

HEAVN

Human Centric Lighting

Dynamic lighting -
Inspired by nature

Our mission

Well-being and productivity through Human Centric Lighting

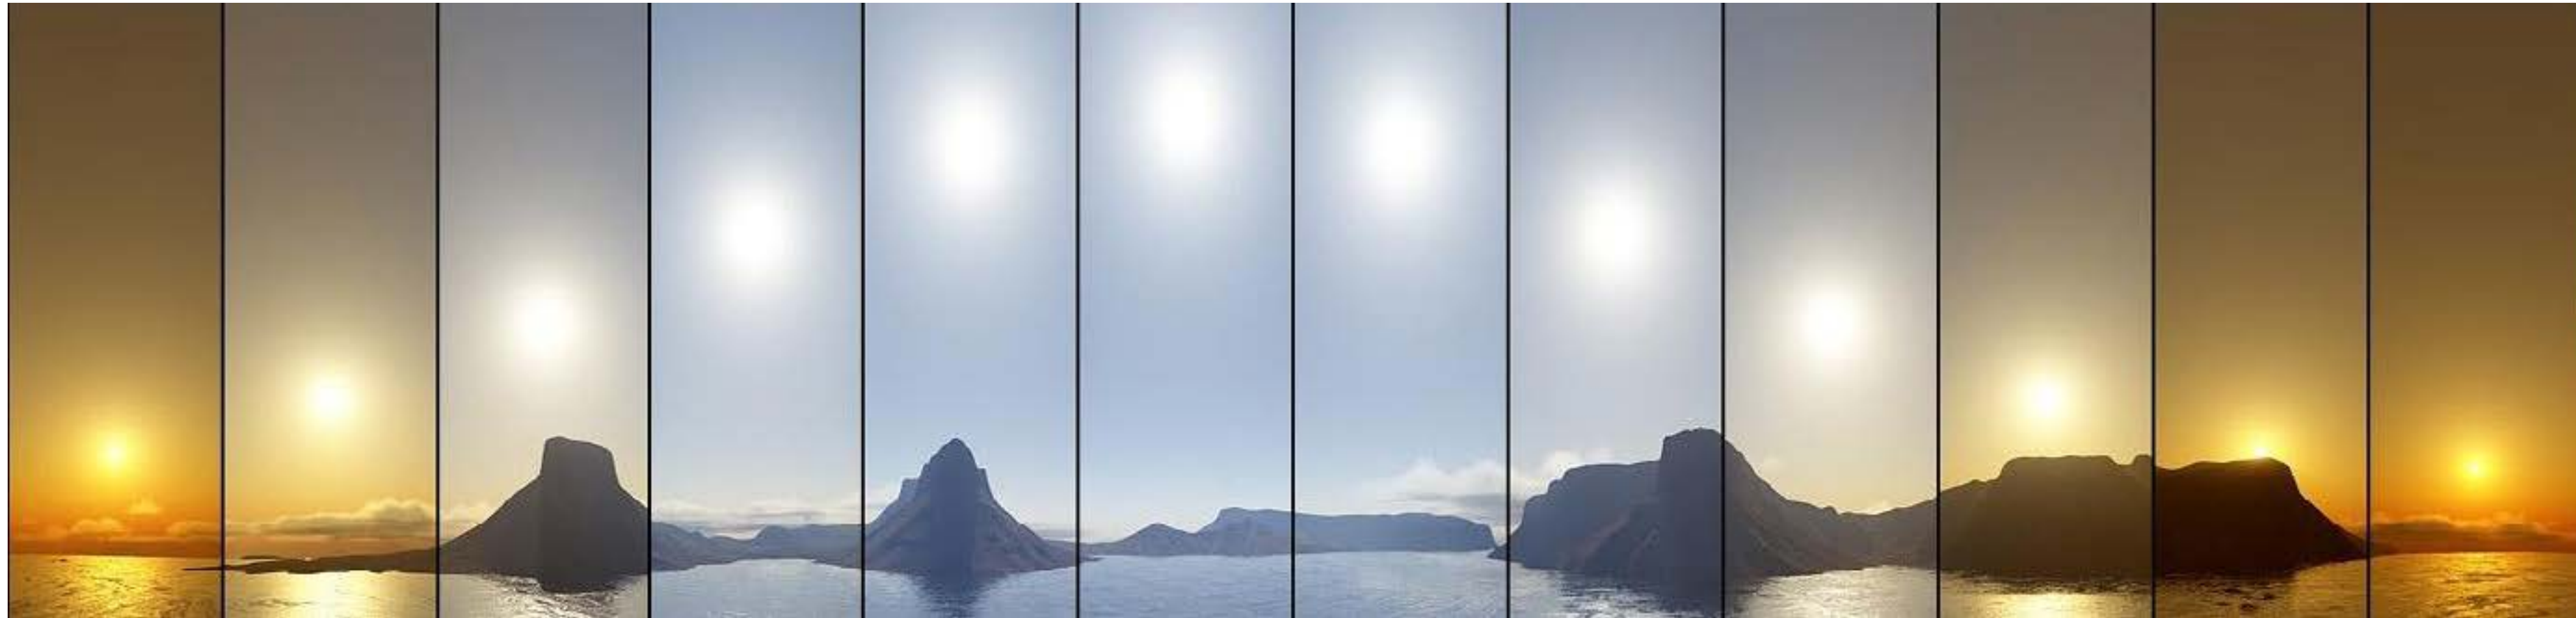

HEAVN's lighting solutions are based on the principles of Human Centric Lighting. These put the user at the center of attention. Using intelligent and dynamic controls, HEAVN products accompany the user throughout the day and empower them to live a more productive and healthy life.

Premium quality, sustainability and Made in Germany

Local production of high-quality components leads to first-class products. This is not only reflected in the choice of materials and surface properties, but also in our proprietary electronics. This way we achieve a light quality which is convincing in every respect, delivering full performance even after a long period of time.

HEAVN USP's

Improved productivity

Light acts as a timer for the internal clock and helps to break down the sleep hormone melatonin during the day. Thus, it increases your performance in a natural way.

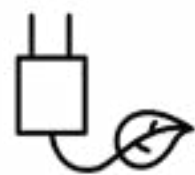

Well-being

The right light at the right time helps you regain your inner balance. This has good effects on the sleep-wake phase and results in better overall health.

Smart & personalised

Turn night into day, day into night or live a natural rhythm. With our smartphone app you can adjust the light to your individual preferences. Presence detection and other environmental sensors let you work seamlessly in the best possible setting.

