Smart Lighting

Care for the world with light

ROLEDs

Smart Lighting

ROLEDs looks to the whole world, based on China, with an international vision and standard, to create China's high-quality lighting. Over the years we have been committed to the research and innovation of international cutting-edge technology, participate in the development of national and industry standards, leading and setting benchmarks with innovation and quality of the industry. We focus on the real needs of users requests continuously, starting from product application strategies, project pain points to difficulties, and provide total solutions for many large-scale, landmark projects at home and abroad.

Architectural lighting with deep technical background, for high-end hotels and residential, commercial complexes, buildings, landscapes and other spaces to provide sustainable lighting solutions and technology applications.

The “ArtyMedia” series focuses on outdoor stage lighting, relying on the cutting-edge product development technology, digital multimedia integrated control and other technologies to provide professional landscape lighting, cultural tourism town and scenic spot, interactive projection area, live performance and a series of lighting application as a total solutions.

ROLEDs

> THE HEAD QUARTERS OF ROLEDs

Hangzhou Roleds Technology Co., Ltd. founded in 2004 with its core on urban intelligent lighting is global intelligent IOT solution provider. Over the years, we have great recognition and reputation at home and broad through the innovative technology, first-class smart products and high-quality services. Roleds products have served hundreds of customers around the world.

ROLEDs stands for the intelligent city SAAS ecological platform, based on the needs of smart poles, smart urban lights, smart multimedia, smart public lights, etc., to create "Integrated full-scenario urban intelligent lighting service platform". 8 branches and 19 technical service centers are established in domestic market to provide efficient professional technical service and an international technical service network covering Asia, Europe, the Middle East, North America, Australia etc.

Roleds has been adhering to the corporate values of "client first, sincerity and trustworthiness, innovation and efficiency, unity and forge ahead", With the mission of "Care for the world with light", we are committed to becoming the world's leading lighting technology company.

> THE HEAD QUARTERS OF ROLEDs

As a national high-tech enterprise, the Quality Center of Roleds obtained the CNAS laboratory certificate. ROLEDs won the national specialization "Little Giant Enterprise" title, Hangzhou unicorn enterprises, science, technology enterprises in Zhejiang province, credit management demonstration enterprise, provincial high and new technology enterprise research and development center, Zhejiang manufacturing certification, patent demonstration enterprise manufacturing, Zhejiang, Hangzhou, Hangzhou gongshu district government quality award, outstanding contribution enterprises, industry track leading enterprises and other prize.

> FUTURE URBAN SHOWROOM

Roleds urban intelligent lighting solution successfully applied in Hangzhou G20 Summit, Qingdao SCO Summit, Beijing APEC, Beijing City Sub-center, Beijing Zhongguancun, Milan World Expo, Shanghai Import Expo, Global Internet Conference, Wuhan Military Games, Chengdu world police&fire games, Foshan city cultural tourism night view enhancement, Chongqing two rivers and four banks, Portland City Hall in the United States, Rome Central Railway Station in Italy, IERA ODOS BRIDGE in Athens, Greece, Stockholm Park in Sweden etc, In 2022, successfully participated in the Beijing Winter Olympic Games and the Hangzhou Asian Games.

COMPANY Profile

Scientific research innovation

Roleds has adhered to the concept of independent innovation over the years, we participated in several national project research and standard-setting. Highly specialized in outdoor-rated lighting solution especially in optical system, color-mixing research, smart control, cloud computing, Internet of Things (IoT) with emerging technologies. As well as 2 strength center, R&D center and smart city research center, offer effective supports in industry-leading digital smart manufacturing production bases. Won many scientific, technological innovation awards and emerging patents worldwide.

COMPANY PROFILE

SCIENTIFIC RESEARCH INNOVATION

► Intellectual Property

1. 30+ Invention patents; 100+ Utility model; 20+ Software copyrights; 100+ design and other patents.
2. Range of intellectual property rights: Product design, luminaire structure, color-mixing algorithms, intelligent controller and system, automation equipment, software technology, embedded IoT gateway, Intelligent power equipment and system, SAAS platform, etc.

► National and Industry standard

1. Drafting of the “Light Environment Assessment Methods”, National unit. -- GB/T12454-2017.
2. Drafting of the “Outdoor Workplace Lighting Equipment Design Standard”, National unit -- GB 50582-2010
3. Drafting of the “Application Technical Requirements of Night Scene LED Lighting”, National unit -- GB/T 39237-2022
4. Drafting of the “Urban LED Street Lighting Technical Requirements”, National unit – GB/T31832
5. Drafting unit of the Industry standard, “Intelligent Internet Commutation Protocol”, “Smart Pole Technical Standard”, “LED outdoor luminaire Technical Stannard”, etc.

