them to illuminate attractive and unique spaces.

OUR PASSION

Enthusiastic about teamwork, JISO offers the best to consolidate the company's values and offer customers the best lighting solutions adapted to their needs.

OUR SERVICES

Customer satisfaction, easy installation, energy savings, state-of-the-art designs, control and adjustment solutions, personalised training.

01

PERSONALISED SERVICE

The JISO sales team strives for customer satisfaction in every interaction. JISO's internal as well as external sales representatives offer personalised customer service.

02

ADVICE

Our staff provide exclusive and personalised advice to customers so that they can find the product that best suits their needs.

03

FAST SERVICE

We have more than 7.000 items and a large stock in our logistics centre that allows us to offer a fast service anywhere in the world.

OUR SERVICES

DESIGN

JISO searches for new designs and technologies that enable the company to offer LED luminaires that meet customers' requirements, without losing sight of our environment. Sustainable materials with minimal environmental impact are used.

TECHNICAL SUPPORT

We are available to customers to answer any questions or technical queries they may have. Periodic technical conferences are held and continuous training is provided so that customers feel supported before, during and after the purchase.

OUR SERVICES

Lighting Design and Technical Promotion Department for professionals in the fields of engineering, architecture, lighting designers, interior designers, installers, public administrations, etc.

» MULTIDISCIPLINARY

Team More than 20 years of experience.

» TO ENHANCE THE VALUE OF EACH PROJECT

The concept, the needs of the client, the needs of the space, economic and social factors, the calculation and analysis of each space, complying with current regulations, keeping abreast of trends, taking into account sustainability and the well-being of the users and selecting the best products.

OUT COMMITMENT

CONTROL

Our control and product development laboratory together, with other external ones such as IMQ IBERICA, manage control and product verification tests as well as development and analysis of new products to ensure that our luminaires meet our quality standards and all applicable regulations.

QUALITY

Our Quality Management System has been audited and certified under the standards ISO 9001:2015 and ISO 14001:2015, which guarantees that we have a suitable Management System for the development, manufacture and marketing of lighting products and light sources and, also, that our company is dedicated to the continuous improvement and the environmental protection.

SUSTAINABILITY

JISO's luminaires are made with materials that have a minimal impact on the environment. In this way, the company offers quality products, design and sustainability to customers. We are adhered to the Ecoembes integrated packaging waste management system, which guarantees the correct deal with the packaging waste we put on the market, and we are adhered also to Eco Raee's, which guarantees the correct deal with the waste from the electrical and electronic equipment we put on the market too. We also comply with the regulation 2011/65/CE, which restricts dangerous substances in electrical and electronic equipment.

OUR COMMUNICATION

The communication of our luminaires highlights the technical aspects as well as the emotional ones.

Light is essential in the life and well-being of people.

This is our goal, that JISO products illuminate each space, creating unique environments that awaken all kinds of positive emotions among users.

OUR CATALOGUES

TOP DESIGN

In the world of lighting, design, quality and energy efficiency are key factors in creating cutting-edge projects. In our TOP Design catalogue you will find high-end lighting fixtures with the latest technology.

