LED FLOODLIGHT

for pedestrian crossings

This floodlight is designed for illumination of pedestrian crossings. The visor protects the drivers from dazzling. The 60° beam angle is providing illumination on the crossings only.

STAR

STAR is a new LED street light from LIGHTEX. It combines functional design and efficient characteristics.

HYBRID LIGHTING

EL QUADRO

Hybrid fixtures charge with sun light all day and then use it at night. When the battery drops to 20% they automatically switch to electricity. If they charge with electric power only, hybrid fixtures work on 65% of their capacity. During sun hours they charge up to 100% again.