FACTORY FUTURE

ROLEDs Intelligent Manufacturing Center

ROLEDs is a digital technology manufacturing enterprise integrating scientific research, industrial design, manufacturing and technical service, focusing on LED lighting, intelligent control, cloud computing, IoT research, providing smart landscape lighting, smart stage lighting, smart public lighting, smart pole as well as a "Integrated full-scenario urban intelligent lighting service platform".

SMART

ROLEDs smart manufacturing Center

Digital technology manufacturing system to create the future of fully-automatic digital factory, according to the customer's requirements of parameters, size and color customization needs, by using of professional data analysis and advanced equipment to provide exclusive customized solutions.

INFORMATIONNIZATION AND DIGITIZATION

Informationnization and digitization

The digital cockpit of the smart manufacturing center will deepen the digital technology into all aspects of production, operation, management and marketing, and realize the digital, networked and smart development of enterprises and industries, and continue to develop.

SPECIALIZATION

CNAS laboratory

CNAS and SGS certified laboratory provides full-process testing and quality control services.

DIGITAL SMART MANUFACTURING

Approval from CNAS

HIGH-TECH ENTERPRISE TECHNOLOGY RESEARCH CENTER

ROLEDS, over 18 years in the industry, has always adhered to the concept of independent innovation and R&D technology as the core of the company's development. The products have won nearly 300 high-tech patents and several product innovation awards. Roleds boasts and leading the LED lighting industry digital intelligent manufacturing bases on CNAS laboratory (China National Accreditation Service), optical system, color-mixing research, smart control, cloud computing, Internet of Things (IoT) with emerging technologies.

Introduction of smart light pole

Smart city

Operation and maintenance platform

Cloud platform is a professional customized full-life cycle management platform for city-level large-scale landscape lighting projects. It adopts the new generation of Internet of Things communication technology for multi-dimensional management, to realize project status visualization, refined lighting management, intelligent operation and maintenance, and strict authorization of system management. The open platform supports access to multi-field applications and multiple forms of interaction, such as laser performance, security monitoring, fountain system, sound system, etc. At the same time, the platform has multiple forms of presentation, such as large screen, APP, VR, and mini program, to meet the use needs of different scenarios. The platform provides open API interface to fully prepare for accessing the city brain to help the construction of smart city. We also launched mobile applications to provide mobile city brain to help the construction of smart city.

ROLODS DIGITAL FUTURE FACTORY

Multifunctional Smart light pole

Introduction of smart light pole

-  WIFI
-  SECURITY / CAMERA
-  SPEAKER
-  CONTROL EQUIPMENT
-  LIGHT MANAGEMENT
-  SENSOR TECHNOLOGY
-  E-MOBILITY
-  PROJECTION
-  DISPLAY
-  USB SUPPLY
-  HELPING

Used in municipal roads, scenic parks, cultural and tourism courtyards and other scenes, Roleds smart light pole series takes "pole" as the main body and flexibly assembles various equipments. Relying on the smart cloud platform, the smart light pole series realizes the functions of real-time monitoring, remote control and timely response through the big data of the Internet of Things. It also realizes the integration of safe cities, beautiful countryside, smart transportation, smart (landscape) parks, smart forests, water and other landscapes. Through smart management and operation, it can reduce the operation and maintenance costs, improve the overall efficiency of urban management, implement the concept of green energy saving and environmental protection, and promote the sustainable development of smart city.

Roleds multi-functional smart light pole follows the design concept of modular and free combination of Matrix series, and develops an innovative T-slot pole to meet the appearance requirements of different application scenarios. As a terminal carrier, T-slot poles with rotatable locking hooks can facilitate the installation and replacement of equipment, which is convenient for the later operation and maintenance of the project. Secondly, through the flexible collocation of components such as main pole, auxiliary pole, light cap and connector, multiple functions are collected into one pole to save the cost of urban construction. The multi-functional smart light pole integrates 5G micro base station, WiFi signal, camera, cell phone charging device, one key call button, LED display and other devices, which can provide road lighting, mobile communication, urban monitoring, traffic management information release and other functions.