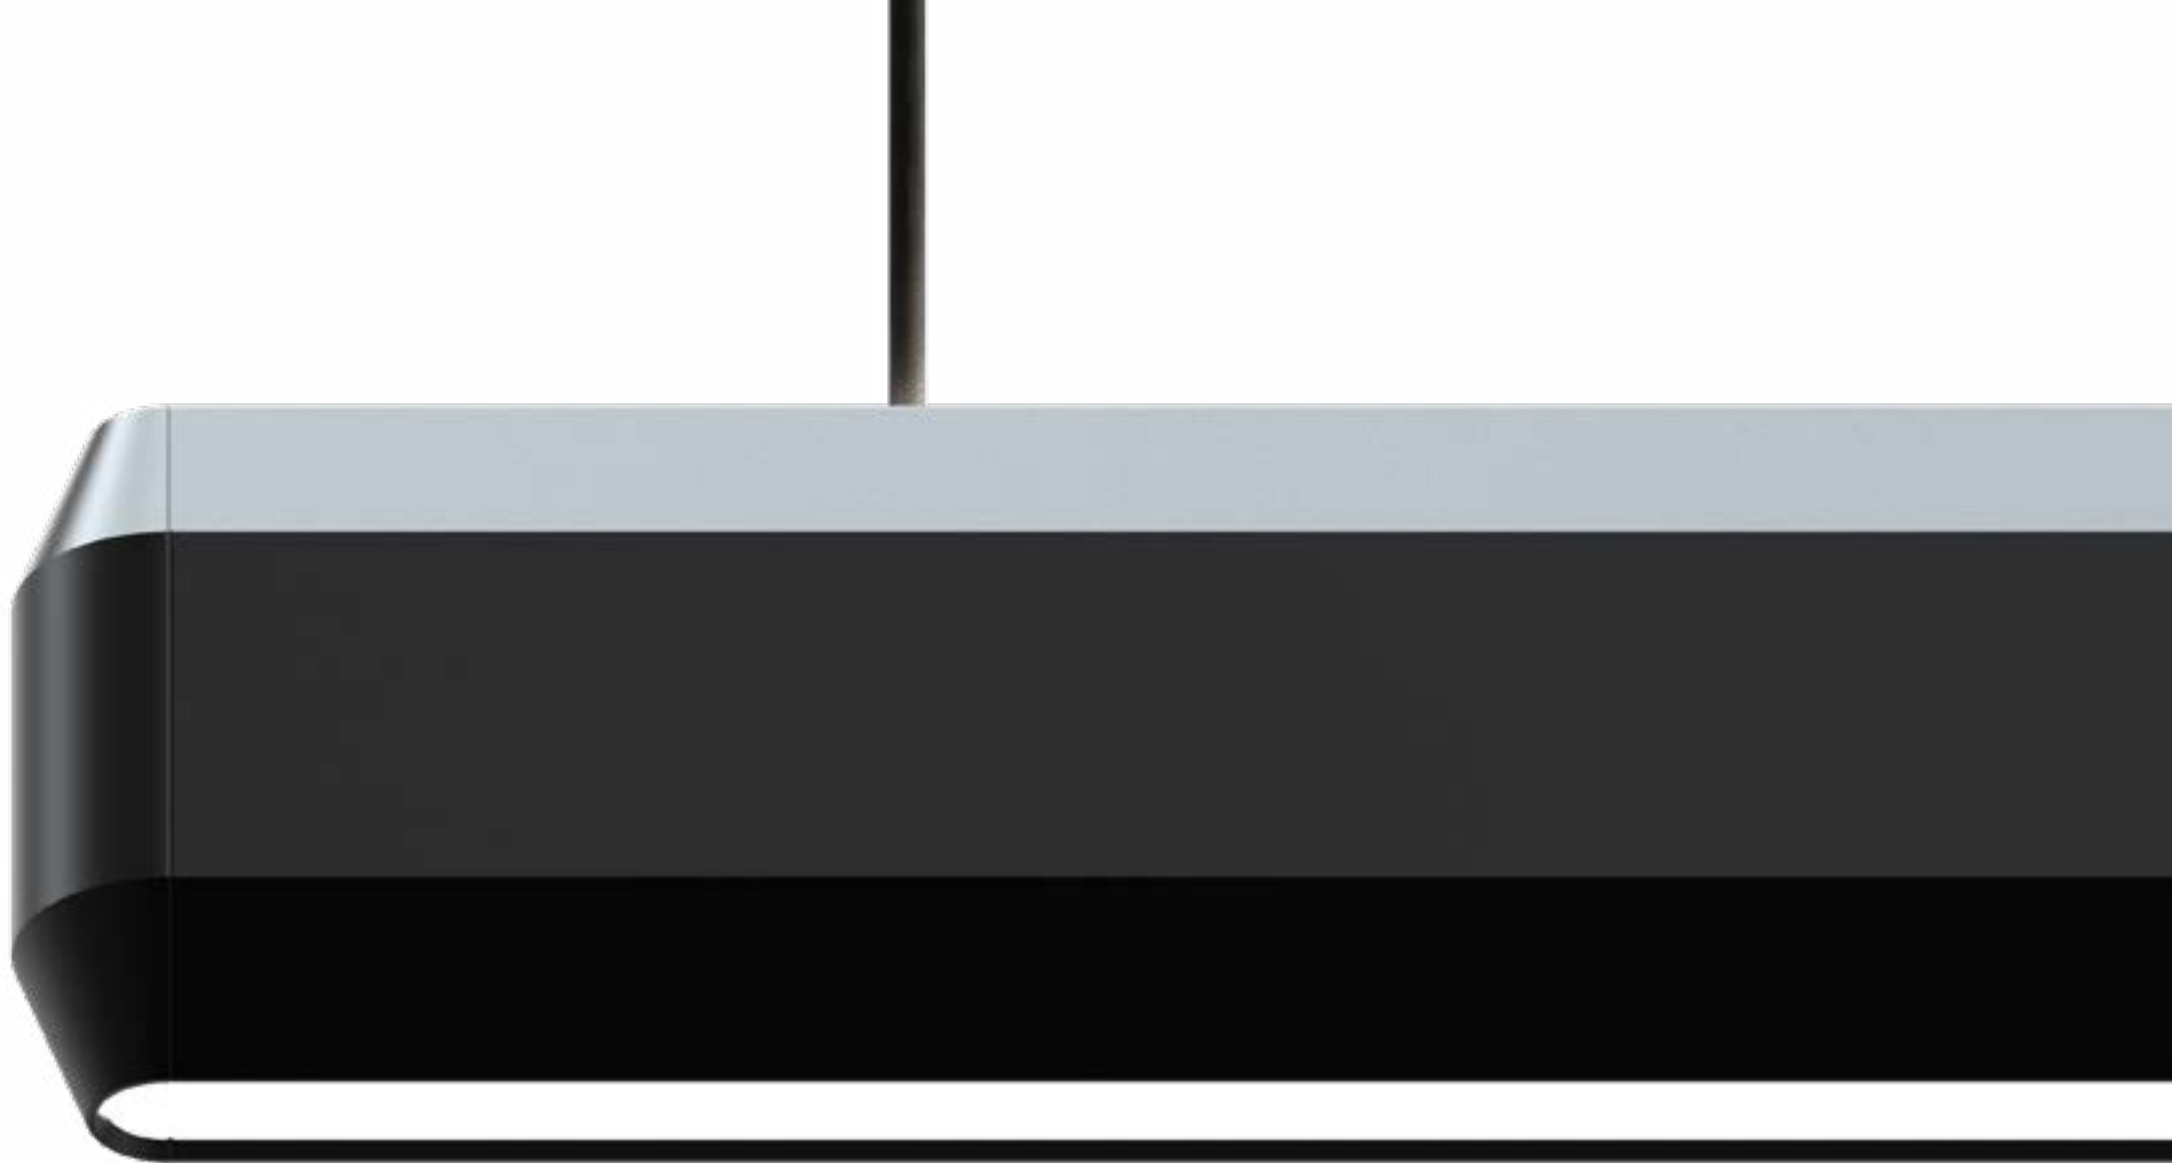

Energy efficient

Targeted illumination of relevant areas, highly efficient LEDs, local production, repairability and easy installation are part of our identity.

Portfolio

HEAVN One

The HEAVN One Series II serves as a desk lamp, ceiling spotlight and activating daylight lamp - all in one product.

