

DOVIT

Give your home a brain.

DO.Tatto, our range of
customizable switches

Innovative housing

Timeless, elegant, and easy to use, DO.Tatto switches allow you to design modern interiors at the forefront of innovation. Paired with our Smart Home solution, experience a new level of sensory comfort.

Discover our new version of smart switches developed with the feedback from our clients and users. A range that combines design, innovation, and professionalism to meet all your expectations in connected living.

DO.Tatto switches have been designed to provide you with the flexibility and speed needed for the realization of your projects.

The backlit glass keyboard and customizable touch keys allow you to manage your entire home automation system through simple programming. From basic lighting to the creation of complete scenarios, give free rein to your desires.

Simple and intuitive, the DO.Tatto range offers a **unique and immediate user experience**

Management of all types of lighting

Blinds, shutters, awnings... compatibility with a wide variety of motorization systems

Ventilation, multimedia... the control possibilities are numerous

Temperature and humidity control

DO.Tatto: Switches available in both **DOVIT and KNX versions**

DOVIT

Our DO.Tatto switches not only add a touch of modernity to an interior, but they also have the flexibility to operate in either KNX or Dovit systems.

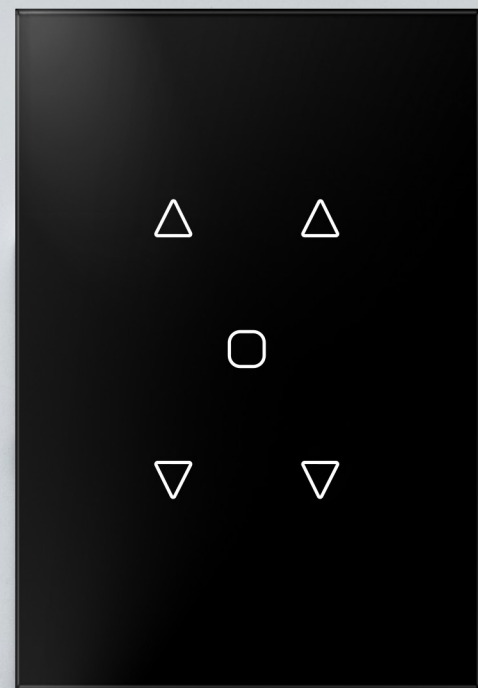

KNX

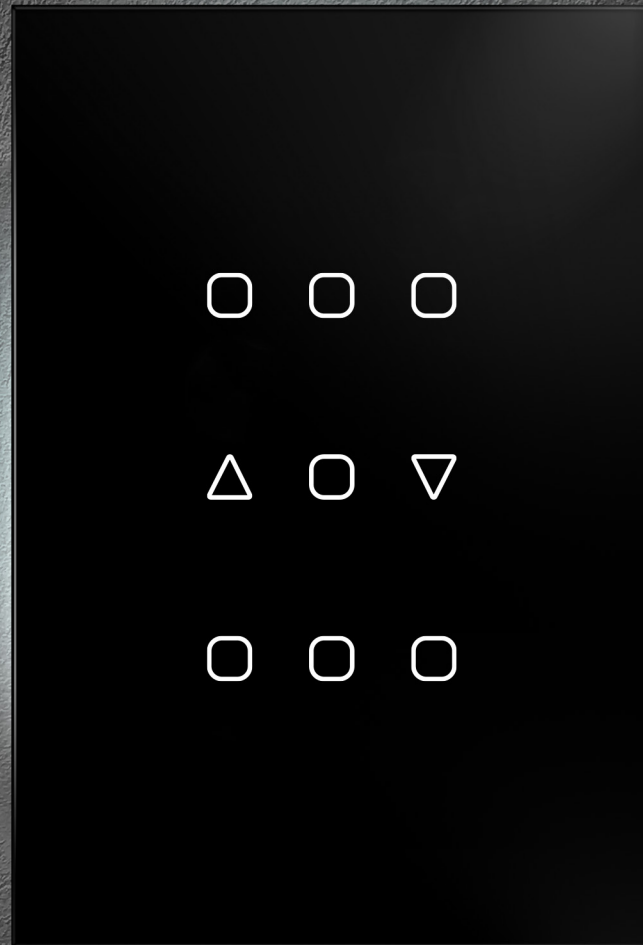

Whether you have a KNX or Dovit installation, you can easily replace traditional push-button switches with our range of intelligent and elegantly designed switches, ensuring intuitive control of lighting, heating, air conditioning, and much more.