Optical technology

► Optical Platform

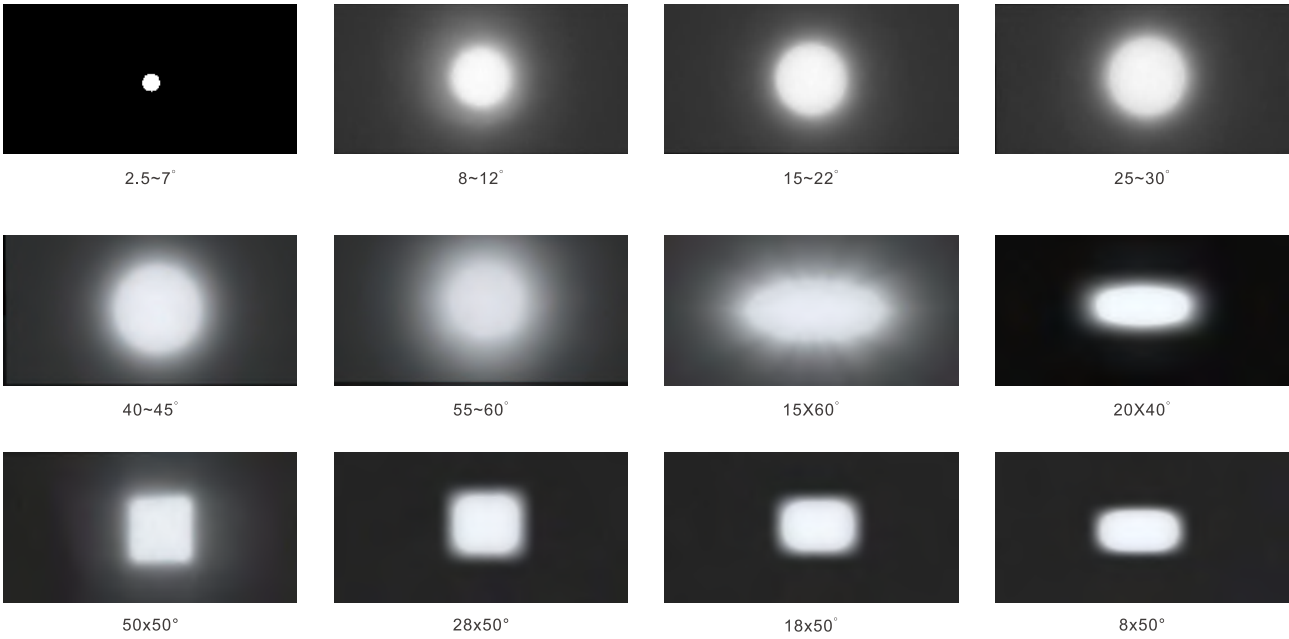

ROLEDs Optical platform including “Integration Optical lens”, “TIR optic”, “TIR with reflector” and “Modularization lens” which can provide variety application of lighting solution for LED luminaire design in architecture lighting, commercial complexes, landscapes and public area.

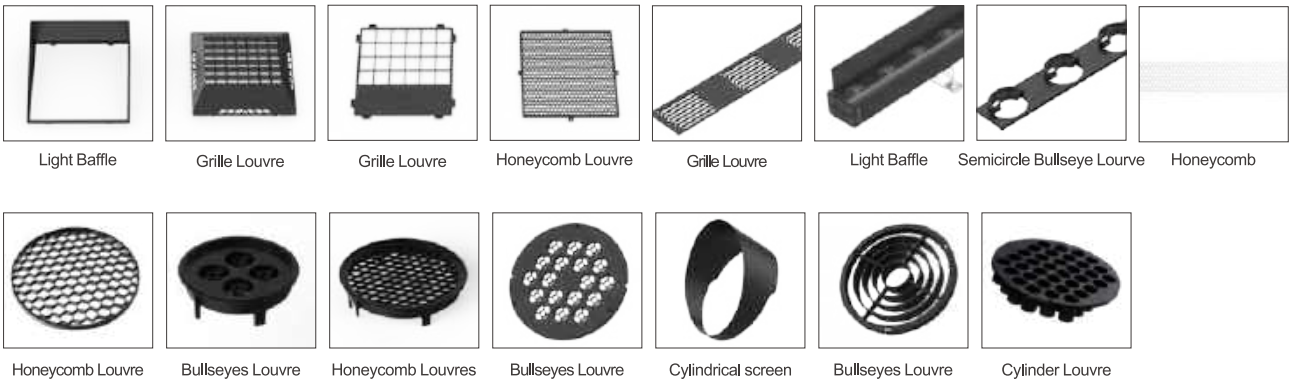

The integration optical lens is a significant improvement technology creating by ROLEDs for LED luminaires with more efficiency light out-put, better than traditional single lens and glass approach, at very beginning. To create the limited size of the LED luminaire, the diameter of each lens can be maximized within the integration optical lens is first priority. This results in more flexible in beam angle control, a higher light utilization rate and better light convergence for the purpose of improving light efficiency. In addition, the ROLEDs integration optical lens is made of optical grade PC material (90% transmission rate at 3mm thickness) which reduces the overall light transmission rate of the lens by about 8% compared to the traditional single PMMA material (93% transmission rate at 3mm thickness) but higher than other LED luminaire with tempered glass (~90% transmission rate at 5mm thickness).

Our 50mm x 50mm square modularization lens provide a good extensibility and applicability to achieve the light performance and uniformity in different lighting requirement through from 4 in 1 to 16 in 1 optical form. Furthermore, besides the symmetry and asymmetric angle, we create rectangle light spot for more creativity and unlimited imagination idea of lighting design. It can be designed in all ROLEDs LED lighting luminaire series.

