

Turn on the lights in the living room.

# Control everything in the house with your voice

Meet Pairot,  
the bridge for voice control

## Pairot summary

### Voice control

With Pairot you can make the KNX installation of every home available for Apple HomeKit, Amazon Alexa and Google Assistant. Pairot acts as a bridge and allows you to use these assistants to control your home or check the current status. This allows easy voice commands to control for instance the lights or thermostat.

### Ease of installation

Pairot has a built-in KNX tunnel connection, allowing Pairot to be used to perform the KNX programming. With the Pairot app you can commission a Pairot bridge in minutes and pair it with the desired voice assistants. Pairot is provided through certified KNX professionals.
