

# AROUSA

Vandal-resistant stainless steel luminaires  
for pedestrian areas and gardens

Televes®

# AROUSA

A lighting solution that is perfectly suited to city centres and pedestrian areas, thanks to its modern appearance and anti-glare ambient lighting.

## High degree of durability

This line has been designed to withstand the most extreme conditions, such as aggressive environments, vandalism or impacts, thanks to its 3mm thick AISI 304 stainless steel structure and its anti-graffiti coating.

INOX

## Protection and prevention

It has a high degree impact protection (IK10), and against the entry of water and dust, furthermore, it reduces light pollution, without emitting light to the upper hemisphere. It offers great visual comfort thanks to its anti-glare diffuser.

## Exclusive customization

We put at your disposal different aesthetic customization possibilities. From coloured RAL range coatings, or even our most extreme variant, made of naval stainless steel (AISI316).

Also, we offer the possibility of engraving shields or logos\*, screen printing or making different cuts on the external stainless steel enclosure, according to the needs of our clients, thus offering multiple customisation possibilities.

\* Available for bollards.

## Maximum security

### Class II

Guarantees safety without the need for grounding, thanks to the double insulation of the components.

### Certificato SELV

Guarantees an output voltage lower than 60V, minimizing the risk of electrocution in the event of system failure.

### High degree of tightness

Offer comprehensive protection to all optical and electronic elements against the ingress of water and dust.

## Optimize savings

Quickly return on investment, saving up to 80%, thanks to the efficiency of LED technology and the long life of the luminaires, with no need for maintenance.
