About CooCo

CooCo, aiming at offering optimal and efficient LED Linear Lighting System for different applications, was founded in 2013 in Shenzhen.

CooCo's Product

- Three series lighting systems designed for specific applications.
- Perfect lighting effect realized by dedicated design.

CooCo's Advantage

- VIP Service: All-round customization and marketing service to help customers expand their market rapidly.
- Local Warehouse: Europe warehouse enables us to reduce delivery time and upgrade after-sale service.

CooCo believes that we will grow up rapidly together with our partners by offering professional products and superior service.

- 1 **Trunking Rail:** 2F(567mm) / 4F(1129mm) / 5F(1410mm) / 6F(1691mm) / 8F(2258mm) / 10F(2820mm) / 12F(3387mm) / 15F(4230mm) / 16F(4516mm)
5-wire / 6-wire / 7-wire / 8-wire / 11-wire, 13-wire (only for Flex version)
- 2 **Luminaire Module:** 2F(567mm) / 5F(1410mm) / 8F(2253mm) / 10F(2815mm)
16W – 150W / 10 Beam Angles
- 3 **Blank Cover:** 2F(567mm) / 5F(1410mm) / customized length, PVC / Aluminum
- 4 **Emergency Module:** 2F(567mm) / 5F(1410mm), Build-in Battery / External Unstoppable Power supply
- 5 **Spotlight Module:** Iron-man / customized spotlight...
- 6 **Track Rail Module:** Regular track rail, work with normal spotlight
- 7 **Daisy Module:** Panel Lighting for area focus light
- 8 **Sensor Box:** Stbox, Midbox, Endbox with sensor
0-10V sensor / DALI sensor

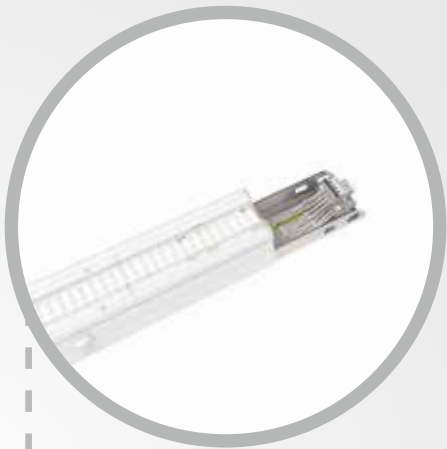

- 9 **Feed-in Box with sensor:** Stfeed, Midfeed, Endfeed with sensor
0-10v sensor / DALI sensor
- 10 **STFeed Box:** Feed-in from quick-connector
- 11 **MIDFeed Box:** Feed-in from middle position
- 12 **ENDFeed Box:** Feed-in from end
- 13 **Cable through from end**
- 14 **Start Box:** No-wire, for closing the end
- 15 **Endcap:** For closing the end

○ 2017

CLine@G2

Building upon the success of CLine G1, the CLine G2 was developed with new special optics for higher transmittance and lower UGR values.

○ 2023

SLine Flex

SLine Flex boasts the F13 Flexible Connector System, allowing unrestricted movement of modules within trunkings. Revolutionary design empowers designers and installers with limitless possibilities.

○ 2024

TLine IP65 Flex

Empowered by the F13P Flexible Connector System, our linear trunking system now achieves IP65 waterproofing. This brings both systematic and aesthetic enhancements, expanding its applications to include tri-proof lighting solutions.

○ 2015

ELine, CLine@G1

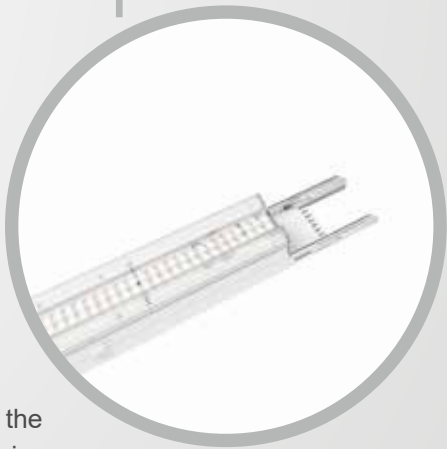

CLine G1 was introduced as the first model in the CLine product line. It featured a click-to-install structure, making installation quick and convenient.

○ 2018

SLine Fixed

Introducing SLine Fixed with the innovative structure and housing materials, incorporating the T11 Fixed Connector System as part of a cost-effective strategy.

Human-Centered Ideology

Putting people first, our LED lighting products prioritize comfort, productivity, and well-being.

Holistic Well-being

Promoting overall wellness, our LED lighting products support natural rhythms and enhance health and happiness.

Sustainable Futures

Lighting the way to a greener tomorrow with energy-efficient and eco-friendly LED products.

Ingenuity Design

Pushing boundaries with innovative LED designs that blend aesthetics and functionality seamlessly.

Peerless Quality

Uncompromising quality sets our LED lighting products apart, delivering exceptional performance and durability.

Harmonious Illumination

Creating a perfect balance of light and ambiance, our LED products enhance spaces with a harmonious glow.

With wide area and different shelf height, supermarkets have special lighting requirements. Our lighting system is aiming to show goods well in the crowded environment.

Working environment has a great impact on worker's efficiency. And lighting plays an important role in creating enthusiastic working environment. Different workshops require different temperature and humidity range, hence high-quality light to support the operation.

Warehouse is used to keep and protect the stock from rain, snow, wind and sun. It requires reasonable light distribution due to its enclosed space and has to avoid catching fire while it gets sufficient luminosity at horizontal and vertical directions above the stock.

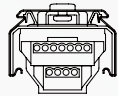

In data centers, where powerful power and cooling, continuous operation, and high availability are essential, the Linear Trunking System offers tailored features to meet these requirements seamlessly.

All-around solution

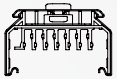

This results to different requirements from different applications in terms of flexibility, cost and energy consumption. A single system is hard to meet all the requirements.

Therefore, CooCo, a company has been dedicating to linear lighting system for 9 years, has developed 3 kinds of trunking systems in 5 generations to provide all-around solutions adapting to various applications.

4 Accessory

As the 3rd generation of trunking system, SLine fixed is still popular in all applications. With its fixed connector system - T11, multiple-connectors can be used in fixed trunking system which allows limited flexibility.

SLine Flex is the 4th generation of trunking system we developed. Equipped with CooCo own designed flexible connector F13, the system is completely flexible that helps designers to focus on the illumination without any concern of luminaires' positions.

Retaining the feature of "flexibility", TLine IP65 Flex can be rustproof with IP65 which can meet all demands in harsh environment of some industrial applications.

from Fixed to Flex and Flex IP65

"Continuous" is always the core idea of the system. Both the trunkings in cost-effective fixed system and the maximum flexibility Flex system can be continuously connected to one another.