With DO.Tatto, home automation becomes an art of living, combining elegance and functionality for absolute comfort in your smart home.

Bright and
modern

DO.Tatto can be used as ambient lighting by activating the peripheral lighting.

Program the appearance of your icons directly from your screen or Dovit APP. Integrate your preferences into predefined scenarios according to different times of the day.

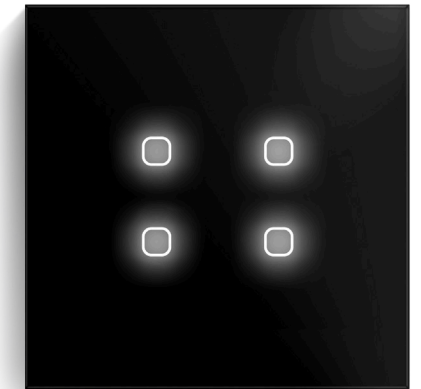

Customize the visibility
of the icons with our
glass plates

The screen-printed glass

The icons remain subtly visible even in Ghost Mode, adding an aesthetic dimension to your space while maintaining a clean and functional design.

The glass with customization card

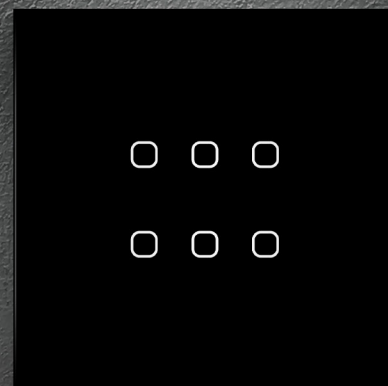

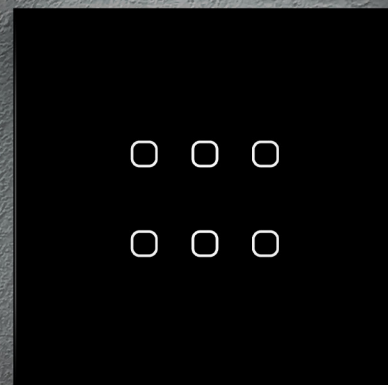

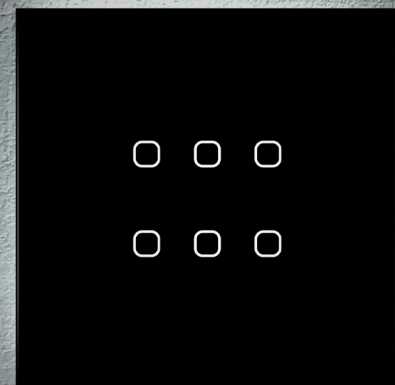

Icons are visible when the switch is turned on but disappear completely when the switch is off. You have the flexibility to change the cards to match the evolution of your style or needs.

With Ghost Mode, the icons become invisible when the switch is no longer in use. As your hand approaches, the proximity sensor brings your setup back to life.

Variable brightness

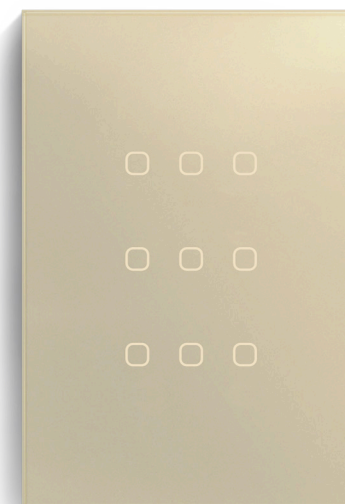

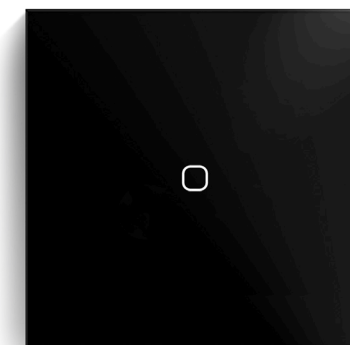

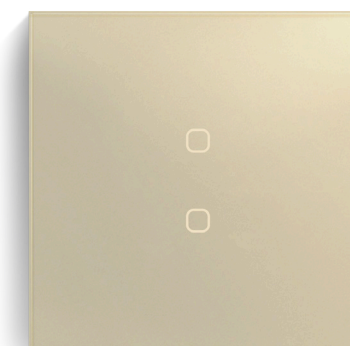

Program the intensity directly from your screen or Dovit APP. Integrate your preferences into predefined scenarios based on different times of the day.

