

Automate and control everything with one app

The controller of xxter makes life easier

xxter summary

The xxter controller is the central module in your house or building, enabling you to automate and operate all (KNX) functions with the free xxter app on your tablet or smartphone.

Camera & intercom

With the xxter controller you can seamlessly integrate your camera systems and IP intercom.

xxter when you are not at home

You can safely access your installation from outside, thanks to the secured solutions xxter provides.

Mobile control & My xxter

With the free xxter app you can control a home or building installation easily. The 'My xxter' environment allows you to create your own visualization, exactly to your liking.