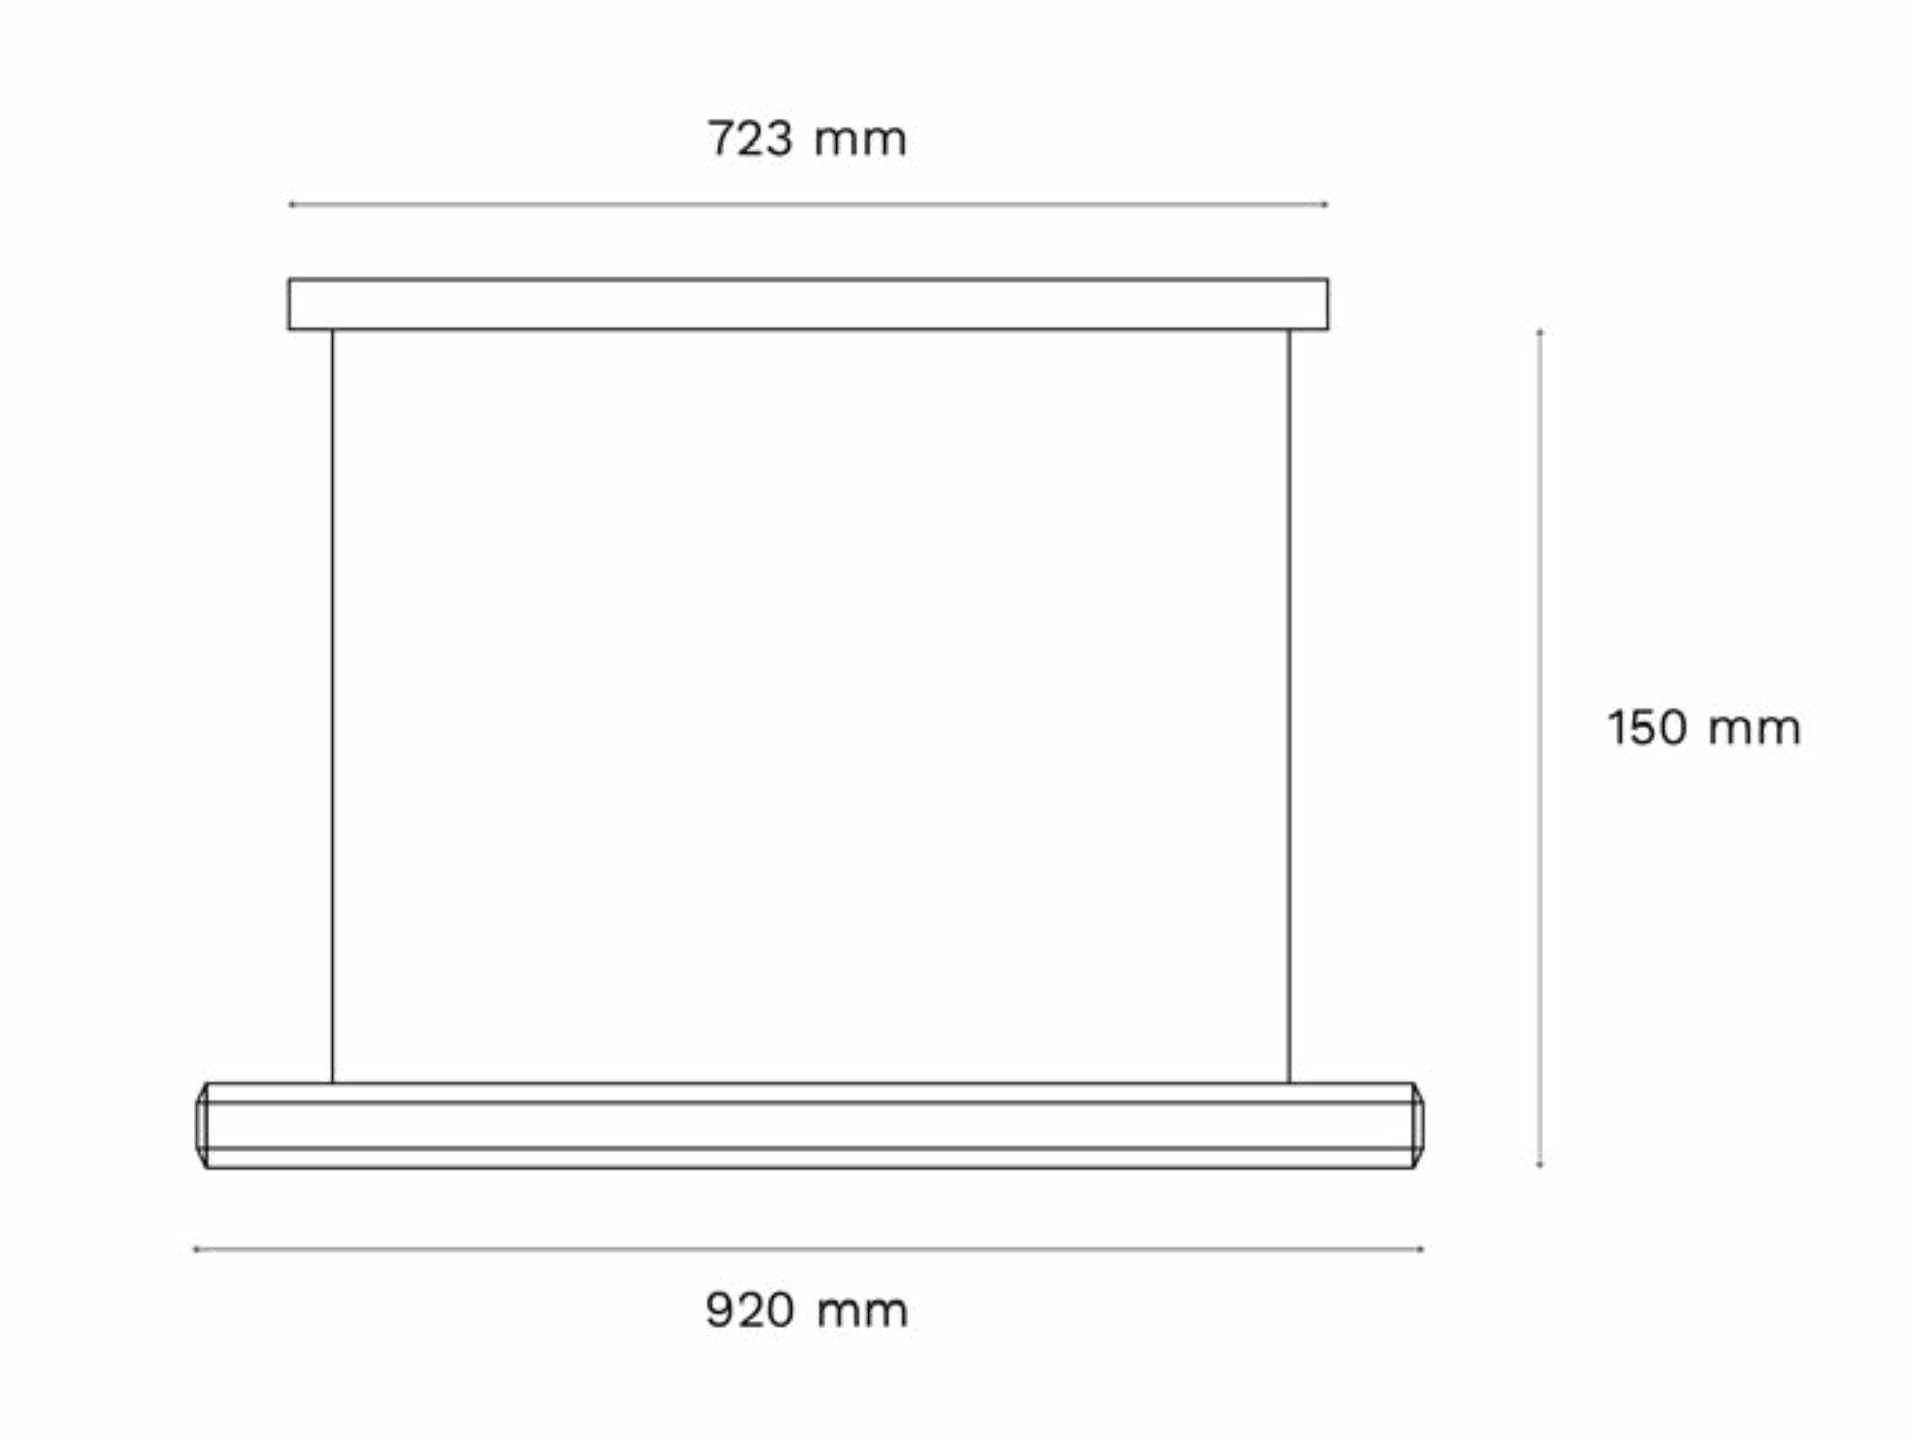

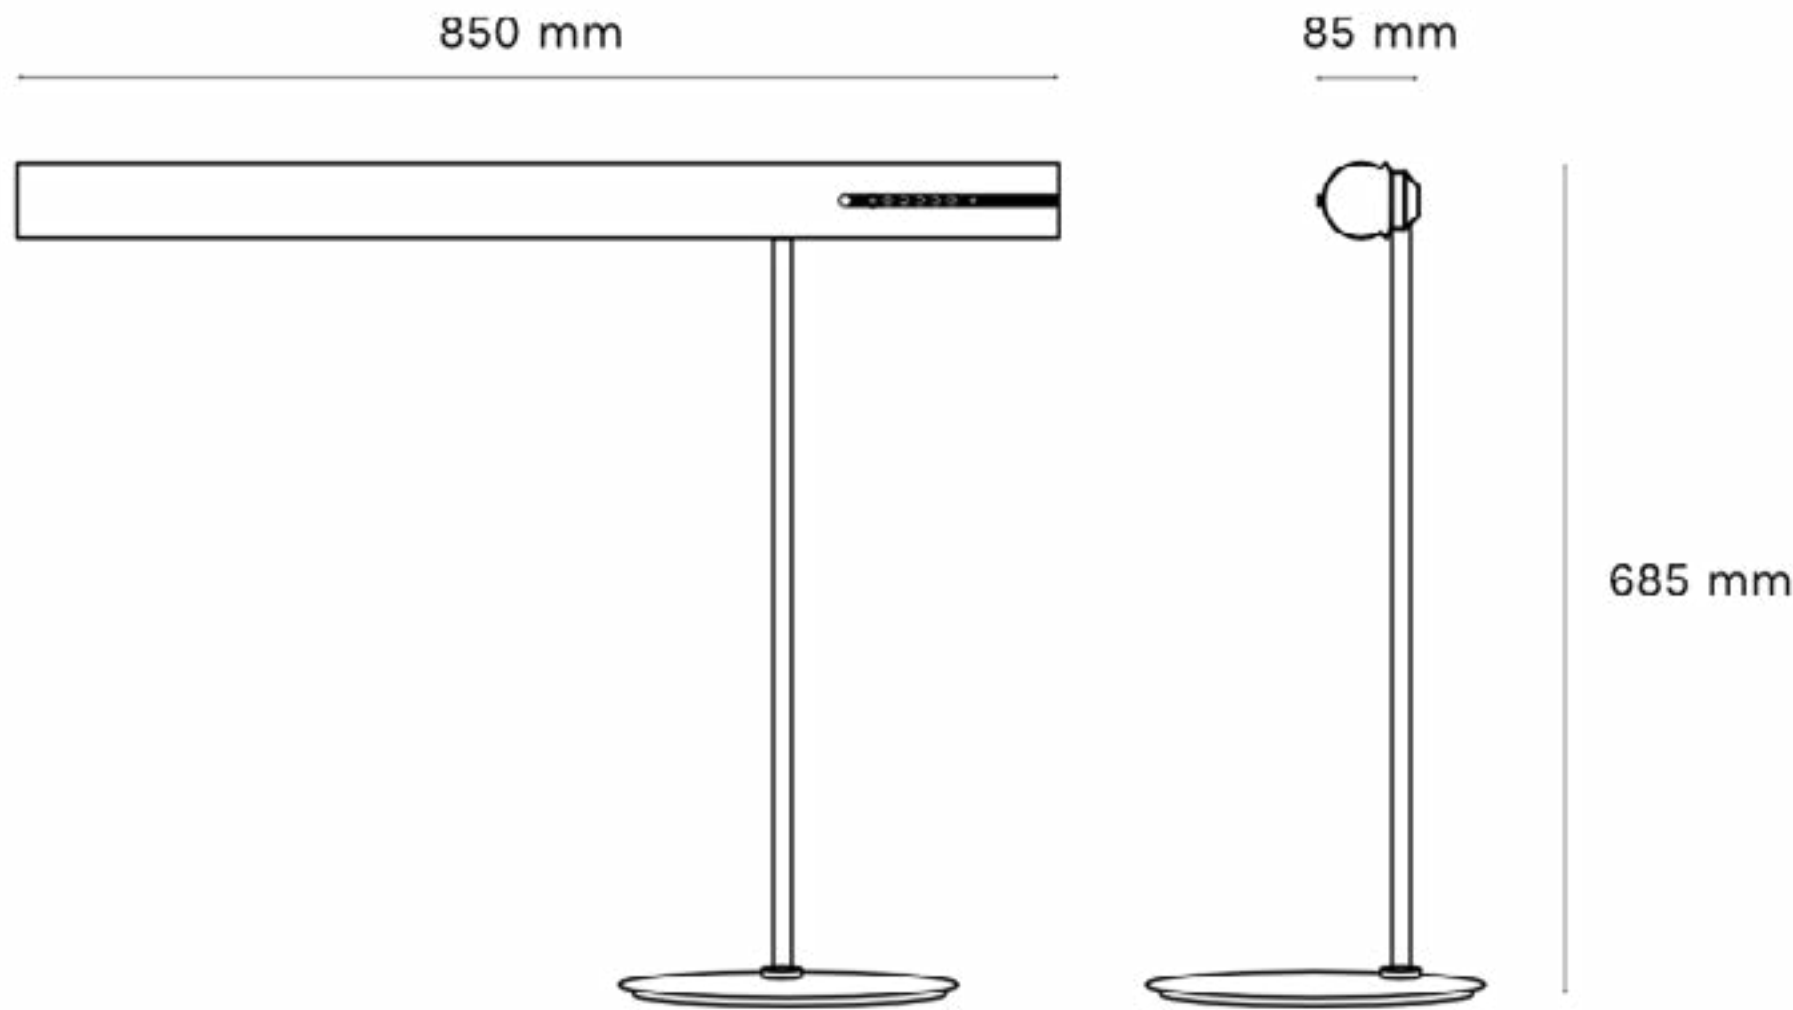

HEAVN Pure

We added another highlight to the HEAVN product portfolio. This suspended luminaire with Human Centric Lighting function is ideal for open-plan offices, co-working spaces and rooms in which a ceiling installation is desired.

Data sheet

HEAVN One

Light properties	Technical Properties	Electrical Properties	Features
