Who we are

Quality and passion made in Germany

Almost 30 years ago, the company Fjord Hütten was founded as a small family business. Since then, we have continuously grown. However, our highly motivated team has always been the basis of our successful work.

We have merged our production site, storage facilities and offices on our company grounds measuring 18 hectare in the beautiful landscape of North Friesland. Thus, we can fully focus on what is the most important to us: Quality and passion made in Germany!

How we work

Besides the high attractiveness and the excellent price-performance-ratio, there are many more good reasons for working with Fjord Hütten. It is our aim to offer a complete service to our customers reaching from setting up the products to storing them in one of our warehouses. With a total hall area of approx. 11,000 sqm, we can store all huts and even complete markets protected from wind and weather.

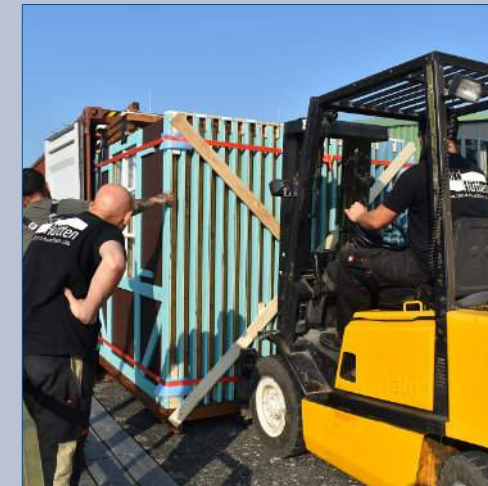

Planning and graphic visualization

Prior to production, we virtually design the huts so that our customers can get an impression of the finished product or even the whole market.

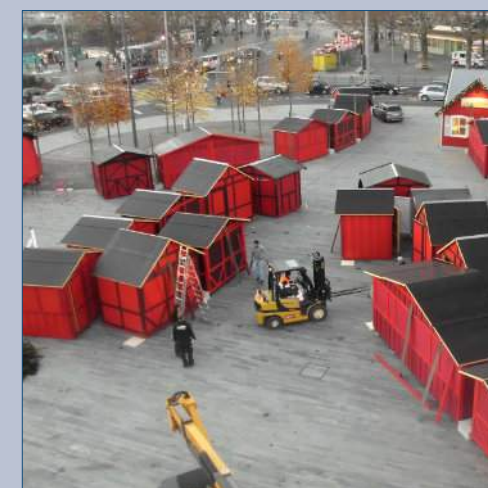

Production

We strive for continuous optimization of our production processes in order to save on raw materials and to protect our employees.

Transport

Depending on the volume, we virtually plan the transport in advance resulting in efficient use of space in the transport vehicle.

Setting up and disassembly

Thanks to our modular construction, our huts can easily be set up and disassembled in no time at all.

Storage

In our warehouses we can store the huts or even complete markets of our customers.

Our huts

Endless possibilities

We offer our huts in three different standard designs and sizes:

- Rustic style with repeatedly flamed and glazed larch wood panelling
- Scandinavian style
- Half-timbered style

All huts can be customized individually in terms of depths, widths and coloring. We also offer a wide range of extras from which our customers can choose to configure their perfect huts. To meet your demands, we offer, among others, the following options:

- Side flaps
- Different roof styles and designs (e.g. shingle roof)
- Walkable designs
- Windows and window shutters and/or glazing bars

To put it in a nutshell: We realize even the most creative ideas of our customers!

Something special for catering:

Pavilions

If you want to sell products like sausages or beverages such as Glühwein, our pavilions are the perfect solution. Especially in combination with a surrounding shelter, pavilions are a great centerpiece of a market. We build these special huts in different sizes with a diameter of approx. 4.50m up to more than 12 meters.
