Dear Customers:

I would like to express my sincere appreciation for your continued trust and support to JMX on behalf of our team.

Due to the changes in the world economy, including the energy crisis, Europe is in a period of high manufacturing costs. This has made it very difficult for many companies to survive. In China, we are also facing an industrial reform and alteration, eliminated a lot of manufacturers because of this. However, we sincerely would like to come together with you to jointly tackle risks through communication and cooperation.

We adhere to the implementation of the whole industrial chain system, from LED, wires, accessories and other core materials to a finished product, all produced by JMX, to provide customers with stable and high quality products. We have irreplaceable advantages on product differentiation and quality. In this unstable world economic environment, we were still able to complete a new headquarters of over 20,000m². We are confident about the future of our company.

We treasure each opportunity for cooperation you give us and sincerely hope to establish a good long-term partnership with you.

Best wishes to you and your family.

About Us

LED Division

Zhongshan J.M.X Electronics Co., Ltd., was established in 2010, located at Zhongshan City with regional industrial cluster of lighting, specially manufacture high-quality LED which are widely applied in the areas such as festival lighting, outdoor display, indoor illumination. Our lighting are deeply favored by domestic lighting manufacturers and foreign engineering customers.

With 2 high-efficiency LED production lines and 86 automatic LED production lines, we could daily produce more than 500,000,000pcs diodes in excellent performance by our experienced engineers and skillful technicians, sold to many well-known companies in Asia, Europe, North America and Australia.

Decorative Lighting Division

With more than 12 years perseverant efforts of JMX people and continued support of our customers, our products are awarded with various international standards , includi ng UL , CE(EMC&LVC), ETL, CETL, RoHS, REACH. Meanwhile, we have been assessed as High-tech enterprises with more than 25 patents.

Integrated our core technical competence in lighting sources, we have developed the high- quality finished products, including Rope Light , String Light , Strip light , Neon light, Motif etc. Our product lines will be expanded more after our new 20,000sqm Industrial Park to be built well.

In the faith of honesty, innovation, truth-seeking and pragmatism, we will serve our customers wholeheartedly and let our LED light illuminate every corner of the world.

Our Story

Establish

Our company was established, produced light-emitting diodes and supplied to the domestic manufacturers.

2010

2014

Capacity

Daily capacity could be 4,000,000pcs diodes, as a star enterprise in our district.

2012

Export Market

We entered Festival Lighting export market, distributed in Europe at first.

Award

We are assessed as High-tech enterprise in Guangdong Province.

2015

Supplier for Costco

We are audited as a qualified supplier for Costco.

2019

2022

Industrial Park Completed

New 20,000sqm Industrial Park provide huge production capacity

Industrial Park

New 20,000sqm Industrial Park began to build.

2020

Certifications

EN 62471 for LED Bulbs

RoHS for LED Bulbs

SVHC for LED Bulbs

UL for LED Bulbs

CE-EMC 230V String Light

CE-LVD 230V String Light

CE-EMC 230V Neon Light