SLine Fixed:

The trunking of Fixed system is equipped with female connector with a fixed space. They have pre-wired cables from 5 wires to 11 wires.

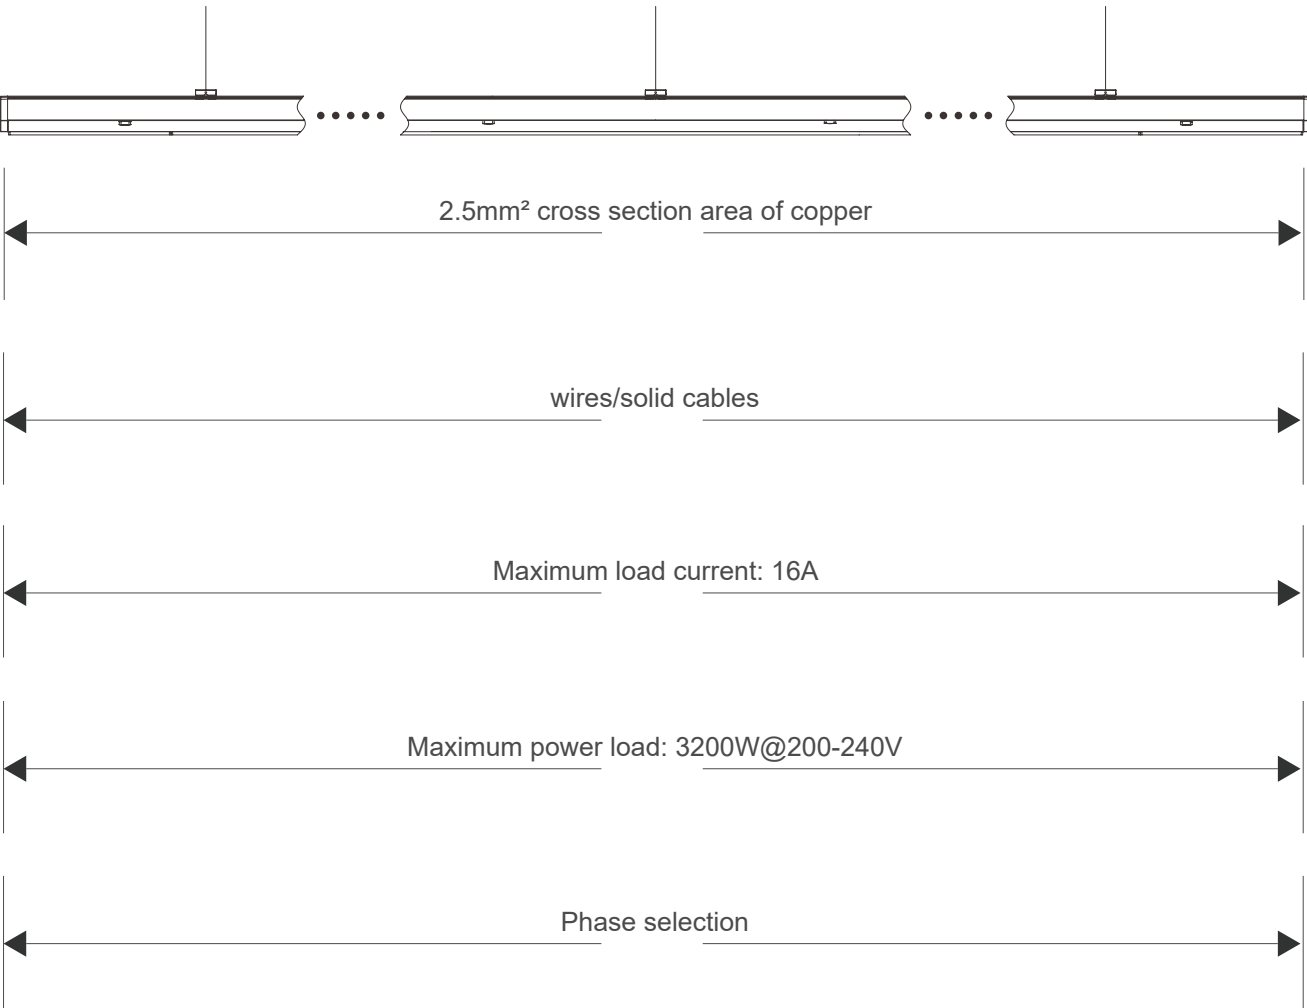

SLine Flex:

The trunking of Flex system has continuous wiring made of copper wires, which allows flexible positioning of modules. Modules are "free-to-attach" on the trunking. 8 or 13 wires are available. Therefore, both built-in battery emergency light and central power supply emergency light can be integrated.

TLine IP65 Flex :

IP65 Flex is not simply an additional variant of Flex system. The features of Flex is completely retained and IP65 level covers all applications with high demand.

Length of Module	Power of Module	Maximum Quantity per circuit	Maximum Length per circuit
5F: 1.41m	40W	80 pcs	112 m
	50W	64 pcs	90 m
	65W	50 pcs	70 m
	80W	40 pcs	56 m
8F: 2.253m	64W	50 pcs	70 m
	80W	40 pcs	90 m
	104W	30 pcs	68 m
	120W	26 pcs	59 m
10F: 2.82m	80W	40 pcs	112 m
	100W	32 pcs	90 m
	130W	24 pcs	67 m
	150W	21 pcs	59 m

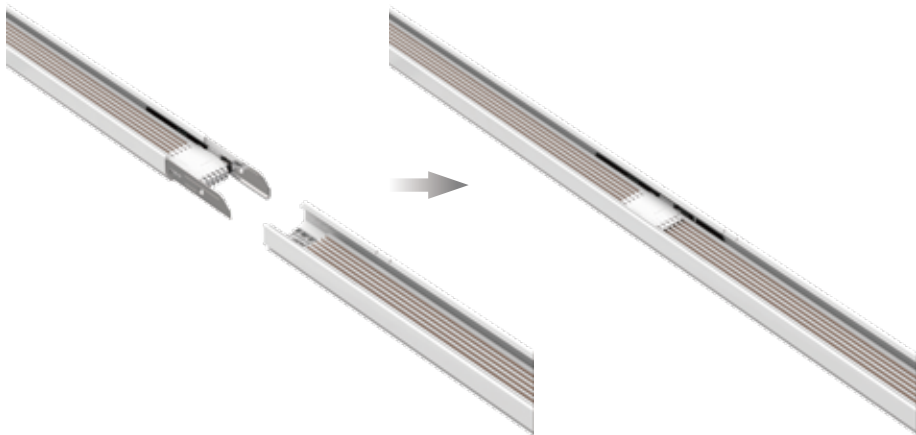

The formula for calculating a full load circuit is as follows:

