# QUALITY

Fabric checking need to check colour, any damages or stains in the fabric, fabric slippage and meter counting

Cutting department again check the fabric with original samples and if store miss the above then need to check before cutting

Fusing department: Need to check correctly fusing is done and front and back fabric is as per original samples. Do the heat test in that check is fusing is properly done after 180 degree

Production department: Need to check edging thread are as per original, size of the product made and in stitching problems

Packing department: Need to check rolling of ribbon are properly doing in correct customer packing material, Any damage rolls not to pack, labels need to check with UPC code and other information is as per required customer information

Shipping department: need to check packing list is correctly made and all the information on the packing list like UPC labels, size , packing ratios are correct, Check side make and main mark as per customer requirements, Check again UPC labels information all the labels on the product and carton mark. Etc

### Valued WalMart Supplier

#### Re: Facility Security Audit

Walmart Stores maintains a risk-based supply chain security program to ensure that a sourcing facility maintains the procedures necessary to protect against product and shipment tampering. A supplier is responsible to ensure that their production facility accomplishes the Walmart security standards for merchandise shipped directly to Walmart when Walmart Stores is the Importer of Record – regardless of the destination country. A sourcing facility must participate in an audit to confirm that Walmart security standards are met.

**CONGRATULATIONS!** The facility below has passed the security audit performed by our designated third party auditing company:

|                       |  |
|-----------------------|--|
| Facility Name         | Omkar corporation  |
| Factory ID (Walmart ) | 36176623   |
| Facility Address      | UNIT D1-110 TO 115 & D2-110 TO112,, BLDG D1 & D-2, 1ST FLOOR, HARIHAR ,, |
| Facility City         | -  |
| Facility Country      | India  |
| Audit Score           | 95   |
| Merchandise Type      |  |

Please inform the facility of this audit result. Passing this audit ensures continued recognition by Walmart that the facility and supplier are trusted merchandise providers.

The audit report is attached with security findings noted. A finding that pertains to a Walmart Critical Security Standard is highlighted in red. To ensure continuous improvement please ask the facility to correct all findings indicated in the report. Additionally, a Corrective Action Plan (CAP) is provided if the country where this facility is located is considered by Walmart as High Risk for supply chain security. The CAP indicates only findings that pertain to Walmart's Critical Security Standards.

- If a CAP is attached the facility must make the necessary improvements and return the completed form within 60 days to [scscap@wal-mart.com](mailto:scscap@wal-mart.com). Include proof of the correction such as a photograph or a document.
- Failure to submit the completed CAP within 60 days from the audit date will result with the facility becoming Inactive and not eligible to receive a Walmart purchase order.

Information about Walmart's security program is available at [Retail Link >Site Map >Global Supply Chain Security](#). Report an incident of unprofessional auditor behavior to [GlobalSU34@wal-mart.com](mailto:GlobalSU34@wal-mart.com).

As business partners, we have helped to ensure that only safe and secure shipments enter the global supply chain.

Thank you!

Stella Bray,  
Global Security Operations  
Walmart Stores

OC(l) is committed to environment sustainability and also keen on waste management. We are making our best efforts to recycle organic material in order to achieve **zero wastage**.

- We use team of people to make the garbage separate in the form like recycle garbage no recycle garbage
- Recycle- garbage
- Fabric
- Thread
- Given to weavers
- Copper wire
- Corrugated
- We are planning for zero garbage scheme-
- Focusing on no plastic and harmful material for environment- We are using cloth bag & paper for packing. Plastic is strictly prohibited. Avoid products with a lot of packaging. Your air-conditioning thermostat should be set at two degrees higher. You could save about 900kg of carbon dioxide a year with this simple adjustment.

# Environment sustainability

---

## **Use efficient lighting**

Replaced incandescent bulbs with compact fluorescents (CFLs). These use four times less energy and they last eight times longer.

