

MURA IP
ADVANCED DOOR COMMUNICATIONS

MURA IP

SIP-ENABLED IP VIDEO DOOR STATION

A unique experience. Enjoy full colour video and high-quality digital audio in wall mounted indoor monitors, IP videophones, or directly on your smartphone or tablet.

Iddero HC2 7" Indoor Monitor

App: CounterPath Bria for iPhone

Attractive. Durable. Versatile.

MURA IP features a neutral design with straight and clean lines. Its attractive and minimalist style is in perfect harmony with contemporary architecture. The body is made of anodized aluminium, a material that was selected for its aesthetic value and exceptional outdoor resistance: MURA IP is built to last. Multiple configurations are available: 1, 2, or 4 buttons; optional keypad; with or without colour camera. All models feature two built-in relays.

Easy installation

MURA IP can be easily and quickly installed on any surface. No wall mounting box is required. A single Ethernet cable combines power and data. Easy configuration through a standard web browser.

Receiving calls in your smartphone or tablet may require additional apps available in Apple's App Store and Google Play. Some apps may only be available as paid apps, or their use may be subject to a fee. The video and audio quality may depend on the performance and quality of the data network. In order to receive calls outside the home's local network, both the video door station and the receiving terminal must be connected to the Internet. All product, service, and company names may be trademarks or registered trademarks of their respective owners.
