The games area is where the magic happens. It takes a careful balance of lighting to make the event enjoyable for everyone. Too much light can disturb the players, and too little will make it hard for spectators to see.

Omnitech LED floodlighting lets you design the right illumination levels for the occasion, pleasing fans both at home and in the venue. Flicker-free floodlights make it possible for cameras to capture the action for slow-motion replays. Availability of numerous optics enables the system to be configured in accordance to respective stadium geometry and design.
