*Everything for the
most beautiful time
of the year*

EDITORIAL

Dear customer,

the year 2022 has finally given us back some of our freedom: Travelling - whether near or far - is possible again without any great difficulties, and trade fairs can also finally take place again. We are particularly pleased about this, because it means we can present our items to you live in inspiring set-ups and do what is particularly important to us: maintain personal contact with you.

Unfortunately, we also have to realise more than ever that we are currently living in a world that we could never have imagined not too long ago. In times when our light-heartedness is being taken away from us, it is even more important to reflect on the positive moments in life as often as possible. Take some time out with family and friends during Christmas and enjoy this special time between the years.

We want to face the new year with a good dose of optimism and have set ourselves the goal of conveying particularly beautiful and joyful emotions with our new Autumn/Winter collection 2023. We succeed in this especially with the colourful world of "Holly Jolly Christmas" from "Happy Christmas". But the other trends also have a lot to offer. From the Scandi theme "Forever Green" to the natural "All About Christmas" to the traditional "Holy Night" or the modern theme "Special Moments" - there are many great decorative novelties to discover for Christmas fans.

Stay confident. After every rain comes sunshine.

Warm regards

Your Adrian Boltze

THE COURAGE TO USE COLOUR

Bright colours and colour blocking are one of the biggest fashion trends that are also finding their way into interiors. During winter, these colours create a cheerful contrast to the dark season.

*The two new trends **"Color Me Up"** and **"Holly Jolly Christmas"** feature this trend.*

BERRY RED MEETS GREEN

The combination of dark berry red with various shades of green is a very special colour combination that is reflected in both an autumn and Christmas theme - namely "Fall in Love" and "Special Moments". Thus, this modern look, which exudes harmony, calm and serenity, can be decorated in a smooth transition.

We love

The muted shade of green takes centre stage with wine-red and can be combined nicely with mauve-pink tones, red and gold. Unusual candlesticks, opalescent baubles and golden trays in reduced shapes and modern paper pendants create a luxurious and interesting look. This trend is very different, diverse and feminine.

Scandinavian naturalness

The natural and modern Scandinavian decor trend cuts a fine figure once again this season. Subtle cream colours are complemented by brown tones and taupe. Wood and natural decorations create a cosy atmosphere. Small fir trees stand in unused corners, exuding freshness and a wintry scent. This restraint gives us a foothold and space to sort out our own thoughts.
