

Centralized management of your **smart home**

DOVIT

Give your home a brain.

Control your smart home from a **simple and user-friendly application**

Custom-designed on the very needs and expectations of the end user, DO.App is a graphical interface for managing all the technology present in a house or building, regardless of the brand or protocols used.

Imagine being able to control, from a single interface, not only your lighting, air conditioning and heating, but also your alarm system and connected audio systems, all while allowing them to work together.

The intuitive dashboard of DO.App is designed so that your entire smart home is at your fingertips as soon as you activate the application.

DO.App works even without the cloud and connects directly to your home's integration server. Access your interface locally from your smart home screen or remotely from your mobile devices.

Available on iOS and Android

AppStore

GooglePlay

Accessible from your screen and your other mobile devices, **DO.App centralizes your home automation system**

Easy-to-customize, user-friendly interface

Available on Android, iOS, Microsoft and Linux

Accessible from your DO.Touch touchscreen

Energy data recording and analysis

8 language settings

Unique user profile for each family member

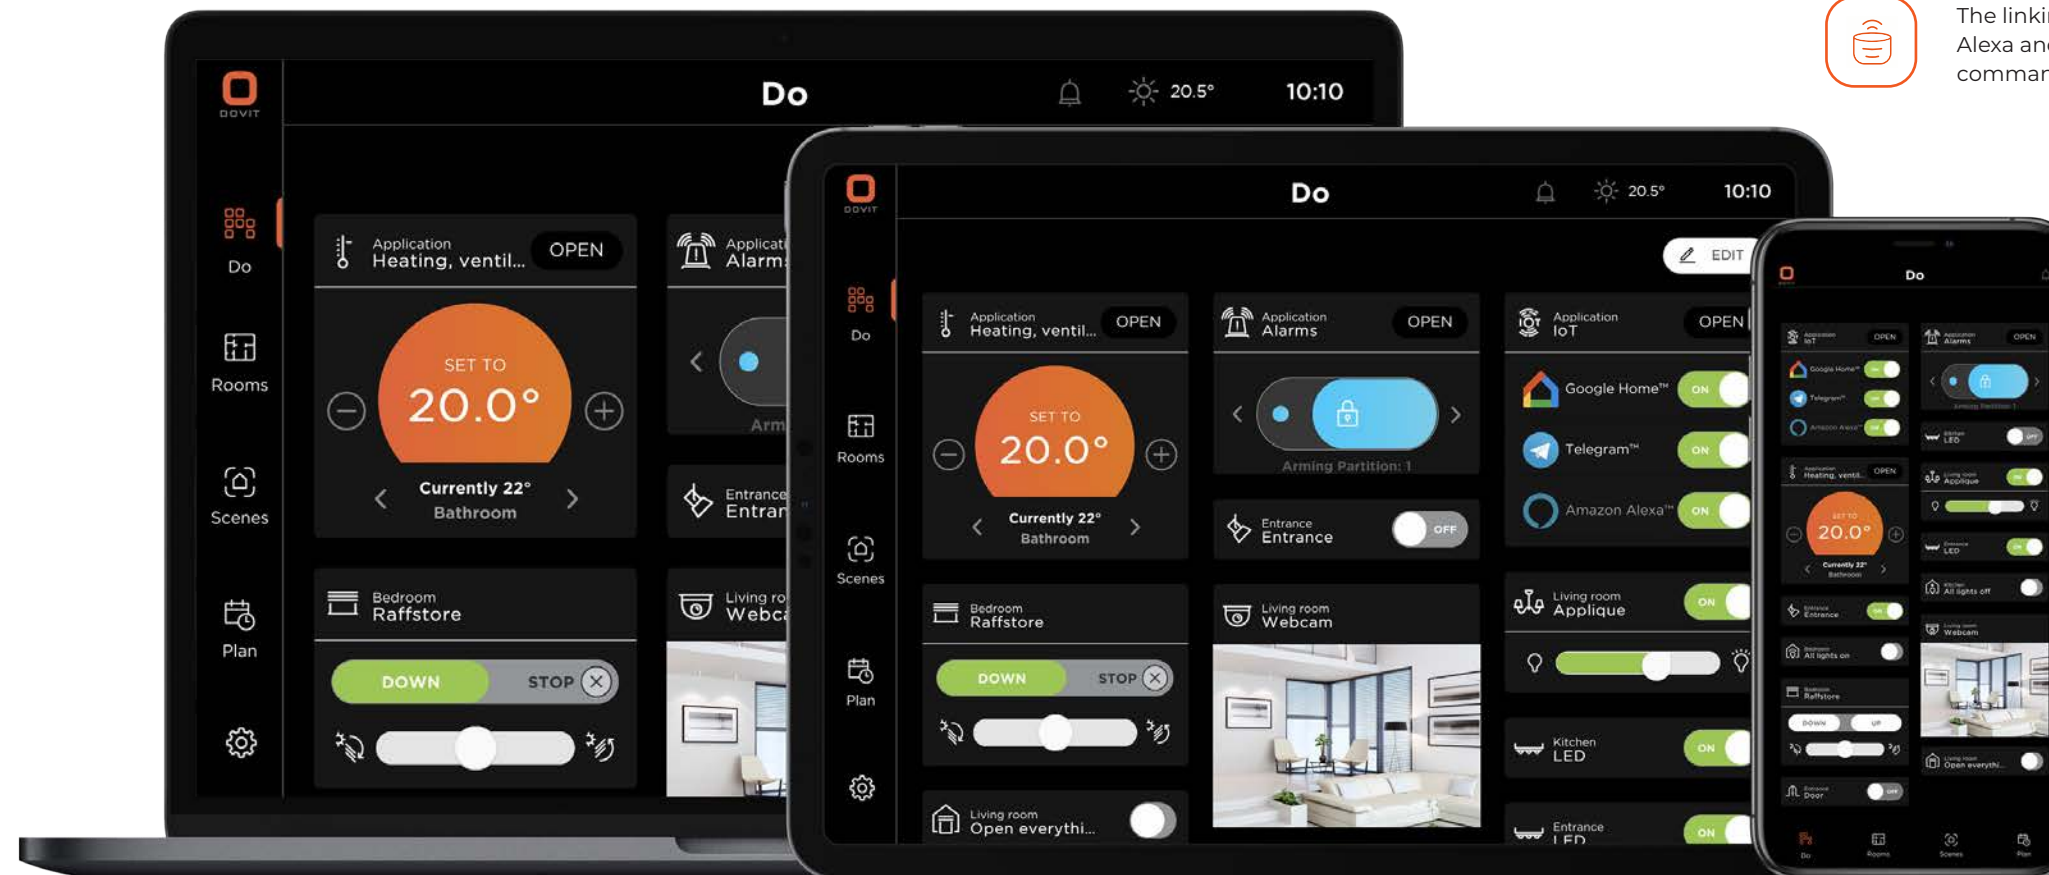

Quick creation and activation of scenarios for all rooms

Scheduling of all functions and scenarios integrated into your system

The linking of each scenario with Alexa and Google Home voice commands

The most user-friendly home automation app