Switches that match **the design of your home**

The switches are available in 85*85 mm and 125*85mm formats. Explore a library of glasses with various icons and colors.

All references can be found in the DO.Tatto technical sheet.

A versatile switch

Say goodbye to unattractive columns of switches.
Centralize all room functions on a single Tatto.

From 9 visual commands, upgrade to 20 regular
commands thanks to touch recognition.

A sleek and discreet design to complement any interior style

Ideal for controlling dimmable lights

Real-time feedback

An illuminated icon can indicate specific
events, such as an activated alarm, a door left
open, or lights turned on.

Customizable glasses to suit your needs

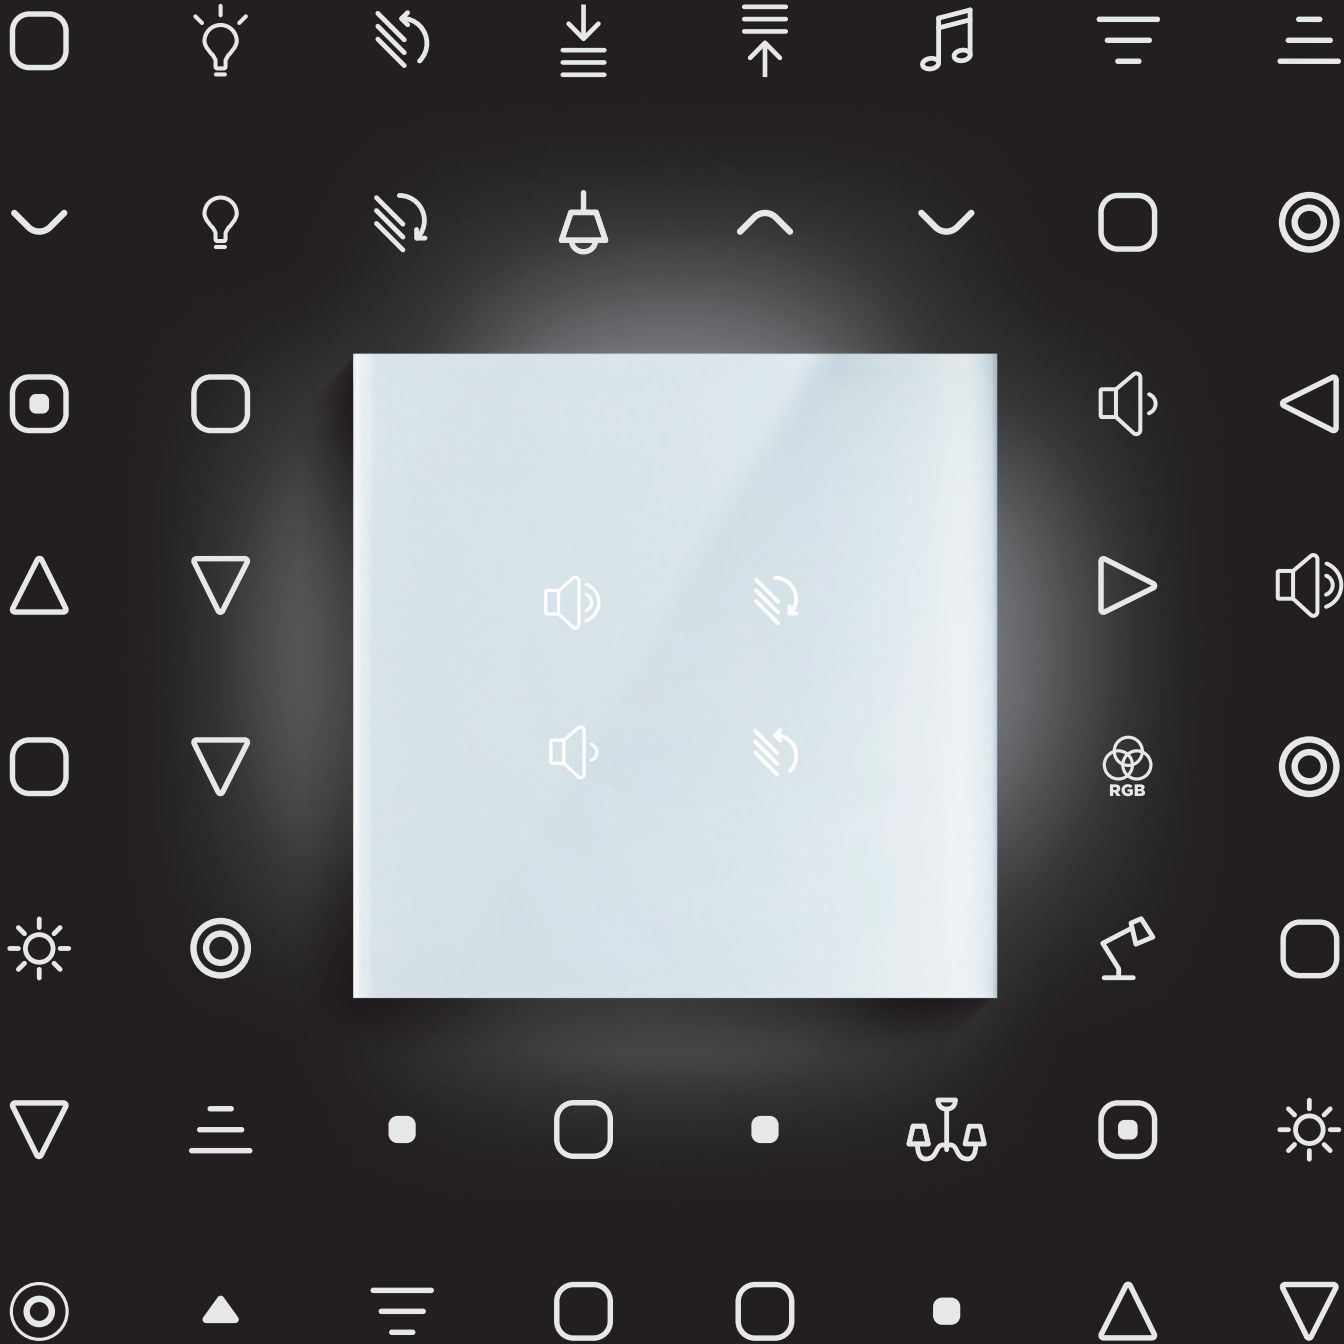

Dovit Icon Library

Explore an extensive library of icons to bring your ideas and specific needs to life.

Customize each programmed command with a wide range of carefully crafted pictograms. Our library offers a plethora of options, from standard icons to unique designs tailored to your style. Easily and quickly identify each command with this intelligent and aesthetic customization.