► Light Spot Effect

► Anti-glare Accessories

► Customized Service

Based on customers' specific requirements of optics, structure, electronic application scenarios and any others, ROLEDs provides customize services as best lighting solution.

COLOR MIXING Technology

With a growing and highly requirement of LED lighting color, ROLEDs realized how important of the mixing color appears for the lighting designer in the night scenario. We specialized in color mixing technology through the innovation of color-mixing algorithm, LED color with specific nm selected, lay-out array experience, and optic emerging technologies to create "ROLEDs Digital Photochromic System" in 2017.

► Color Field Contrast Chart

ROLEDs Digital Photochromic System, LED 5in1 & 7in1 Color Mixing Cutting-edge Technology.

Colorful Lighting 1.0 5in1

VS

Colorful Lighting 2.0 7in1

► Color Mixing Comparison

The original RGB or RGBW color mixing technology of LED lighting is around 50% color mixing area in CIE 1931 chart (about 16.5 million color). ROLEDs Digital Photochromic System 1.0 goes to 65% (about 1.1 trillion color) and 2.0 achieve more than 73% color mixing area (about 281.5 trillion color).

Digital Photochromic System 1.0

VS

Digital Photochromic System 2.0

ROLEDs

► Intelligent Control

Self-developing WeChat applet provide freely and conveniently as chosen the color or white light as color effect present.

Freely select through the color plate, brightness and 1800K-6500K white light color temperature adjustment.

The six color single channel configuration can realize the free mixing ratio of color, meet the creative imagination of lighting designers, and create the exclusive color either.

More than 30 exclusive colors settled for quickly select and demonstrate the special color mixing with more comfortable and natural effects.

SMART Landscape GOLF

SMART Landscape

GOLF

GOLF is a new series of products of ROLEDs the integration of science, intelligent technology, optics and color innovation, which focus and dedication to outdoor lighting, to display the strength and beauty of the city. Basis on nearly 20 years of independent R&D advantage, continues ROLEDs's ultimate pursuit of light quality, and empower by digital intelligent manufacturing production technology comprehensively improve the light quality and stability of products to meet the needs of global development to light up the city and create a comfortable, healthy and fashionable quality life.

PRODUCT CHARACTERISTICS

Extreme Lighting Solution

Focus on and self-developed optic technology by combining materials, optics and application research to create the extreme and comfortable lighting solution products.

High gray scale chip with gamma compensation function to support 4K refresh rate, flickering-free in low-scale adjustment and smooth dimming effect.

ROLEDs Digital Photochromic System provides wider color mixing, vivid and exclusive colors.

High intensity and comfortable light with various anti-glare accessories.

Quality Stability

DMX512 decoding function and RDM protocol sets the protection value of temperature and power consumption.

High-density aluminum material and high thermal conductivity powder material coating helps great thermal conductivity and dissipation of luminaire.

Automatic intelligent manufacturing, digital management system, CNAS and SGS certified quality control laboratory.

Diversified Specifications

Full range of power consumption, 12VDC to 48VDC or high voltage input series.

Full configuration, diversity of styles to satisfied various lighting design.

Integration of Architecture

Patented industrial design, full range of product models provides consistency lighting design to integrate the architectural beauty and unique charm of the city.

SMART Landscape

GOLF

The separate design of the luminaire body and driver cavity provides great heat dissipation to reduce the ambient temperature of driver and maintain the components stability. That ensures the LED luminaire intensity output and lifespan stability too.

Equipped with "ROLEDs Digital PhotochromicSystem", LED 5in1 & 7in1 Color Mixing Cutting-edge Technology.

Variety Anti-glare Accessories Inserted. Including honeycomb louvre and bullseye louvre.

Extra anti-glare available, cylindrical screen.

Power consumption
9W - 180W.

4°- 60°, 15×45°, 15×60°

0-360° rotatable rackets, precisely adjustable dial, safety self-locking structure design.

Optical grade material, higher transmittance of LED intensity.

Ultra-Clear Glass, higher transmittance of luminaire intensity.

RFL-220R

Full range of high-power floodlight in round surface architectural with wide range of beam distributions and selectable of color temperatures, white color mixes, full color mixes and ROLEDs Digital Photochromic system. Separated design of light source and driving section provides a greatest heat transmission. Super narrow beam angle provides long distance, as projector light, solution with high central intensity (K-value)

CHARACTERISTICS

- Selected high-efficiency LED and ultra-white glass
- With 94% light transmittance are combined to achieve long-distance accurate projection
- The design of separate structure of the optical cavity and driver with good heat dissipation reduce the ambient temperature of driver and maintain the product components stability, thus it ensures product longer lifespan
- Black light technology. Deep-hidden anti-glare design is developed to achieve dual anti-glare purpose
- 0~360° rotatable racks, precisely adjustable dial, safety self-locking structure design
- High efficient optics provide efficient, glare free light and even light distribution
- Die-casting housing with tempered glass cover

| INTRODUCTION |

RWW24 is a wall-washer luminaire series of extremely compact dimensions with integral 24VDC driver. As well as individual luminaires there is also a modular system available for creating continuous lines with barely any shadow between the sections. The very slim cross section allows for discreet installation. The luminaires are available with wall washer optics or in asymmetrical distribution.