Enjoy a unique and simplified user experience with the supervision of all functions of your installation: lighting, thermoregulation, motorization, alarms, video surveillance, multimedia, video intercoms, photovoltaic systems, energy and utility meters, access and entry control, etc.

An interface available in 3 color versions

For your comfort and according to your tastes, personalize the interface of your application with 3 color themes:

Dark, silverlight and light

Independent time and calendar-based programming for each function of your smart home

An app available everywhere, all the time

Don't miss anything happening at your home with status notifications on your application!

Create your own **customized scenarios**

Quickly accessible scenes based on predefined schedules

The “Scenario” feature of the application allows you to control multiple devices at the same time.

Create and launch scenarios directly from your application.

Create custom routines for each of your rooms and for each family member. Trigger with a single click or schedule all your home automation scenarios according to defined hours and days.

Add your favorite routines directly to the home screen of your application for quick access.

A sleek, simple, and compatible application like our solution!

Maximum security, information confidentiality, immediate and bidirectional management (command and feedback): a touch is enough to connect to the installation (no need for cloud).

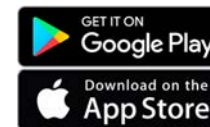

Simultaneous multi-user connection and management via a TCP/IP network.

Compatibility with Dovit touchscreens, smart TVs, smartphones, and tablets (iOS, Android), as well as computers running Windows, Mac OS and Linux.

Free download from the official platforms of reference (AppStore and Google Play).