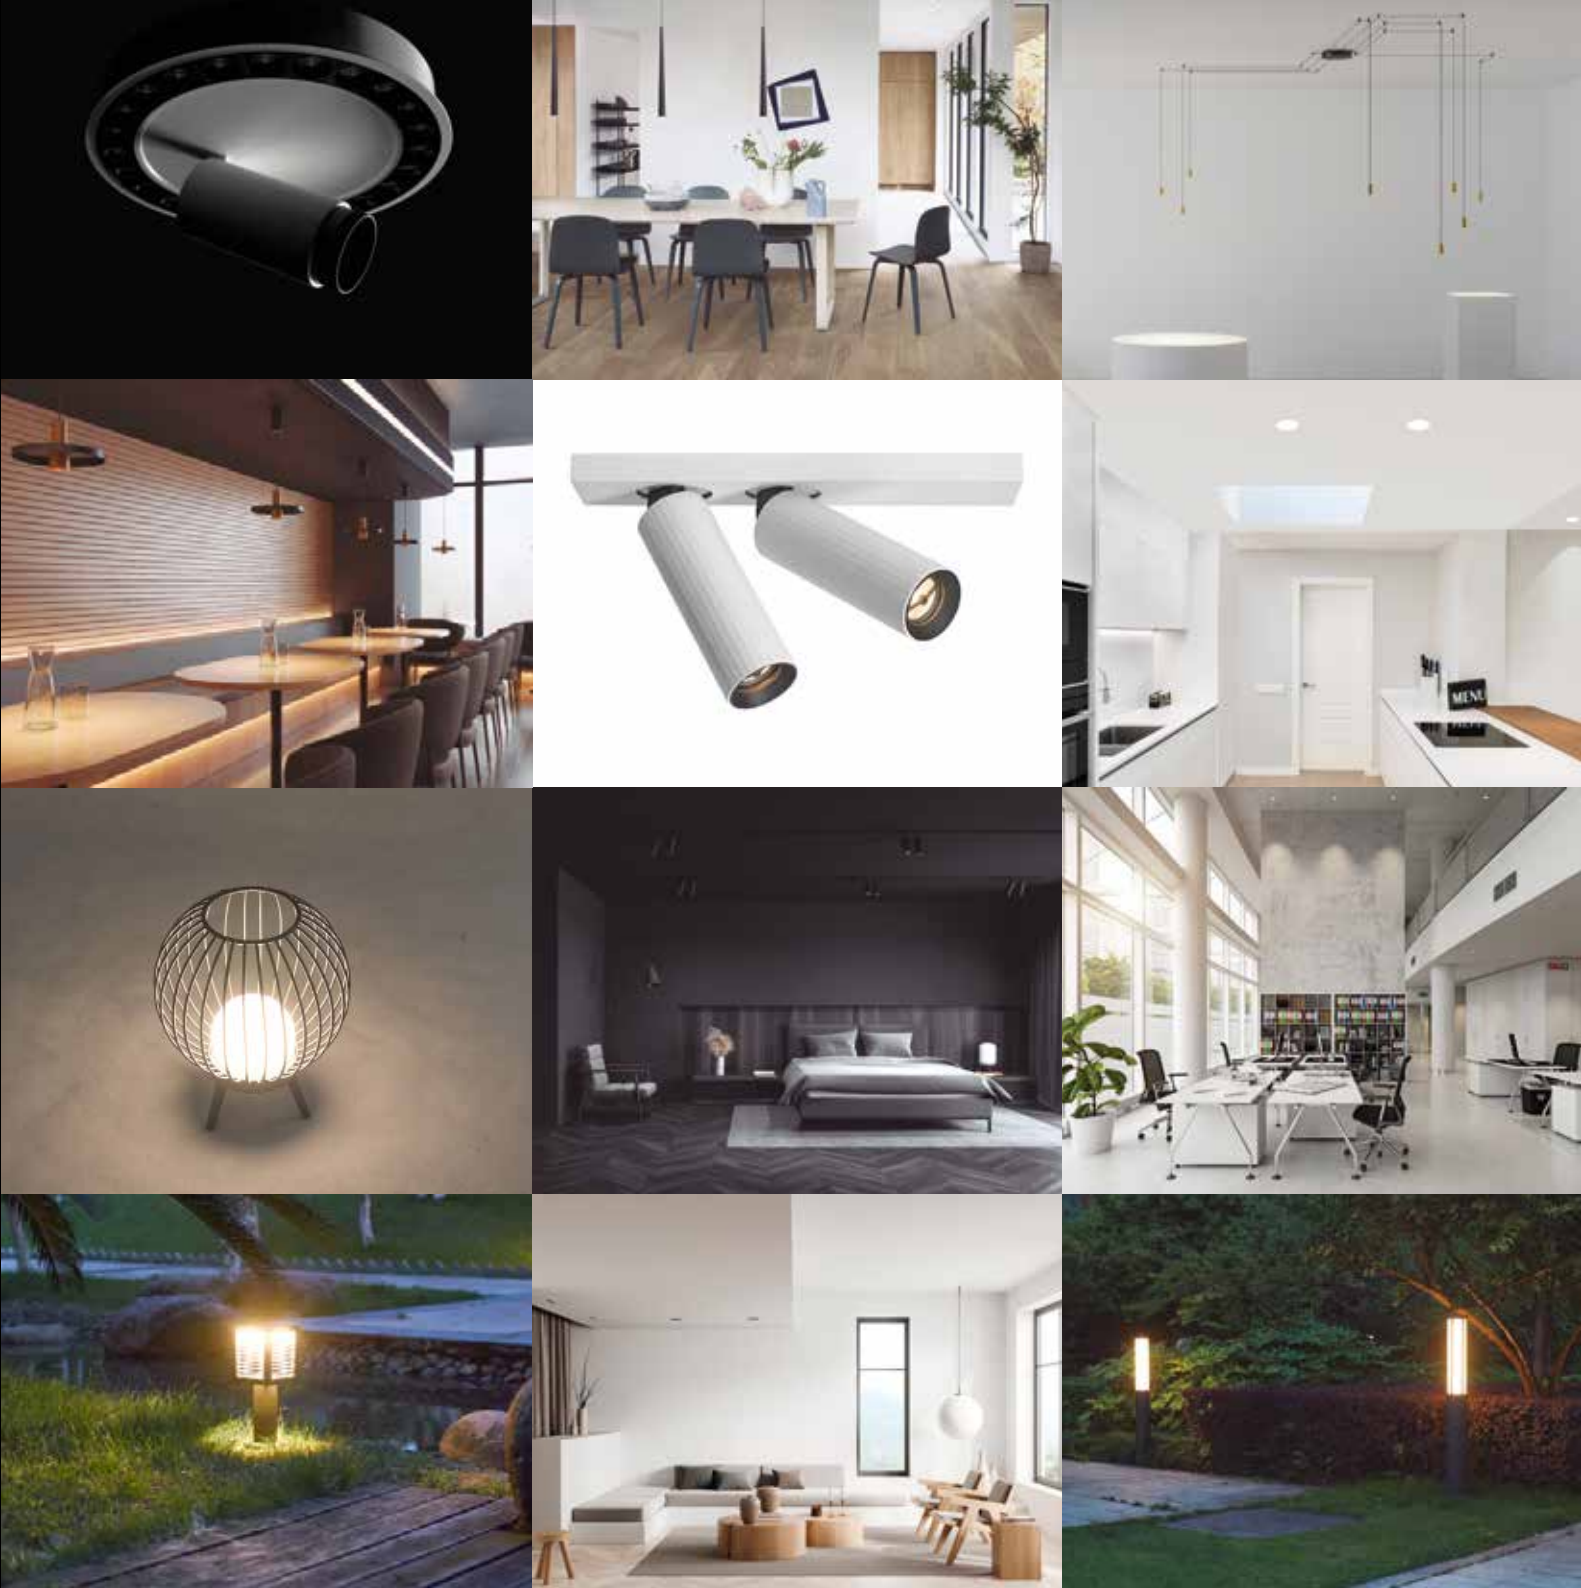

PRO PROFESSIONAL

Luminaires for professionals, with an extensive range of products that adapt to any space and need. JISO also offers control and adjustment options to optimise performance and energy savings.

TOP DESIGN

The luminaires in our TOP catalogue provide added value to lighting projects. Exclusive and personalised products for architecture studios, interior designers, decorators, etc. High quality TOP luminaires tested by our R&D+i department that offer quality and innovation.

PRO PROFESSIONAL

The PRO catalogue contains an extensive range of technical indoor and industrial luminaires. Quality products, easy to install, aimed at all types of facilities: shops, industries, offices, hotels, public spaces, residences, etc. Professional luminaires compatible with all regulation and control solutions on the market.

OUR PROJECTS

JISO luminaires are present in both Spanish and international projects, in sectors such as:

- | Educational centres
- | Businesses
- | Hospitality and catering
- | Hotels
- | Industry
- | Places of worship
- | Offices
- | Parking
- | Residential
- | Health and Well-being

| EDUCATIONAL CENTRES

In educational centres, as in work spaces, lighting is very important. The lighting in schools, universities, academies, etc. must be adequate to promote students' well-being, with no glare or reflections, as well as efficiency to reduce consumption and costs.

| BUSINESSES

Retail is one of the sectors where consumption savings are most taken into account when lighting their premises. Luminaires that considerably reduce consumption will achieve significant energy savings in consumption and in environmental benefits.

