Radar Motion Sensor Light Bulb

DC12-36V LED Bulb

Model #1:

Model #2:

One Bulb with More Applications

Specifications: AC220-240V, 14W, 1500lm, Ra>80, 6500K, E27/B22.

Feature: 360-degree wide detection angle and maximum detection radius up to 5m (ceiling light) or maximum detection distance 7m (wall light).

Model #1: On/Off with Photocell Light Control. At night, the bulb lights up to 100% (14W) when motion is detected, and turns off within 20 seconds automatically when people leave or stop motion; in the daytime, the bulb doesn't work.

Model #2: Always On with 2-step Dimming (100% / 15%). At any time, the bulb lights up to 100% (14W) when motion is detected, and dims to 2W within 20 seconds automatically when people leave or stop motion.

Advantage:

*Universal Input voltage DC12 124 /36V.

*Perfect use for RV, solar panel project, boat garden landscape or off-grid lighting.

Eye Care Bulb

EYE-Care, I care

Flicker free & no blue light hazard

Blue Light Hazard

The fact that blue light penetrates all the way to the retina (the inner lining of the back of the eye) is important, because laboratory studies have shown that too much exposure to blue light can damage light-sensitive cells in the retina. This causes changes that resemble those of macular degeneration, which can lead to permanent vision loss.

Table 1 Description of risk group	
Risk Group	Description
Group 0 RG0	Exempt No photobiological hazard
Group 1 RG1	Low risk No photobiological hazard under normal behavioral limitations
Group 2 RG2	Moderate Risk Dose not pose a hazard due to aversion response to bright light or thermal discomfort
Group 3 RG3	High Risk Hazardous even for momentary exposure

Table 2 Exposure time limits (in seconds) for risk group classification			
Hazard	Exposure Time Limit(s)		
	RG0	RG1	RG2
Blue Light Radiance	10,000	100	0.25

Flicker Hazard

Studies has revealed that prolonged exposure to flicker emitted by LED lights can lead to various health problems including eye strain, headaches, blurred vision, fatigue, apparent slowing or stopping of motion, reduced visual task performance and in some cases, neurological problems.