- 1. Maximum Quantity = 3200W / Power rating
- 2. Full load length = Maximum Quantity * Length of each module

- Prewired copper wires/solid cables

- Effortless rail connection with the unique designed coupling
- "One-step" mechanical connection and electric connection
- Instant "push and play" design

- Continuous connection
- Limitless cascading

- Safety rail locker design
- Lock rails for safety
- Unlock rails for disconnection

- Outer waterproof seal
- Special materials for anti-corrosion
- All-around IP65 rate

View from ABOVE

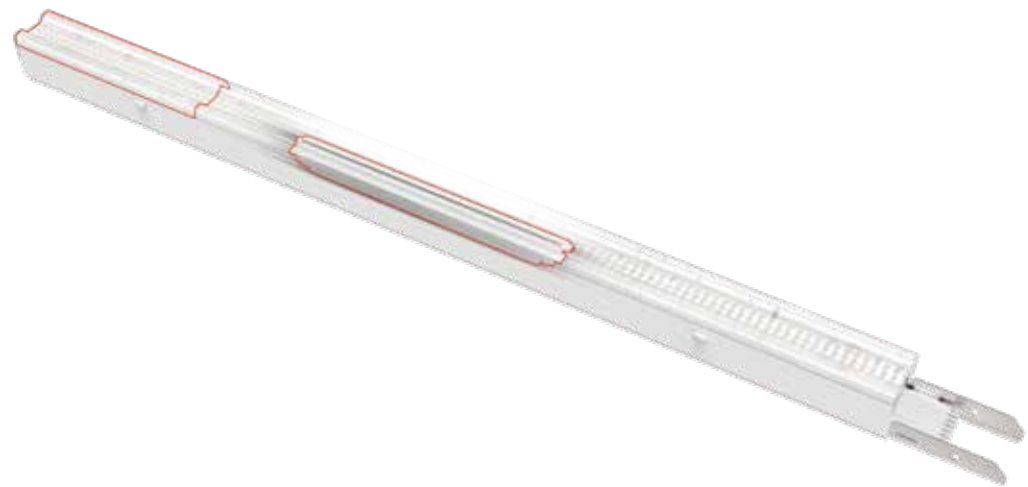

SLine Fixed & SLine Flex

- IP50
- Different connectors, same lumen solution

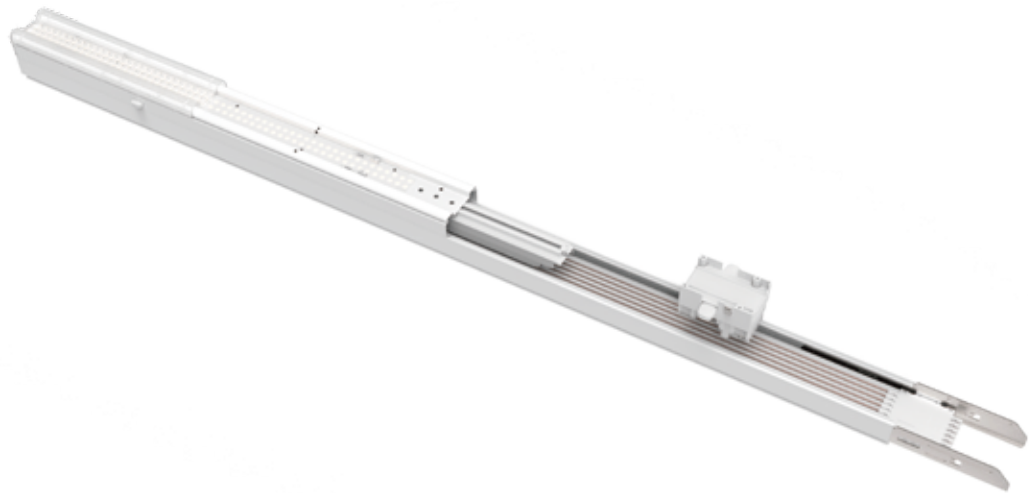

TLine IP65 Flex

- IP65 Flex
- Special lens design
- Dustproof and waterproof

High Efficiency

- The luminous efficiency of the whole lamp can reach 160lm/w or 185lm/w.
- The transmittance of the lens can reach 96%.
- The efficiency of LED driver can reach 94%.