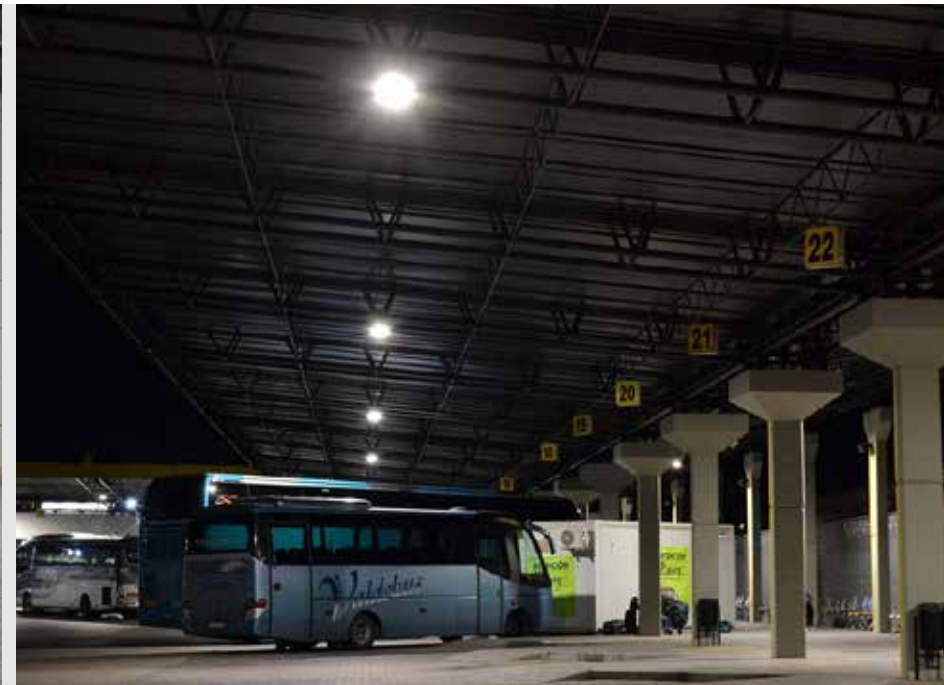

| HOSPITALITY & CATERING

| HOTELS

| INDUSTRY

| PLACES OF WORSHIP

| OFFICES

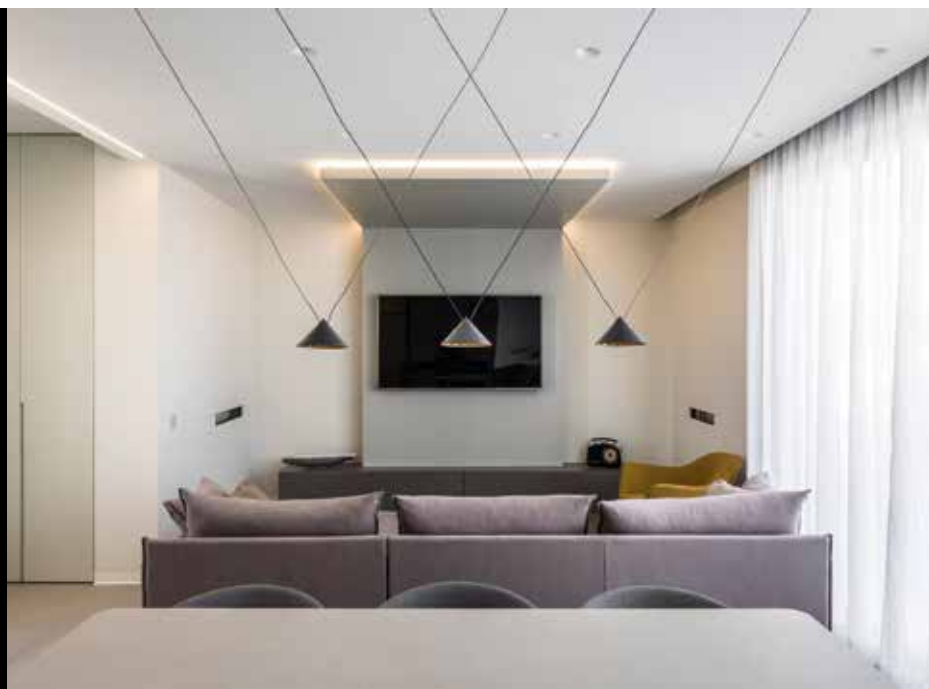

| PARKING

When lighting car parks, of course the priority element is security, for which good parking lighting is needed. Light must be uniform throughout the premises, in corridors and at entrances and exits and, of course, in the parking spaces.