CHARACTERISTICS

- > Monochrome color, RGB, RGBW, various options
- > Bevel design at its edge is more delicate and protectit from edge bumping
- > Super white glass with 94% high light transmittance, high luminous efficacy, no dark area
- > RWW24 is a robust compact extrusion aluminum housing with tempered glass cover and a wide choice of color temperatures, white color mixes, RGB & RGBW
- > Corrosion resistance and improved heat dissipation

------------------------	-------------------	----------------------	----------------------

| INTRODUCTION |

RWW33 is an elegant slim, low profile and highest intensity LED wall-washer luminaire of GOLF wall-washer luminaire series. It provides a higher vertical distance for wall washer application compare with same power consumption and distribution luminaire.

CHARACTERISTICS

- > Super white glass with 94% high light transmittance, high light efficacy
- > Bevel design at its edge is more delicate and protect it from edge bumping.
- > Black light technology, built-in grille for anti-glare
- > The sandblast-coating process protects the fixture's functioning and appearance from atmospheric and environmental agents.

| INTRODUCTION |

A small size inground light designed for low wattage application with great heat-dispassion, innovative waterproof construction design, passed IP68 test, and variety beam angle selectable.

CHARACTERISTICS

- > A full range of anti-glare accessories optional
- > Imported silicone rubber sealing ring, Ip68 negative-pressure protection cable patents
- > Professional structure design prevents the embedded parts from falling out
- > Made of highly corrosion-resistant extrusion aluminum housing, stainless-steel trim, 10mm thickness tempered glass that provides walk-over situation

CHARACTERISTICS

- > Dual-angle polarized light design for pefect uniformity wall washing effects
- > Tilt Angle 20°, 30°, 40° solutions for different scenarios
- > Professional unilateral anti-glare design
- > Highly efficient optics provide efficient, glare free light and even light distribution
- > A robust, compact aluminum housing with IP67 protection suitable.

| INTRODUCTION |

Brand-new design with three tilt angle of 20 °, 30 ° and 40 ° for different wall-washer application as new solution of inground lighting. Effectively improve the light utilization rate and achieve a highly uniform wall washing effect, and meet the designers' free imagination and more solutions. The whole series adopts imported silicone sealing ring to effectively isolate the invasion of water and dust.

| INTRODUCTION |

Innovative patten design, no need to disassemble the product, 15 ° free adjustment from the cover, effectively improve the lighting design effect, with the safety self-locking function, more stable dimming.

CHARACTERISTICS

- > Angle adjustable from outside
- > Double silicone ring guarantees reliable protection
- > Double sealing silicone rubber ring is used at the rotary joint to ensure the waterproof of the product
- > COB LED with highly efficient optics provide efficient, glare freelight and even light distribution
- > A robust, compact aluminum housing with IK10 protection suitable.

- > A full range of anti-glare accessories optional
- > Imported silicone rubber sealing ring, Ip68 negative-pressure protection cable patents
- > Professional structure design prevents the embedded parts from falling out
- > Made of highly corrosion-resistant die-casting aluminum housing, stainless-steel trim, 10mm thickness tempered glass

RDO-35

Ultrasonic combined with gluing art, double waterproof, IP67 protection grade cost-effective, suitable for various installation scenarios.

Luminaire colour code
Graphite Black
RAL9011

| INTRODUCTION |

ROLEDS RDO series is brand-new LED Dot light with innovative ultrasonic production technology. As a direct view LED luminaire mounted as a matrix, it can display large video and graphics in a large number of architectural environments. Adaptable to be mounted on aluminum channels or steel rope strands as a matrix.

CHARACTERISTICS

- > Ultrasonic combined with gluing process, IP67
- > Optional transparent, milky, frosted cover
- > Support customized multi-lamp series connection
- > A variety of installation methods to meet various application scenarios
- > Innovative ultrasonic production technology to achieve IP67 for exterior application
- > Standard and custom lengths and node spacing

| INTRODUCTION |

ROLEDs RDO series is brand-new LED Dot light with innovativeultrasonic production technology. As a direct view LED luminaire mounted as a matrix, it can display large video and graphics in a largenumber of architectural environments. Adaptable to be mounted on aluminum channels or steel rope strands as a matrix.

