ResiTHERM® 16 makes the difference

NEW

Made in Germany

Heavy-duty fixings on
insulated façades

approved & driving rain-tight

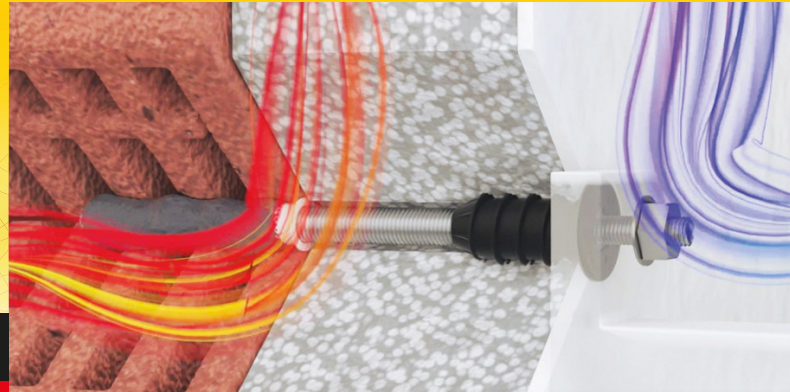

- Unique advantages
- Fast & easy mounting
- Awnings & other applications
- Content of the sets

www.celofixings.com/content/353-resitherm-16-12-makes-the-difference

ResiTHERM® 16

Fast and thermally separated distance mounting

1. Create drill hole -drill hole depth varies depending on insulation thickness and substrate
2. Cut **ResiTHERM® 16** to length
3. Fill the drill hole with injection mortar (in case of perforated brick use the plastic sleeve SH)
4. Screw in **ResiTHERM® 16** until sealing is pressed against the plaster, the black separating module automatically drills itself in
5. DONE! Let the injection mortar cure and mount the add-on part e.g. awning holder

Facade and
window fastening
for all trades

MFR
the universal
multifunction
frame plug

FB SSKS
ideal for metal
construction

SB TX
for flush
finishing
in wood