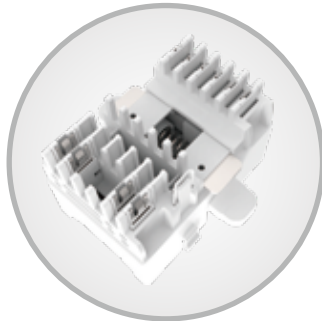

All-around Testing

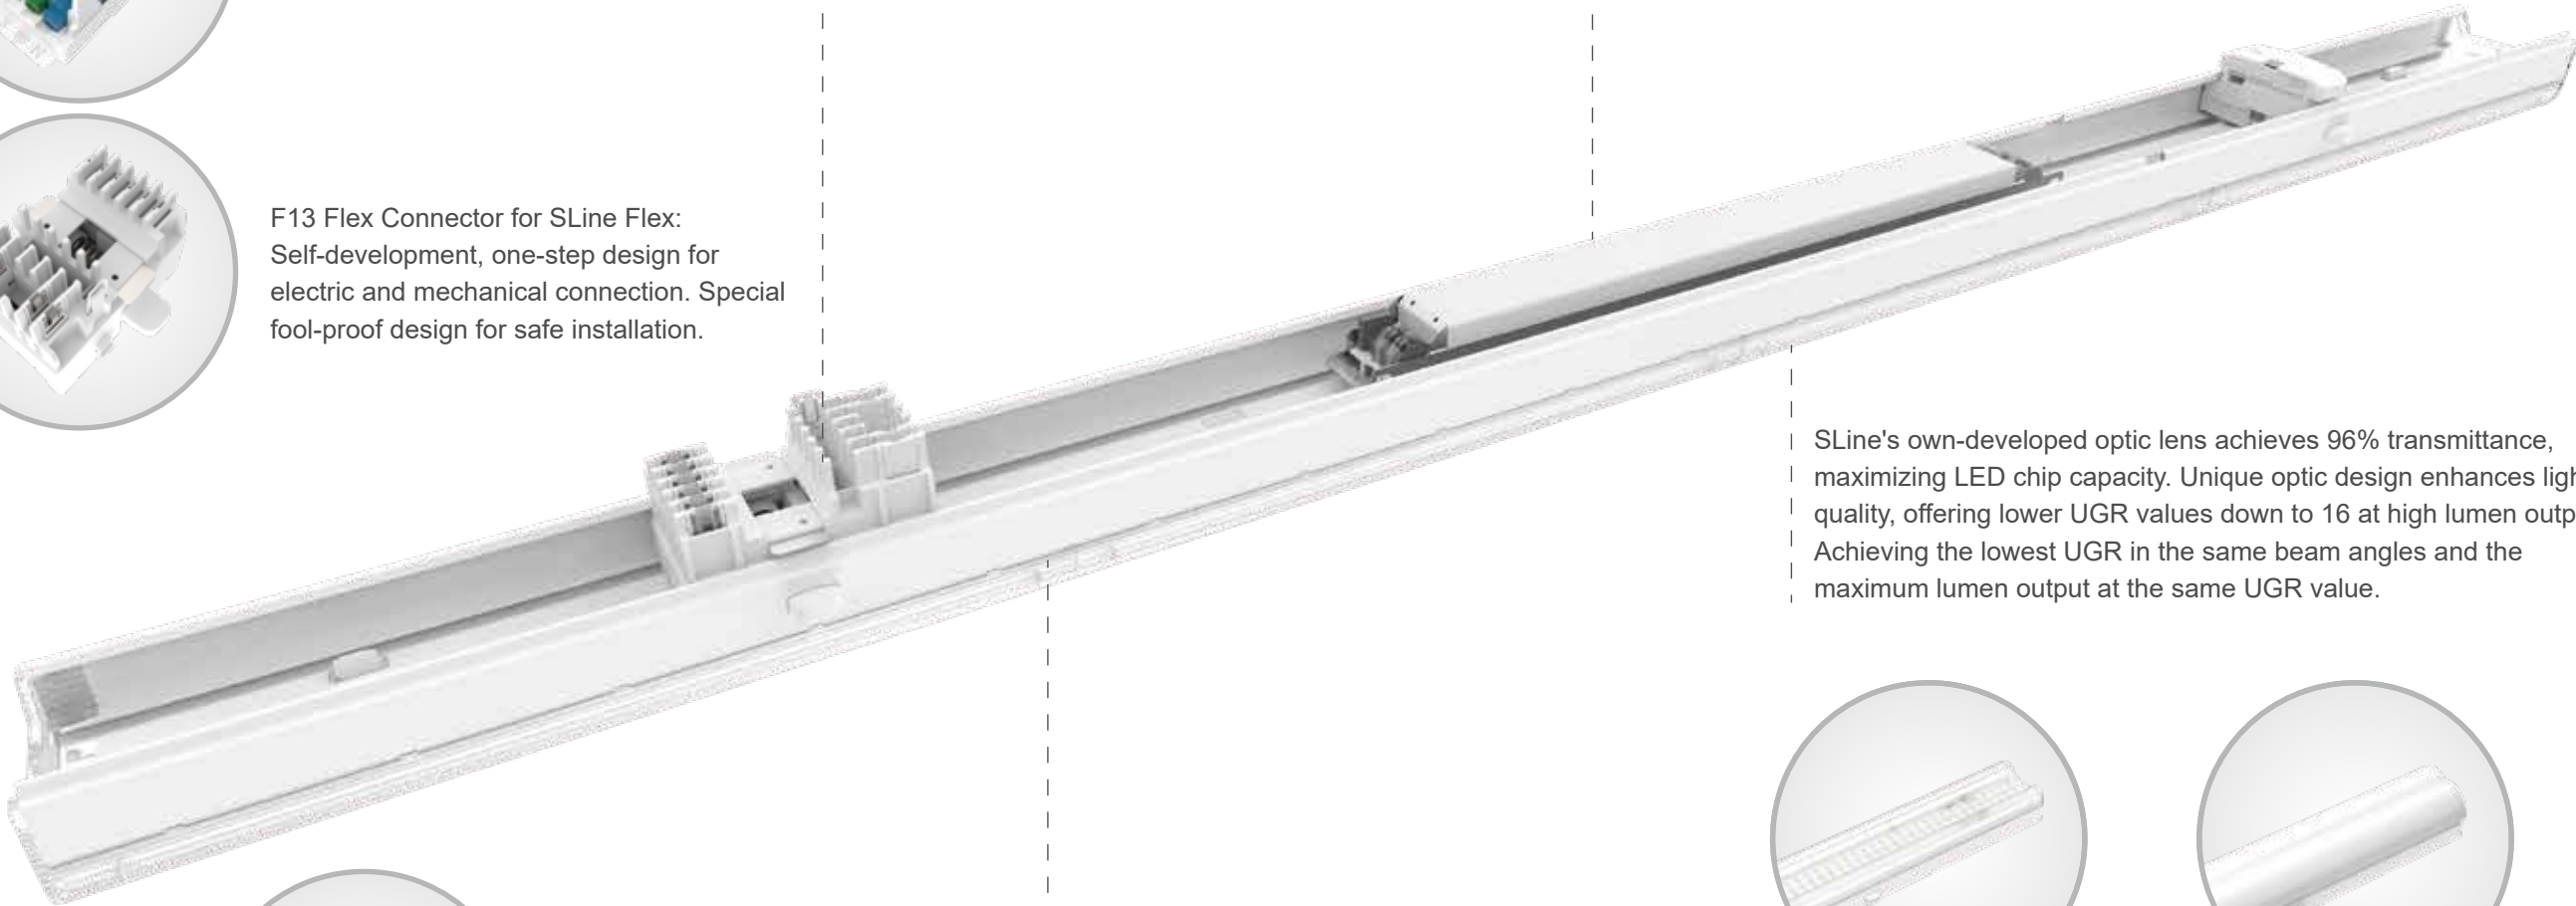

- Innovative optic design
- UGR<19, transmittance up to 96%, PMMA anti-corrosion
- 9 PMMA beam angles, 1 pc diffuser

T11 Fixed Connector for SLine Fixed:
Self-development, compatible with all
trunking from 5 to 11 wires.

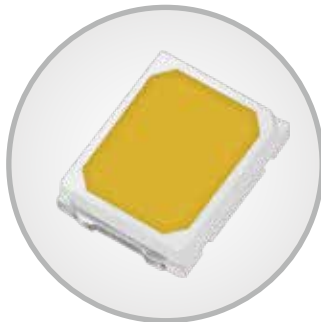

F13 Flex Connector for SLine Flex:
Self-development, one-step design for
electric and mechanical connection. Special
fool-proof design for safe installation.

SLine: Advanced electric design, up to 92% efficiency with Tridonic,
Osram, and Philips LED drivers. Lumen options from 6400lm to
24000lm, configurable in 500lm steps. Special heat dissipation
ensures optimal performance, reaching L80B10@100k hours or
L90B20@50k hours at ta:45°C.