Design Service

To delve further into the customization of your Tatto switches, create your own icons to match all application areas (offices, hotels, stores, showrooms, etc.).

The thermostats are only available with printed icons (no Ghost Mode).

Intelligent Touch Thermostats

Integrating seamlessly into the Tatto range, our thermostats enable control of heating, adjustment of air conditioning, and easy switching between summer and winter modes.

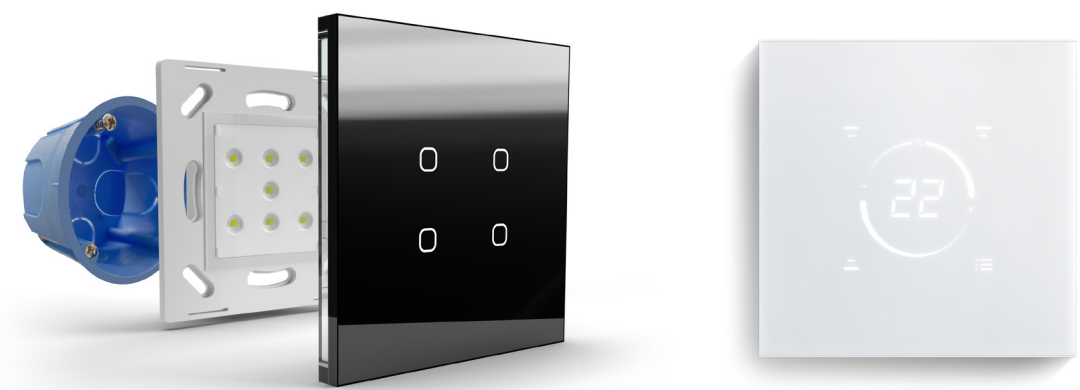

Get a quick overview of the room temperature and manually set the setpoint via touch points or the touch circle.

If you want to manage two temperature zones from the same device, it's possible by connecting a remote sensor.

3 control points are configurable to manage housing functions

Integration of DOVIT switches and thermostats into your Smart Home

Switch :

The plate and glass are sold separately for simplicity and flexibility in design. Only 6 plate references to meet all your expectations!

