

A world map with a dark blue background, showing city lights in yellow and white. Several blue location pins are placed on the map, indicating specific regions: North America, Europe, India, and China. The company name 'UNIGASKET' is prominently displayed in the center, with a blue diagonal graphic element behind the 'G'.

## RUBBER MOLDING PARTS and O'RINGS

## Our products

Our productions include:

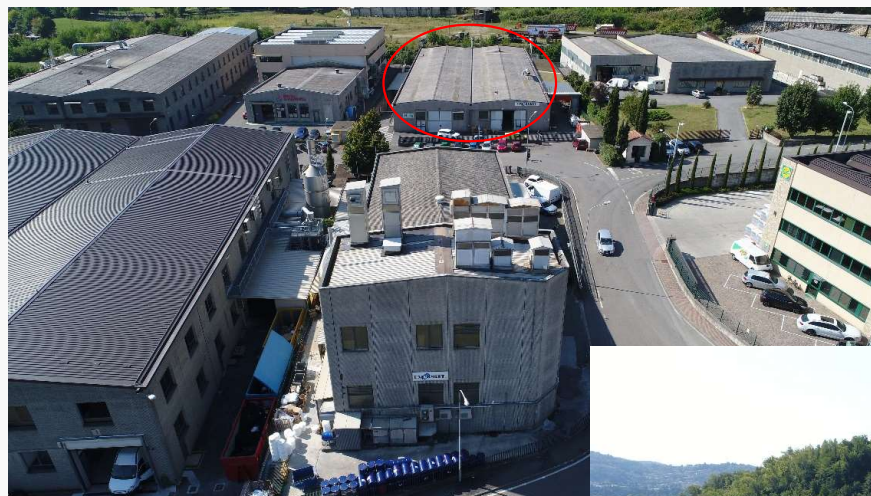

- Oven gaskets with clips
- Gaskets cut and joined
- Silicone profiles
- Gaskets works under air pressure (pumped)
- Silicone tubes

Villongo main office and plants total 20.000 sqm

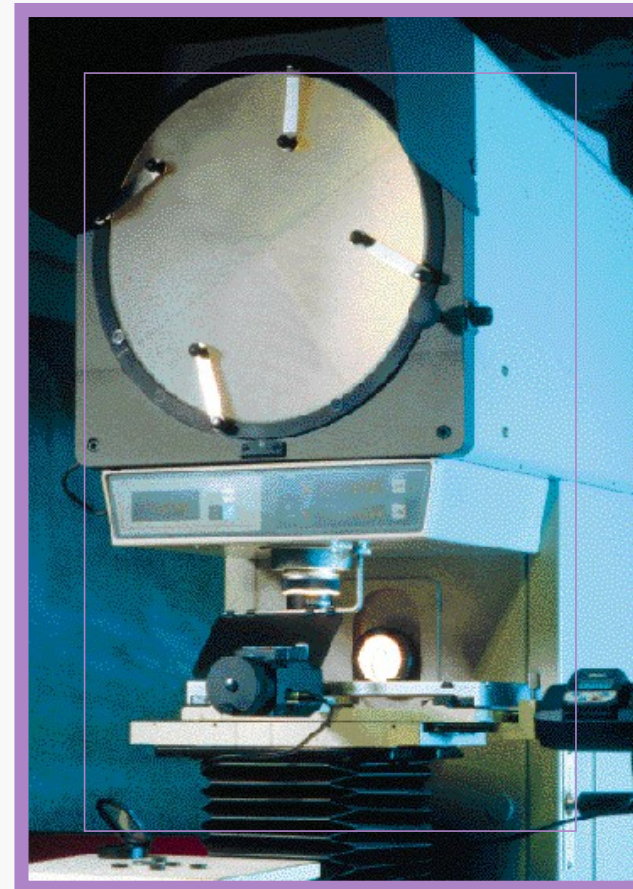

## Others Production Sites

## The Unigasket quality

The market's increasingly pressing demands have led UNI GASKET to achieve **ISO 9001:2015 ISO 14001:2015 and IATF 16949:2016 certifications**. Checks on incoming goods and agreements with self-certified suppliers guarantee the quality of purchased products, while severe control grids assure both the traceability and the quality of products. Moreover, our technical service is at customers' disposal for aftersales service or for choice of the best solution applicable to their specific problems. We have equipments to test and to measure including volumetric expansion bench, coating test bench, thermal shock bench, permeability, high temperature burst test bench, rheometer, densimeter, toolings for compression and tension set tests and climatic chamber for test  $<0^{\circ}$ . Every piece leaving our production facility carries a label containing product identification codes guaranteeing its perfect traceability. Laser markings allows the traceability of our thermoplastic tubes and profiles. Setting out as producers of PTFE tapes, in response to the market's development we have added more and more technical products to complete a range which places us amongst the world's main producers of technical articles in paste extrusion PTFE, silicone, epdm and technopolymers..
