KATANA

KATANA is an innovative low-voltage track system from LIGHTEX that lets you lit up the charm of every room!

KATANA is the perfect blend of style and functionality.

Track system **KATANA** is absolutely safe for pets and humans because there are no exposed live parts unlike the magnetic track systems.

With **KATANA** the electricity flows through an isolated cable which is attached into the track lines.

The huge variety of LED modules gives you the chance to set free your creativity and illuminate any space with customized design.

Track systems

IMAGINARIUM is another innovative low-voltage track system from LIGHTEX. The big difference with this one is that **IMAGINARIUM** is a flexible track system because the track lines are replaced by supple cables.

The LED luminaires are attached directly to the cable which means that you can completely unleash your imagination and create any form and shape.

The track cables are available in 7 different colors in order to match the design of any room, restaurant or store.

The possibilities with **IMAGINARIUM** are endless but we have even upgraded that with special module which ensures a connection between the systems: **KATANA** and **IMAGINARIUM** in order to create a symbiosis between the functionalities of these two systems.

PLUS

12W

20W

30W

Track lights **PLUS** are single-phased LED luminaires with elegant design and added functionality.

Track lights **PLUS** are adjustable via a remote control. The brightness and the color temperature can be changed in order to match the individual preferences. **PLUS** track lights can also be combined in groups.

These track lights are applicable not only for home lighting but also for stores, galleries, hotels and restaurants because only one remote control can manage up to 500 LED lights **PLUS** in a room.
