

## 2023 Zhaga Smart City Sensor Awards

Zhaga, the global lighting industry consortium with the mission of standardizing the interfaces of components of LED luminaires, announced the winners of its inaugural Smart City Sensor Awards on 13 April.

The awards recognize excellence in smart city sensors designed to be installed on streetlights using the Zhaga Book 18 standard and that are suitable for Zhaga-D4i certification.

Zhaga Book 18 is a universal platform for streetlighting connectivity, allowing streetlights to be the backbone of the smart city revolution. Each of our Smart City Sensor Award winners exemplify the innovations that are driving this revolution.

In the **Mobility** category, which includes solutions for counting vehicles, bicycles and pedestrian traffic and/or measuring vehicle speed, the award went to global lighting technology supplier **TRIDONIC** and its **SensorX** concept.

In the **Adaptive Lighting Control** category – a category that includes motion detection and other sensors that control lighting levels, the jury awarded **TE Connectivity**, a company that designs and manufactures sensor and connectivity solutions, for its **LUMAWISE Motion Sensor**.

In the **Multi Sensor** category, which covers sensors that combine two or more functionalities, the award went to **Signify** for its **Philips Outdoor Multi Sensor LRI8135**.

**Citilight**, which designs smart IoT luminaire controllers, was awarded for its **CNODE IOT AMR** sensor in the Innovation category. The sensor presents a crossover between an Adaptive Lighting Control and a Multi Sensor.

## Our Members Shape the Future of the Lighting Industry

### Join us Now!

Zhaga membership gives you a head start on the market and the opportunity to develop the best solutions.

Zhaga is an open industry consortium with more than 500 members from the lighting industry.

We are always looking for companies to expand the Zhaga family.

### Our Regular Members Today

### Learn about your Benefits

#### As a **Regular Member** you

- participate in shaping Zhaga's roadmap and strategy
- introduce proposals for new specifications
- contribute to the development of new specifications
- have privileged and immediate access to confidential Zhaga documents, including draft specifications
- can collaborate, network and knowledge-share with a vibrant community
- are able to certify products and use the Zhaga certification logos

#### As an **Associate Member** you

- have immediate access to Zhaga specifications after publication
- are able to certify products and use the Zhaga certification logos
- will see your certified products listed in the public Zhaga product database
- will find your company logo on the Zhaga website
- have the chance to participate in the Zhaga General Assembly
- receive member communications

#### As a **Community Member** you

- can download Zhaga specifications for free one year after publication
- will find your company logo on the Zhaga website
- receive member communications
