Montaža regala za trapezni plafon ostvaruje se pomoću nosača za trapezni lim, navojne šipke i nosača regala.

We use brackets for trapezoidal sheet metal, threaded rod and cable tray for mounting cable trays to the trapezoidal ceiling.

4

Zalamajuća spojnica koristi se za izradu ugaonih krivina na licu mesta, a ugao se formira sečenjem krajeva regala.

Angle connector is used for making angle curves when mounting, and we make an angle by cutting the ends of the cable carriers.

5

Za montažu regala na plafon pomoću dve navojne šipke, koristi se profilna perforirana šina.

We use a profiled perforated rail for mounting cable tray against the ceiling by two threaded rods.

6

Pričvršćivanje nosača kablova za konzolu vrši se torban vijcima PEKOM M6x12.

Zalamajuća spojnica koristi se za izradu ugaonih krivina na licu mesta, a veza između spojnica i regala za rasvetu ostvarena je torban vijcima tipa PEKOM M6 x12.

Angle connector is used for making angle curves when montage, and the connection between connectors and cable carriers for the lightening is formed by PEKOM carriage bolts M6x12.

Za montažu regala za rasvetu na plafon gde je predviđena veća visina spuštanja koristi se lanac ili sajla koja se za regal kači žičanom kukom tipa PEKOM.

We use chain or cable, hooked to the cable carrier by wired hook, for mounting cable carriers for the lightening on the ceilings, where a higher level of descent is foreseen.

Montaža regala za rasvetu na trapezni plafon ostvaruje se pomoću nosača za trapezni lim, navojne šipke i nosača regala.

We use brackets for trapezoidal sheet metal, threaded root and cable carrier for mounting cable carriers for the lightening against the trapezoidal ceiling.

Zalamajuća spojnica koristi se za izradu ugaonih krivina na licu mesta, a ugao se formira sečenjem krajeva regala.

Angle connector is used for making angle curves when montage, and we make an angle by cutting the ends of the cable carriers.