SLine's own-developed optic lens achieves 96% transmittance,
maximizing LED chip capacity. Unique optic design enhances light
quality, offering lower UGR values down to 16 at high lumen output.
Achieving the lowest UGR in the same beam angles and the
maximum lumen output at the same UGR value.

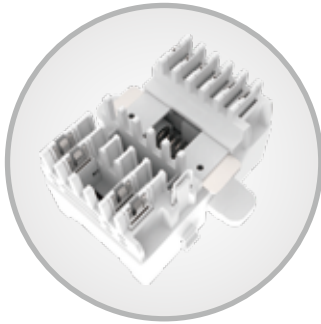

LED: High-quality LED chips from Sam-
sung and Lumileds, SLine provides both
160lm/w as standard and 185lm/w as high
efficiency version.

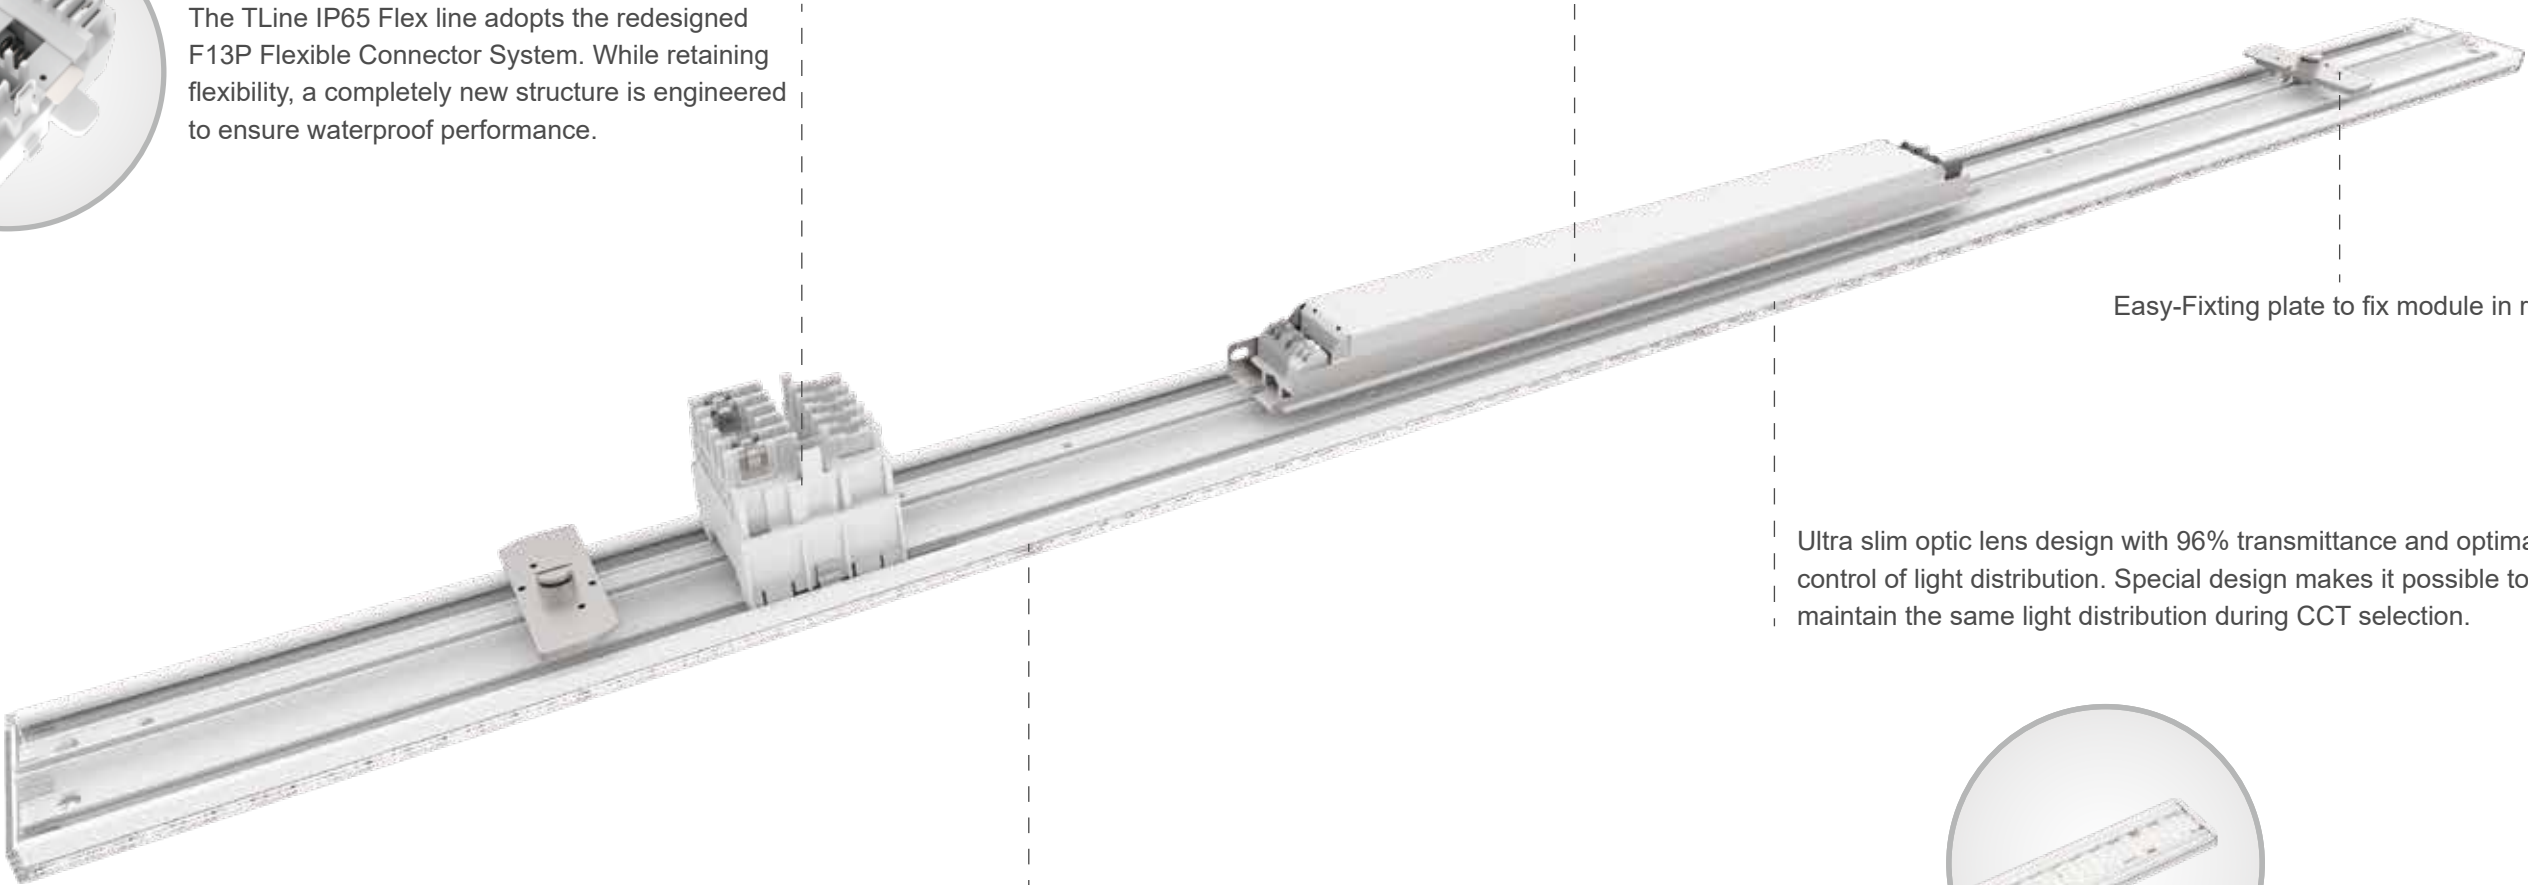

9 beam angles, same appearance

diffuser for 130° only

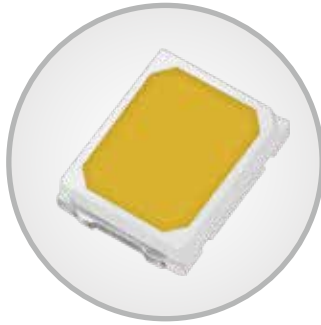

The TLine IP65 Flex line adopts the redesigned F13P Flexible Connector System. While retaining flexibility, a completely new structure is engineered to ensure waterproof performance.

SLine: Advanced electric design, up to 92% efficiency with Tridonic, Osram, and Philips LED drivers. Lumen options from 6000lm to 24000lm, configurable in 500lm steps. Special heat dissipation ensures optimal performance, reaching L80B10@100k hours or L90B20@50k hours at ta:45°C.

Easy-Fixing plate to fix module in rail.

