# Color-Coded Patch Panel

Experience efficient network management with Surtec's Color-Coded Patch Panels. Swiftly adjust port assignments for connected devices. Designed for industry-standard 19-inch racks and cabinets, they offer seamless integration into your system.

Customize your panels using snap-in color bezels, which are available in several hues. With this panel, the 24 RJ ports are divided into 4 color-coded banks of 6 ports – red, blue, green, and yellow – for clear identification. Seamlessly interchange bezels with the snap-in design, simplifying the process and achieving a smooth and attractive panel front.

Optimize cable management and decrease costs with the compact folding management system, which allows savings in packaging materials, shipping and storage. Elevate your network setup to a new level of efficiency and aesthetics.

Color Coded Bezels

Part Number	2022K-FM24I-01
Description	1RU 24-Port Shielded Flat Panel Hinged Cable Management
Dimensions	482.6mm (W) x 43.9mm (H)

FEATURES

- Colored Bezels with easy installation – no tools required