CHARACTERISTICS

- Ultrasonic + Potting waterproofing technology(IP67);
With Safe voltage to achieve ultra-long-distance transmission; Wiring simple and convenient
- DC48V, long-distance power supply with safe voltage
- Supporting the function of 16bit & RDM
- DMX512, dual-wire parallel design, remaining under control if single-lamp failures
- Ultrasonic + Potting waterproofing technology with IP67 360-degree protection

| INTRODUCTION |

Exterior flexible strands of high-intensity nodes with smart RGB/RGBW lights , RGB/RGBW are flexible strands of large, high-intensity, full-colorLED nodes designed for extraordinary video and graphic effects onexpansive installations without the constraints of luminaire size, shapeor space.

CHARACTERISTICS

- > 360-degree all-around potting waterproofing protection IP65, with anti-glare function
- > 360-degree potting waterproof, up to Ip65
- > Special design of optical lens, meeting the needs of anti-glare scenes
- > Special optical design for the enhancement of product brightness and improvement of luminaire efficiency

SMART Landscape

MatriX

SMART Landscape

MatriX

The design inspiration of MatriX series comes from "Lego", which launched the first generation of MatriX with the concept of "changing the way". From 1.0 to 6.0, the MatriX adheres to the development direction of standardization, modularization, plasticity and innovation, constantly innovating and breakthrough, successfully creating "kilo-watt MatriX", "Colorful MatriX", "Smart MatriX", "extremely narrow MatriX" and other industry's technology leading products.

MatriX

PRODUCT CHARACTERISTICS

CE UL RoHS

Primary light distribution

One-time light distribution technology, Japan Teijin Optical Materials, the center light intensity is industry-leading

IP66 (certified by National Lamp Testing Center)

The design of double T-shaped step protection structure, effectively avoids the siphon phenomenon and improves the protection level

10° adjustment

The floodlight is equipped with a self-designed wheel shaft, with a wheel lock function, and the wind resistance test can reach level 20; it avoids the phenomenon of changing the angle of the lamp after long-term use, and has a convenient angle adjustment function, the minimum adjustment angle can be accurate to 10°

Weathering resistance

The lamp material adopts industrial grade configuration, and the outdoor use can reach -40°C to +55°C. The lamp body is made of aviation aluminum, the thermal conductivity can reach 230W/m*K, and the structure adopts high-efficiency heat conduction technology to improve heat dissipation

More scene applications

In addition to floodlights, wall washers, and inground lights, our products also include wall lights, lawn lights, step lights, and floor spotlights to meet the needs of more scene applications and provide a variety of overall solutions

RDM

Scalable RDM intelligent control and feedback chip, providing lighting big data support for smart cities. Lightning resistance level reaches industrial level 4. Unique fool-proof design and anti-voltage surge function support international standard DMX512 control protocol

| INTRODUCTION |

RFL40S is light weight, compact and easy to conceal. High efficiency LED manufacturing achieves good quality and aesthetic appearance, energy saving and high performance. Due to the long life of the light source, the light can be successfully used in hard to access areas and high places such as production sites, warehouses, sports centers, parking lots, facades, industrial buildings.

| INTRODUCTION |

RFL55P is light weight, compact and easy to conceal. High efficiency LED manufacturing achieves good quality and aesthetic appearance, energy saving and high performance. Due to the long life of the light source, the light can be successfully used in hard to access areas and high places such as production sites, warehouses, sports centers, parking lots, facades, industrial buildings.

CHARACTERISTICS

- Small and delicate appearance,good concealment.
- Multiple installation racks can be matched,flexible installation.Multiple anti-glare accessories optional.
- Widely applied in small columns,narrow space etc, like temples
- Small and delicate appearance,good concealment
- Multiple installation racks can be matched,flexible installation
- Multiple anti-glare accessories optional
- Automatic intelligent manufacturing

RFL-120S

| INTRODUCTION |

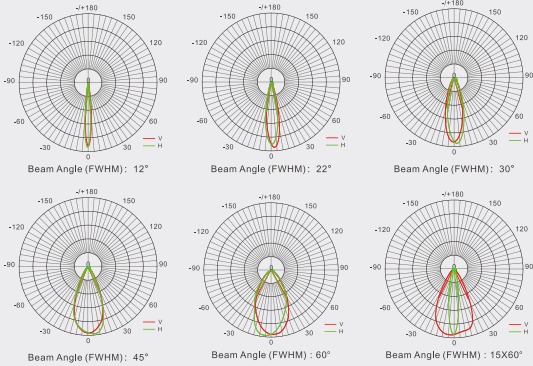

RFL120S adopts integrated design with elegant and smooth shape, which is more suitable for modern city. The classic gear locking device ensures the stability of projection direction and the accuracy of focus. The innovative detachable mechanical connection design, with professional locking accessories, can be freely and flexibly combined and spliced to meet the secondary combination on site.