Ultra slim optic lens design with 96% transmittance and optimal control of light distribution. Special design makes it possible to maintain the same light distribution during CCT selection.

LED : High-quality LED chips from Samsung and Lumileds, SLine provides both 160lm/w as standard and 185lm/w as high efficiency version.

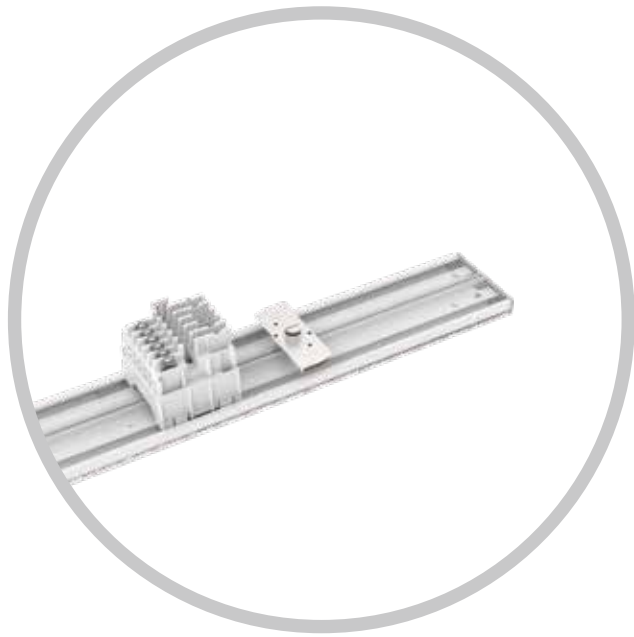

9 beam angles, same appearance

Customization
Your idea can be integrated into the system smoothly

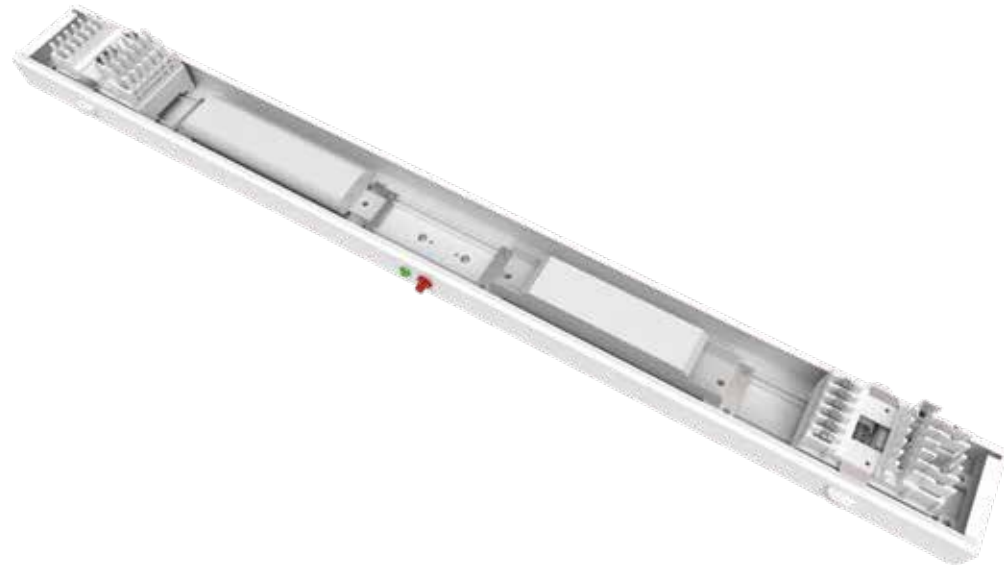

Emergency Luminaire: Type A

- ① **Based on regular luminaire module**
Add battery and emergency driver in regular luminaire module.
No limitation on the wattage of luminaire module.
- ② **LED Driver**
LED driver supplies power to LED luminaire as usual.
- ③ **Emergency Driver**
Switchable design allows user to power on/off as usual with full lumen output.
When power fails, emergency driver supplies 10W with full luminous efficacy.
- ④ **Li-Pe Built-in battery**
Battery supplies power luminaire more than 3 hours when power fails.
High temperature resistance battery: 3600mAh.

Emergency Luminaire: Type B

- Independent module with 4W/500lm/3hours emergency performance. Customized lens to reach a wide beam angle.
- Support built-in battery power supply.