## **Use energy efficient electric appliances**

They use two to 10 times less electricity for the same functionality and are mostly higher quality products that last longer than the less efficient ones. In short, efficient appliances save you lots of energy and money. Eg Survo motor

## **Use an energy efficient computer**

Using laptop instead of a desktop. It consumes five times less electricity. If you buy a desktop, get an LCD screen. Enable the power management function on your computer, the screensaver does not save energy. Check if your computer supports the more advanced speed step power management. Switching off a computer extends its lifetime, contrary to some misconceptions. Minimize printing and print on both sides of the paper. Laser of the room air conditioner at 25C to get the most comfort at the least cost.

## **Use renewable energy**

Sunlight can be used in many different ways to save energy. Use a solar water heater instead of an electric geyser. A 100-liter solar water heater can save around 1500 units of electricity every year. For lighting, use batteries that can be charged with sunlight.

## **Plant more trees**

Plant more trees. A single tree will absorb one tone of carbon dioxide over its lifetime. Trees are planted all along the periphery by us.

## **Reuse & recycle**

Turn off electronic devices – like Machine, computer, fans and lights when you are not using them will save thousands of kilograms of carbon dioxide emissions a year. Auto switch off sensor will be installed in order to save electricity.

Recycling and re-using products like papers,& cloths will help protect the environment. Use recycled paper as well as fabric waste.

## **Go Green Team printers**

Go Green Team printers Use laser jet printer use to reduce electricity consumption. An added advantage is that printing is very fast so we save time.

## **Use water carefully**

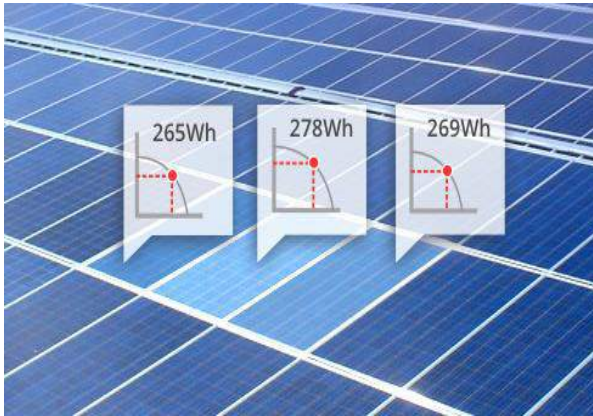

Don't waste water. Using sensor tap. Wastewater recycle for washroom , bore well We should not waste borewell water waste using sensor tap. Waste water is recycled. It can be used for washroom flush.

## Re-Imagine Suitability - Proposed area 30,000 SqFt (18KW)

Solar Energy system are a long –term Investment

### More Energy

Increased energy yield & faster return on investment through module-level Power Electronics & higher area utilization

### Lower O&M Costs

Full visibility of system performance & remote trouble shooting with Remote Monitoring at the Module Level

# Way forward : Strategy for Four Year (FY22 to FY25)

---

- To increase our annual revenue generation from 100 Million to 500 Million by 2025 and to become a known manufacturer in this niche that people look up to.
- Install the complete automation plant to increase the production by 5x by 2025
- Reduce the defects and manual errors to zero by having vigorous quality checks by 2022
- Special focus on repeat customers by adopting IT system by 2023 (deployment of CRM)
- Hire international designer team for produce new innovative samples every day.
- Adoption of excellent inventory management and prompt fulfillment of orders by putting IT system in place
- Zero to null wastage of raw material used for making product. Adoption of complete go green by 2025.
- Increasing sales opportunities beyond our “100-mile” target area including several smaller communities that have produced a faithful following of customers.
- Increase in On-Line potential for selling products to other markets. Renovation of the existing website that provides content and a catalog of available products and decorating accessories with direct links between the displayed items and the same item on our eBay store.
- Build a strong relationships with suppliers that offer credit arrangements, flexibility, and response to special product requirements through CRM
- To design additional processes and to refine current ones onto a Sigma scale of accuracy.
- Roll out of employee satisfaction program and loyalty program, R&R for high performing resources by 2022.
- Community service for the underprivileged women and establishing a trust to help them get work and provide for their family supporting **women empowerment.**

*To establish ourself as the best business partners to the clients all over the globe.*

# Social Responsibility : Women Empowerment

*We are committed towards empowering women and ensures the same by creating opportunities for women in all departments.*
