FROM SEED TO DRIED CONCEPT

Craftmanship from start to finish. We start by selecting the right seeds and from there our team of dedicated experts align with our growers the growing process until the perfect moment to harvest. By co-operating like this our unique drying process then captures the essence of the flowers at its optimum.

We can also add value by colouring, adding scent, or spice. Our marketing and design specialists are constantly innovating with new bouquets, designs and arrangements to inspire every wholesaler, florist, or retailer. Working closely with our clients on a design brief that suits local needs and market demands.
