

JABLOTRON Mercury

Smart solution for security and protection

JABLOTRON Mercury is a professional IP security system designed to protect family homes, small shops, offices, and businesses.

System with intuitive control that will protect you from break-ins and the elements.

JABLOTRON

About us

JABLOTRON ALARMS is a leading European player in the field of alarm systems. We have been developing and producing alarm systems with an emphasis on the user comfort of our products for over 30 years.

We provide state-of-the-art solutions for the protection of property, health and safety of our customers.

Extended service support

In addition to the standard 2-year warranty, devices of JABLOTRON Mercury offer up to 5 years of extended service support.

Certification

JABLOTRON Mercury complies with the EN 50131 European standard and Grade 2 security level. This certification guarantees the reliability and robustness of the system.

Security and protection

JABLOTRON Mercury can alert the owner of possible break-ins (windows or doors opening, breaking of glass panels, movement of people inside the building). In addition, it can detect imminent fire or flood hazards.

Residential and commercial solution

JABLOTRON Mercury includes a wide range of optional components and accessories bringing modern security solution for homes and small sized businesses.

Control options

JABLOTRON Mercury offers several control options that can be combined according to the preferences of individual users. All methods are **intuitive**, so everyone will quickly become familiar with its use.

Professional installation

JABLOTRON Mercury is a professional security system designed and installed by specialists - our certified installation partners, who will provide you with comprehensive services including subsequent regular service inspections. This guarantees reliable and efficient operation of the system for your peace of mind and safety.

Installation methods

JABLOTRON Mercury can be installed in several ways. In completed and furnished buildings, wireless installation is carried out. This method is friendly to the interior and does not require any construction modifications. In new and refurbished buildings, installation is usually performed using a combination of wired and wireless methods.

ARC (Alarm Receiving Centre)

Connecting the security system to a professional ARC offers you 24/7 surveillance.

If anything happens, you will be contacted by operators and they will send a response unit.

IP alarm with added features

JABLOTRON Mercury uses Internet Protocol (IP) to transfer data to the Cloud and then to the mobile app, ensuring secure, fast and reliable communication.

With remote access, you can monitor the system status, receive alerts and perform operations such as arming/disarming the alarm via the mobile app.

JABLOTRON Mercury is equipped with integrated connectivity and automatically selects a mobile operator with the best coverage. This makes the alarm's communication resistant to outages of individual mobile networks.

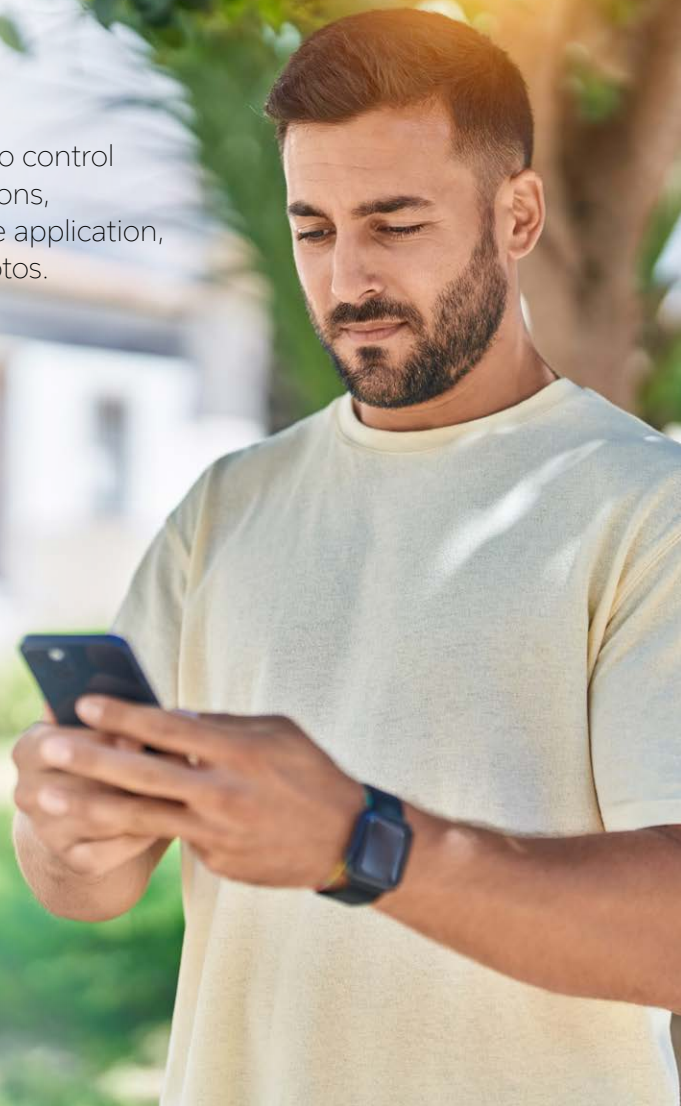

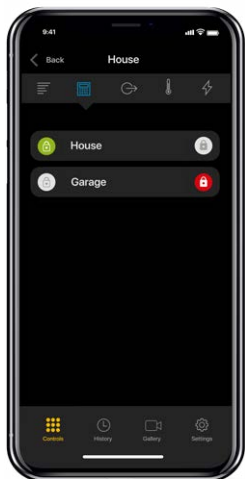

With the new
JABLOTRON Mercury,
you get

**30 days
FREE**

MyJABLOTRON application

Is designed for smartphones (iOS or Android) and allows you to control and check the alarm from anywhere. Thanks to push notifications, e-mails or SMS, you know about every alert immediately. In the application, you can view current information, event history and alarm photos.