Emergency Solution

Built-in Battery

Power supply from battery in module.

Built-in Battery + Central Power Supply

Double backups of power supply in two ways.

Central Power Supply

Power supply from EPS* or UPS* of building.
Terminals inside of module are used to choose channels.

EPS: Emergency Power Supply
UPS: Uninterruptible Power Supply

Built-in Battery Emergency

Built-in Battery Supply

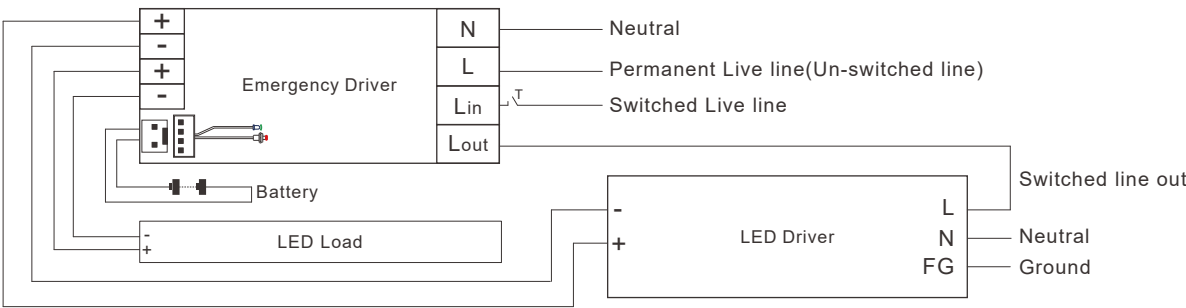

Build-in Battery + Emergency Driver (+ LED Driver)

Trunking Rail:	6 wires, 8 wires, 11wires, 13wires
Emergency Brightness:	12w (1920lm)
Emergency Durable:	>3hrs
Emergency Battery:	LiFe high-temp resistant battery
0-100% Charge Time:	24hrs
Emergency Driver Lifespan:	30,000hrs
Emergency Driver Warranty:	3 years
Battery Warranty:	1 year (4 years design life)
Certification:	CE, CB, ENEC

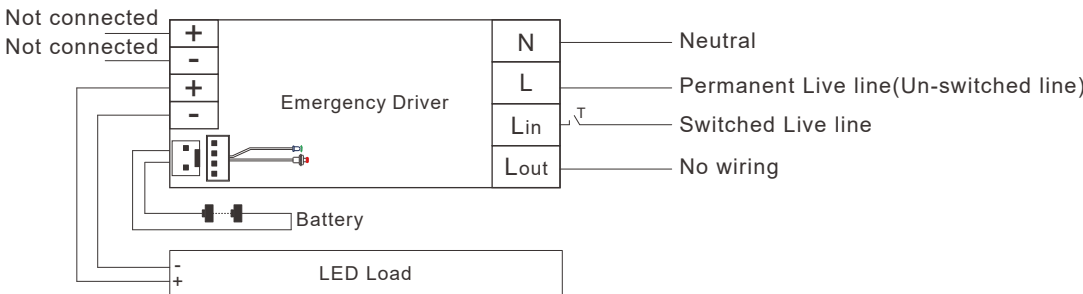

Mode 1: Connection with LED driver

- Normal status: permanent live line is on.
Luminaire module runs on LED driver and provide full rated wattage. Power is from main supply. Battery is on charge.
- Emergency status: permanent live line is off.
Luminaire module runs on emergency driver with emergency wattage. Power is from built-in battery.

Mode 2: Connection without LED driver

- Normal status: permanent live line is on.
Luminaire module runs on emergency driver and remains in standby mode with no lighting. Power is from main supply. Battery is on charge.
- Emergency status: permanent live line is off.
Luminaire module runs on emergency driver with emergency wattage. Power is from built-in battery.

Central Power Supply

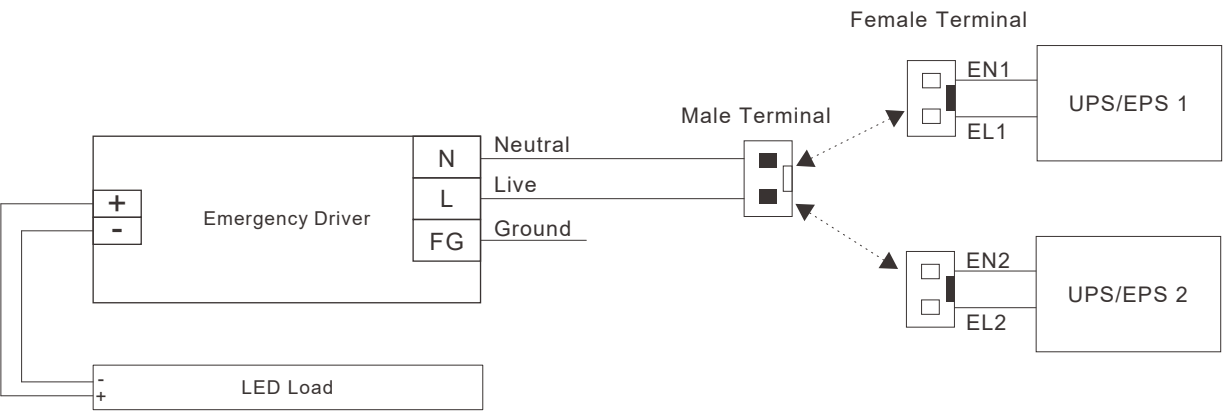

External Central Power Supply UPS/EPS(Unstoppable/Emergency Power Supply)

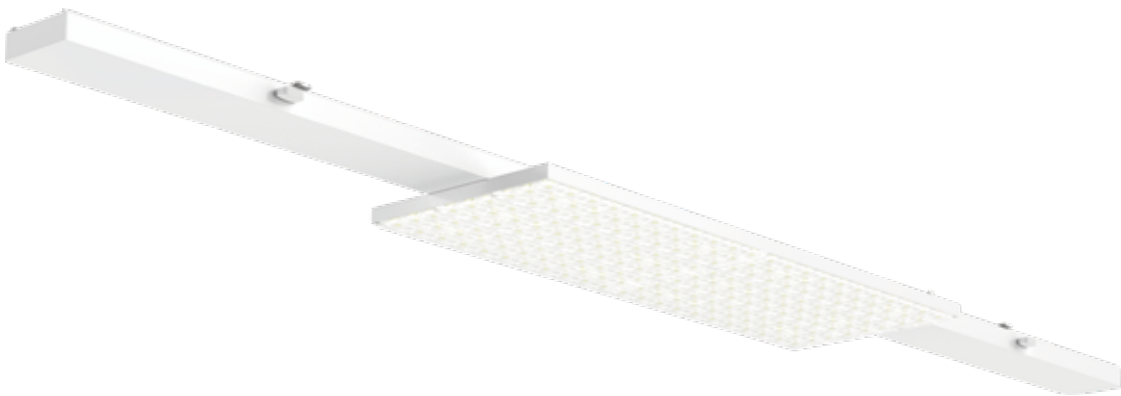

- Trunking Rail: 11wires, 13 wires
- Emergency Brightness: Full rated lumen output
- Emergency Durable: according to UPS/EPS
- Power supply: UPS/EPS of building usually
- Channel: UPS/EPS usually provides two channels, which are EL1/EN1 and EL2/EN2.