CHARACTERISTICS

- > Superior cost effective floodlights
- > Mono color,RGB, RGBW, RGBA optional
- > Multiple anti-glare accessories optional
- > Can be applied in parks, greenery, trees, bridges, bodies, urban buildings and other scenes
- > High efficient optics provide efficient, glare free light and even light distribution
- > Imported PC integrated lens
- > Automatic intelligent manu-facturing

RFL-180P(7in1)

High-end design to satisfy designers' infinite imaginationby innovative floodlights.

| INTRODUCTION |

RFL180P achieves precise projection at a long distance with an extremely narrow angle of 3.5. Equipped with ROLLEDS digital colorful lighting system, it can meet designers' individual requirements for artistic expression and color.

CHARACTERISTICS

- > 7 in 1 superior light technology
- > Wider color gamut; multi-body lens, mixing light more uniformly and more saturated
- > Self-developed light mixing algorithm calculation, high color saturation, restore the real color
- > DMX wired control: large-scale group centralized control, strong reliability and stability
- > Blue wireless control: flexible control in a small range, convenient adjustment, and strong interaction
- > The seven-in-one mixing algorithm technology can realize multi-channel control, more mixing forms, more uniform mixing, and restore natural artistic colors
- > The streamlined and efficient heat dissipation design of the whole lamp makes the lamp safe and stable at all times

RFL-210

Free combination, flexible splicing, multiple anti-glare accessories optional.

Anti-glare Baffle(Y)

CHARACTERISTICS

- > Free combination, flexible splicing, innovative detachable mechanical connection design, easy on-site installation and disassembly
- > Fully automated single module production, stable quality and fast shipment
- > Ultra-thin centrifugal heat dissipation design, higher heat dissipation efficiency, lighter, thinner and more compact body, easy to hide
- > A variety of anti-glare accessories are available, suitable for all kinds of environments (the anti-glare accessories can be added and replaced on site)
- > Can meet 100w to 900w even more through combination
- > High efficient optics provide efficient, glare free light and even light distribution
- > Imported PC integrated lens
- > Automatic intelligent manu-facturing

INTRODUCTION

RFL210 adopts integrated design with elegant and smooth shape, which is more suitable for modern city. The classic gear locking device ensures the stability of projection direction and the accuracy of focus. The innovative detachable mechanical connection design, with professional locking accessories, can be freely and flexibly combined and spliced to meet the secondary combination on site.

RFL-132

Keep chasing technological innovation, and never stop.

INTRODUCTION

RFL132, the new product of Magic Cube 7.0 series, adopts 50mmx50mm modular lens with good applicability and extensibility, and a variety of angles available. The minimalist exterior design is easy enough for construction and installation.

CHARACTERISTICS

- > Optical platforms for quick switching
- > Modular production for fast delivery
- > Die-cast housing with excellent texture
- > Micro-innovative mount with multi-dimensional projection

RFL-155

IP66 AC 220V

Unique heat dissipation design,compact integrated floodlight.

Anti-glare Baffle(Y)

| INTRODUCTION |

RFL155 is light and compact overall, easy to install and easy to hide. The CCT of the light can meet the requirements of monochrome, RGB, RGBW and multi-light angle, making the product more flexible and more diverse applications. The series can be customized with 48-180w.

CHARACTERISTICS

- Single-head high-power flood light, Mono, RGB/RGBW colorful control requirements
- Aviation aluminum profile, ultra-thin industrial design, easy to install
- Less weight and slim size help reduce transportation costs
- Suitable for scenes such as the trees, large buildings, sculptures, etc
- Made of highly corrosion-resistant die-casting aluminum housing with sealed to Ip66
- Highly efficient optics provide efficient, glare free light and even light distribution

RFL-220S

IP66 AC 220V

Unique heat dissipation design,compact integrated floodlight.

Luminaire colour code

Anti-glare Baffle(Y)

| INTRODUCTION |

RFL220S is light and compact overall, easy to install and easy to hide. The CCT of the light source can meet the requirements of monochrome, RGB, RGBW and multi-light angle, making the product more flexible and more diverse applications. The series can be customized with 48-180w multi-power options.

CHARACTERISTICS

- Single-head high-power flood light, Mono, RGB/RGBW colorful control requirements
- Aviation aluminum profile, ultra-thin industrial design, easy to install
- Less weight and slim size reduces transportation costs
- Suitable for scenes such as the trees, large buildings, sculptures, etc
- Made of highly corrosion-resistant die-casting aluminum housing with sealed to IP66
- High-efficiency optics provide efficient, glare-free light and uniform light distribution

High cost-effective wall washers

| INTRODUCTION |

Simple and atmospheric design style.As well as individual luminaires there is also a modular system available for creating continuous lines with barely any shadow between the sections.The very slim cross section allows for discreet installation.

CHARACTERISTICS

- Multi-angle selection to meet the requirements of different scenarios.Simple design appearance
- Extreme optical design,showing perfect light effect
- Ultra compact form factor
- Corrosion resistance and improved heat dissipation

RWW-66

High power narrow angle wall washer.

| INTRODUCTION |

High-power wall washer, built-in professional integrated heat dissipation structure, can automatically recover overheating protection. At the same time, the thermoelectric separation design increases the stability of electrical performance and the service life of lights.