Total luminous flux: 6.400 lumen	Materials: Stainless Steel, Aluminium, PMMA, HPL	Max. power consumption: 60W	Sensors: Air purity, motion / proximity, ambient light
Color temperature: (CCT) 2.000 K ... 6.500 K	Flexibility: 360° rotation in every direction	Rated voltage: 24V (DC) Power supply: 110-220V (AC)	Controls: Touch buttons HEAVN smartphone app
Color Rendering Index (CRI): > 90	Weight: 5.8 kg	Energy efficiency level: A - A++	Variables: Light color, direction and intensity

HEAVN Pure

Light properties	Technical Properties	Electrical Properties	Features
Total luminous flux: 5.000 lumen	Materials: Stainless Steel, Aluminium, PMMA, HPL	Max. power consumption: 60W	Sensors: Air purity, motion / proximity, ambient light
Color temperature: (CCT) 2.700 K ... 5.500 K or 2.200 K ... 4.000 K	Installation: 360° rotation in every direction	Rated voltage: 24V (DC) Power supply: 110-220V (AC)	Controls: Gesture contol HEAVN smartphone app
Color Rendering Index (CRI): > 90	Weight: Main body: 2 kg Ceiling rose: 1.5 kg	Energy efficiency level: A - A++	Variables: Light color, direction and intensity

Thank you.
