From radio network planning to the implementation of your use case

ONE-STOP-SHOP

We listen to you and execute your project thoroughly - nothing is done half-heartedly. Our services cover everything from the sensor to the LoRa network server to the application, providing a complete solution for your needs.

We offer professional advice, collaborate with you on radio network planning, measure optimal gateway locations, and provide essential hardware and software for your LPWAN network server solution tailored for your specific application.

Additionally, installation, commissioning and employee training are included in our service portfolio.

We remain unbiased towards manufacturers and are dedicated to delivering the ideal solution for your needs.

Because we connect your IoT!

Smart networking with LPWAN

... offers a range of possibilities and applications for sensor networks.

Whether you need to measure CO_2 values or monitor environmental factors, implement smart energy management and metering or find a solution to a specific challenge, LPWAN provides a versatile and effective solution.

Solution for mandatory remote heat meter readout? Or planning smart parking or intelligent street lighting?

Whatever the use case, contact us now for expert advice!

We connect your IoT

LoRaWAN® networks: planning, setting up and operate

your wireless competence
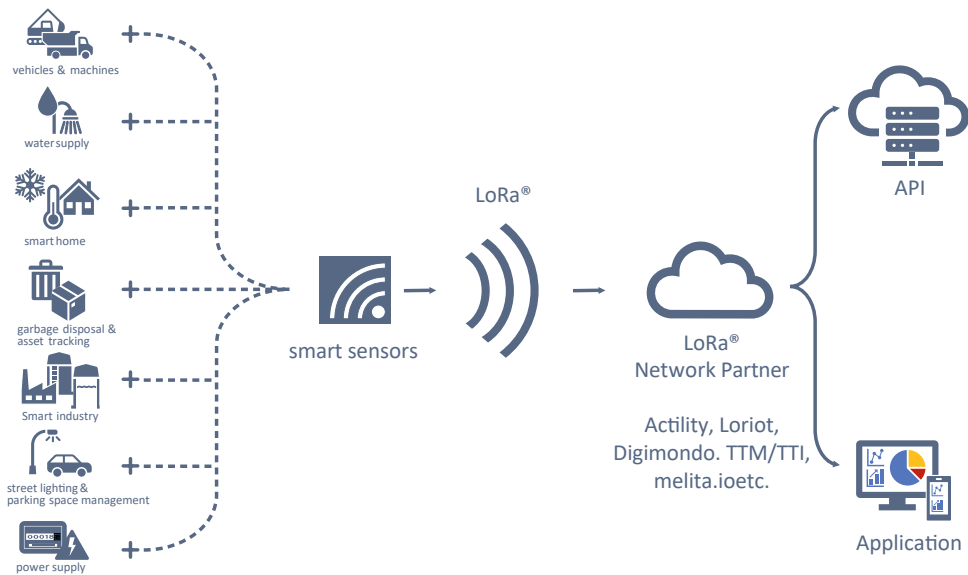

CONNECTED WITH LORAWAN

SAVE TIME & MONEY

FULL SERVICE PROVIDER

LoRaWAN® is a cost-effective radio technology that enables wireless networking of processes within a supply area.

With our support, you can kickstart your entry into the Internet of Things (IoT) and digitise your business processes or those of your customers.

- Optimised and transparent processes enhance efficiency, ensure targeted
- Deployment of personnel resources, save time
- Promote environmental sustainability

LoRaWAN® is the IoT connectivity platform for many smart applications:

- Smart City
- Smart Energy
- Smart Industry
- Smart Utilities
- Smart Building
- Smart Agriculture
- Smart Transport & Logistics

We support you in the concept development, planning, project planning and construction as well as operation of your IoT-LPWAN solution.

From sensor to application:

- Everything from a single source
- We provide network planning, site selection, and commissioning services, including LoRaWAN® sensors & gateways and the LoRaWAN® network server.
- We also offer set-up, commissioning, programming, and employee training.
- Experience across a broad range of projects in diverse sectors
- Strong international partners
- After sales support