Mode: Use terminals to choose channel from UPS/EPS

- All status:
Luminaire module runs on LED driver and provide full rated wattage. Power is from UPS/EPS.
- Internal terminals
UPS/EPS usually has two channels: EL1/EN1 and EL2/EN2.
We provide three groups of instant terminals inside of module. Customer can decide what the channel they would like to connect to each module.

Stfeed with Sensor

- Wires: 7 / 8 / 11, 13 Wires
- Function: Sensor / Feed in power supply

Stbox with Sensor

- Wires: 2 Wires
- Function: Sensor

Endbox with Sensor

- Wires: 2 Wires
- Function: Sensor

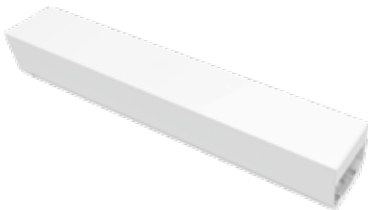

Endfeed with Sensor

- Wires: 7 / 8 / 11, 13 Wires
- Function: Sensor / Feed in power supply

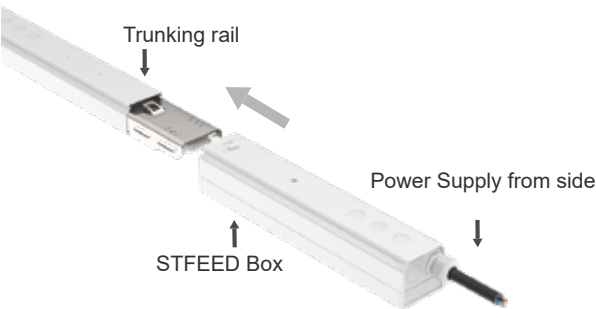

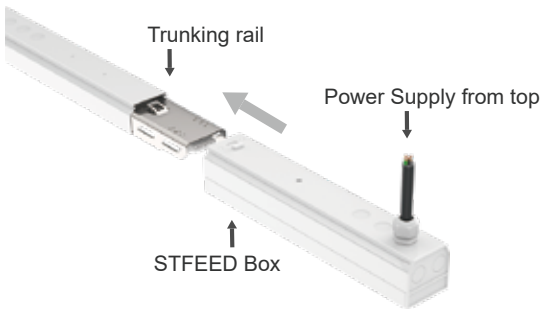

The sensor module can be customized to be any length.

STFEED Box - Start Feed Box

Dimension: L400*W65*H60mm

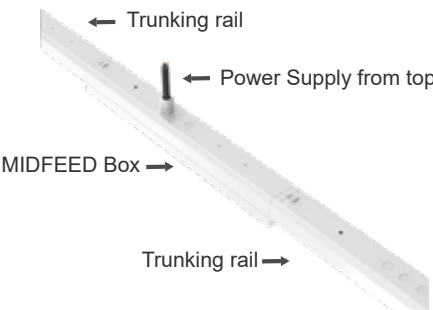

which can be installed from the side of end cap or top
It can be used in the front parts of Wiring from the Linear System.

MIDFEED Box - Middle Feed Box

Dimension: L700*W65*H60mm

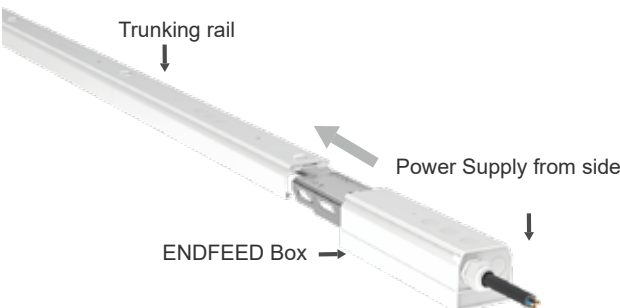

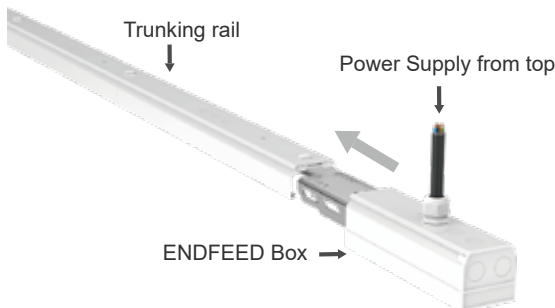

which can be installed from top.
It can be used in the middle parts of Wiring from the Linear System.

EndFEED Box - End Feed Box

Dimension: L225*W65*H60mm

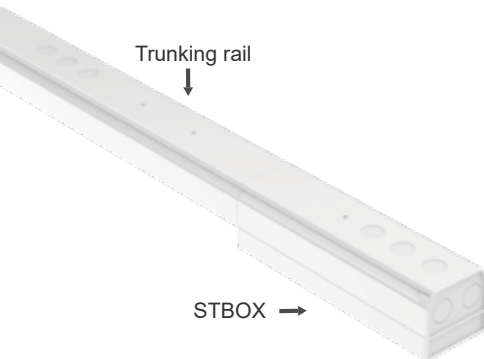

which can be installed from the side of end cap or top
It can be used in the end parts of Wiring from the Linear System.

STBox - Start Empty Box(no wire)

Dimension: L225*W65*H60mm

It cannot input wires, which is used for the front parts protection
of Linear system.

Wiring from the End

- Method 1: Stbox + Endfeed

Note	
Easy installation, but the Stbox & Endfeed is nonluminous.	

- Method 2: Endcap & Terminal Block + Endcap
(For SLine Fixed only)

Note	
More complex installation, whole line is luminous.	

Wiring from the Start

- Method 3: Stfeed + Endcap

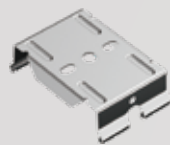

Note	
Stfeed combines the function of Endfeed and Stbox, but it is nonluminous.	

Wiring from the Middle

- Method 4: Stbox or Endcap + Midfeed + Endcap

Note	
Any part can be wired except the front and end.	

Surface Mounted Kits A

Thickness: 0.5mm