The **D-KP-85** switch is configurable with 1, 2, 4, and 6 commands. It is available with a temperature sensor (D-KP-85-T) or a humidity and temperature sensor (D-KP-85-TH). The **D-KP-125** version is configurable with 1, 2, 3, 4, 5, 6, and 9 commands.

This product is available with a temperature sensor (D-KP-125-T) or a humidity and temperature sensor (D-KP-125-TH).

Thermostat :

Several versions of thermostats are available to match all your projects:

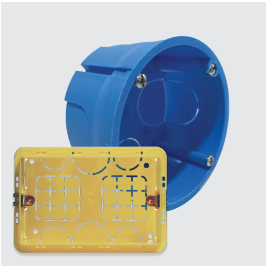

- 2 dimensions: 85*85 and 85*125
- 3 colors: white, black and sand
- 3 configurations: temperature (CT), temperature and humidity (CTH), 2-zone control (C2T)

Electrical specifications		
Supply voltage	13,8Vdc	
Max consumption	0,9 W	
Min consumption	0,45 W	
Bus	DO.Connect	
1 input for:	Switch	Thermostat
	Dry contact (window contact, push button, ...)	Dry contact (window contact, push button, ...) or Temperature sensor (remote sensor, average temperature, 2 zones)
Dry contact (window contact, push button, ...)		
Operating ambient temperature	0°C ~ 40°C	
Environmental impact	2	
Protection	(IP20)	
Operating ambient humidity (non-condensing)	10% ~ 90%	

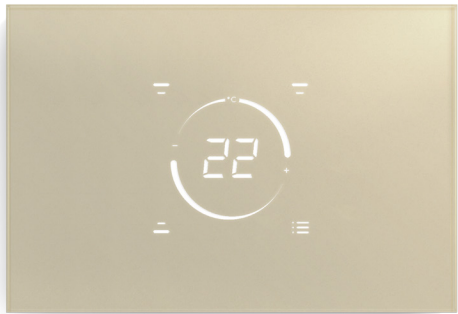

The surface, made of tempered glass, is resistant and easy to clean.

The hanging system meets professional standards.

If using round boxes D60 or 502, you can choose vertical or horizontal mounting even after installation. All models are compatible with these round boxes. KP-125-xx models (125*85 mm) also work with box 503.

Optimized integration of a KNX system into your Smart Home

Electrical specifications

Supply voltage	Par BUS KNX
Max consumption	0,5 W
Min consumption	0,25 W
Bus	KNX

2 analog inputs for:

Switch

Thermostat

Dry contact (window contact, push button, ...)

Dry contact (window contact, push button, ...)

Temperature sensor (remote sensor, average, 2nd zone, ...)

Temperature sensor (remote sensor, average, 2nd zone, ...)

Other analog sensor (humidity sensor, light sensor, ...)

Other analog sensor (humidity sensor, light sensor, ...)

Dew point management (ceiling sensor, floor sensor, air sensor)

Dew point management (ceiling sensor, floor sensor, air sensor)

Environmental characteristics

Operating ambient temperature	0°C ~ 40°C
Environmental impact	2
Protection	(IP20)
Operating ambient humidity (non-condensing)	10% ~ 90%

Switch :

The plate and the glass are sold separately for more simplicity and flexibility in design.

4 plate references are available to meet all your expectations.

The **D-KP-85-KNX** switch is configurable with 1, 2, 4, and 6 commands. It is also available with a temperature and humidity sensor (D-KP-85-TH-KNX).

The **D-KP-125-KNX** version is configurable with 1, 2, 3, 4, 5, 6, and 9 commands. This product is also available with a temperature and humidity sensor (D-KP-125-TH-KNX).

Thermostat :

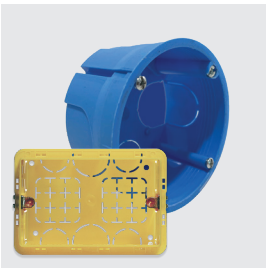

All our thermostats come with a temperature and humidity sensor. They are configurable in several versions:

- 2 dimensions: 85*85 and 85*125
- 3 colors: white, black and sand

The surface, made of tempered glass, is resistant and easy to clean.

The hanging system meets professional standards.

If using round boxes D60 or 502, you can choose vertical or horizontal mounting even after installation. All models are compatible with these round boxes. KP-125-xx models (125*85 mm) also work with box 503.