Desktop Application

DO.App is available as a desktop application for all desktop systems: Mac OS, Windows, and Linux.

The graphical interface DO.App via the desktop application has all the features, including bidirectionality and push notifications. It is the ideal interface for supervision from a workstation. This solution is also suitable for the centralized management of a hotel lobby or the concierge of a residence block, and anywhere it is necessary to unify and centralize (on one or more stations) the management of all technical installations.

DO.App provides comprehensive energy consumption monitoring to optimize the energy performance of your space.

Thanks to detailed reports, you can track in real-time the impact of your actions on your energy consumption. This visibility enables you to make informed decisions to reduce your carbon footprint, make savings and all while maintaining an optimal level of comfort.

A fully customizable home screen **according to the user's preferences**

Design your own dashboards with the most frequently used devices and functions. With drag and drop, rearrange all the widgets in the application and place them where you want!

Create up to 32 user profiles that are automatically synchronized across all your devices.

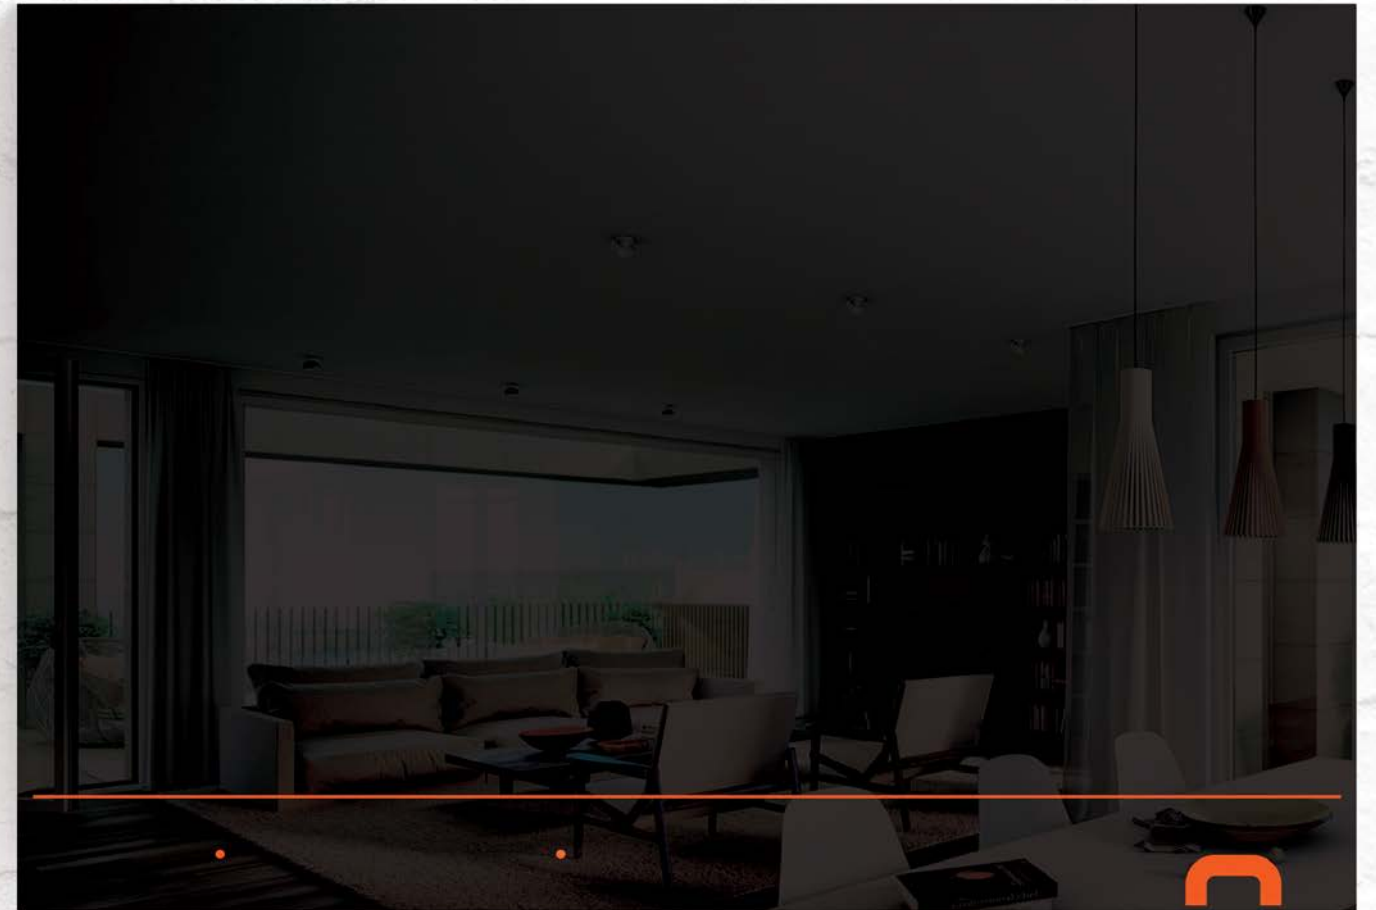

DO.Touch, the sophisticated touchscreen to control your smart home

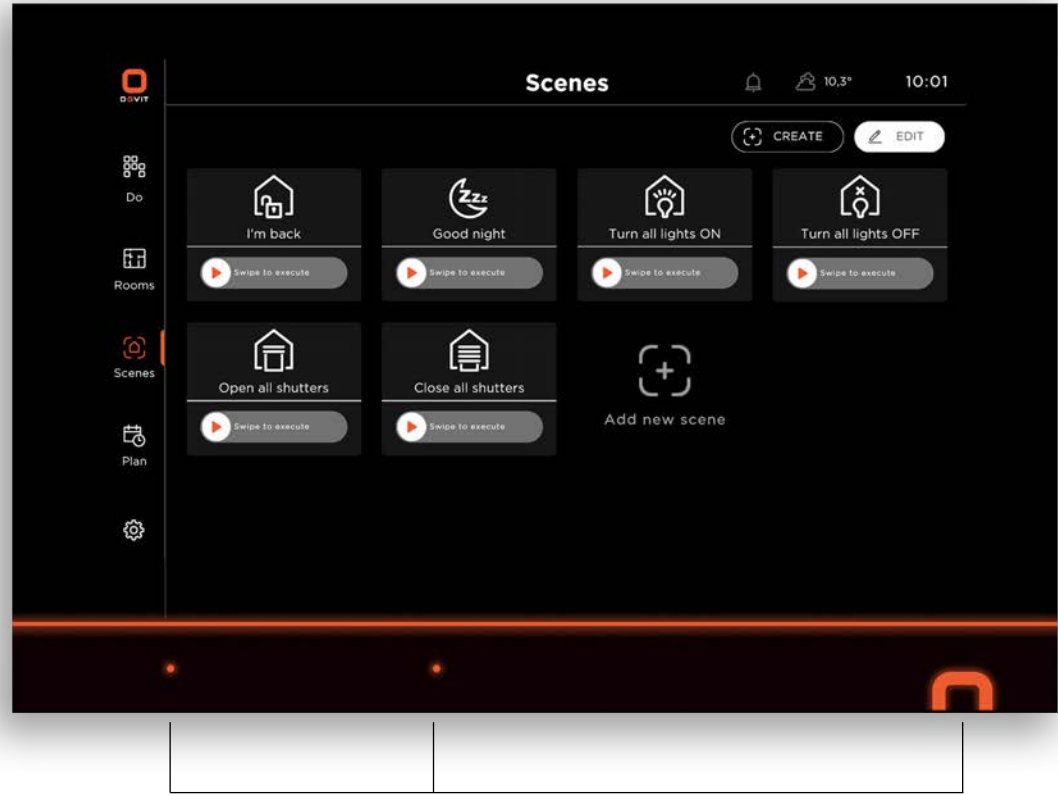

Command and navigate your smart home through the wall-mounted touchscreen, DO.Touch. Its intuitive interface provides a unique and customizable user experience.

Touch, command, control.

Enhance your quality of life with the innovative DO.Touch screens! These connected touchscreens are designed to establish a new connection with your home. The design and quality of your smart home are among our top priorities. DO.Touch screens are crafted to complement various interior styles.

Our range of DO.Touch screens ranges from 4" to 11.6", offering a wide selection of finishes and colors. Whether in black, white, or with a mirrored finish, there is undoubtedly one that suits your home and its interior!

Many RGB color options to customize the LED strip

3 customizable touch keys (which can be assigned to scenarios or quick access to favorite sections of the interface)