CHARACTERISTICS

- > Ultra high power wallwasher, DC/AC optional
- > Light mixed evenly, ultra bright wallwashing, thin and light design, easy installation
- > Can be applied in transcending building screens to solve difficulties of installation
- > Ultra narrow beam angle optional
- > It adopts aviation aluminum alloy lamp body, imported optical lens material, and has good corrosion resistance and ultraviolet resistance
- > The multiple choices of mono color, RGB, 4in1 and light angle make the product more flexible and the application scene more diverse

RWW-100

High power narrow angle wall washer.

| INTRODUCTION |

The double-row mixed light design is adopted to make the light effect more uniform and more three-dimensional under the background of the wall. The color rendering index Ra>85 shows the object itself and details to the greatest extent and restores its true color.

CHARACTERISTICS

- > Ultra high power wallwasher, DC/AC optional
- > Light mixed evenly, ultra bright wallwashing, thin and light design, easy installation
- > Can be applied in transcending building screens to solve difficulties of installation
- > The multiple choices of mono color, RGB, RGBW, 4in1 and light angle make the product more flexible and the application scene more diverse

IP66 DC 24V

Flexible installation, ultra slim linear.

| INTRODUCTION |

The compact aluminum lamp body is extruded, and the internal cavity is filled with glue for waterproof treatment. It can be processed into different colors according to the needs of the project, and its narrow surface design can be used for the installation of the thin trunking of the building facade.

CHARACTERISTICS

- > Exquisite appearance, uniform light output
- > Flexible installation and customizable
- > Applicable to architecture, ancient buildings and bridge contours
- > Equipped with high heat resistant plastic end cover
- > PMMA square spotlight shield with high transmittance is optional to prevent color temperature shift and enhance light output brightness

| INTRODUCTION |

Simple appearance, convenient installation, one-way or two-way lighting, and one-way lighting specification, can be indoor and outdoor use.

CHARACTERISTICS

- > Fully multi-scene application
- > Applied to aisle niches, pillars, architectural walls, wall decorative lighting and functional lighting
- > Primary light distribution technology
- > Aviation aluminum alloy lamp body, imported optical lens material, corrosion resistance and ultraviolet resistance

ARTYMEDIA

Performing Art Lighting Solutions

Artymedia series is a new product series of ROLEDs. With the ultimate light & color technology and art & culture concept, it creates the crossover and integration of outdoor lighting, interactive projection and holographic projection. The entire series pursues the display of digital multimedia art, technology-enabled intelligent lighting, building a meta-universe of light, as well as insisting on people-oriented, providing green low-carbon and efficient lighting system solutions, integrating survey, design, customization, verification, delivery and maintenance, to meet the needs in an all-round way.

| INTRODUCTION |

As a new type of high -quality effect light independently developed by ROLEDs, it is lighter and convenient in the same power. The perfect combination of international advanced electronic control technology and excellent humanized industrial design ensures the perfect display of lighting.

CHARACTERISTICS

- > The patented design of the top switching pattern, quickly replace the pattern
- > OLED touch screen, screen lock prevents mistakenly touching, automatic detection function with the whole machine
- > Intelligent air-cooled heat dissipation, according to the ambient temperature frequency conversion
- > Highlighted lens, easy to focus
- > Copact size with die-casting housing, Ip66
- > DMX or Auto Mode with Master-Slave function

RAL9011

| INTRODUCTION |

As a medium-sized power multi-functional zoom projection light, it is equipped with an efficient optical system combined with an intelligent electronic zoom of 8°-40. Professional color wheel and gobo wheel present colorful pattern. With stable quality and perfect functions, it shows its excellent lighting effect.

CHARACTERISTICS

- › The patented design of the top switching pattern, quickly replace the pattern
- › OLED touch screen, screen lock prevents mistakenly touching, automatic detection function with the whole machine
- › 5x zoom, 8°-40° adjustable, highlighted lens,, easy to focus
- › Intelligent air-cooled heat dissipation, according to the ambient temperature frequency conversion
- › Copact size with die-casting housing, IP65
- › DMX or Auto Mode with Master-Slave function

| INTRODUCTION |

The performance of optics, structure, appearance and other aspects has reached the high standard level in the industry. It adopts high-brightness light source, multi-color carousel, frequency conversion heat dissipation, waterproof and dustproof, excellent optical technology and rigorous industrial design to ensure the perfect display of lighting.

CHARACTERISTICS

- > 7 kinds of colors can be flexibly called, which can present a rainbow flowing effect
- > OLED touch screen, screen lock prevents mistakenly touching, automatic detection function with the whole machine
- > Intelligent air-cooled heat dissipation, according to the ambient temperature frequency conversion
- > Copact size with die-casting housing, IP66
