CLEANROOM

FURNISHINGS IN PERFECTION

The name KEMMLIT stands for **top quality** "Made in Germany".

Our **innovative and flexible product portfolio** fulfils the highest functional demands.

One-stop shop: Planning, project planning, production, installation and service.

"Working with our specialists, we can offer you an all-inclusive package for your individual cleanroom – from initial consultation, planning and state-of-the-art manufacturing to professional assembly."
Ralf Stahl, Senior Key Account Manager

ONE-STOP

SHOP FOR EVERYTHING

KEMMLIT offers individual interior solutions for cleanrooms to ISO standards and in compliance with GMP. We work together with you in realising solutions from the non-cleanroom (contaminated) area to cleanroom class B or ISO 4 with the suitable materials.

1 CUSTOMISED PLANNING

On the basis of a personal consultation or existing planning, we develop the optimal solution for all lock and cleanroom areas together with our customers.

The KEMMLIT brand stands for top quality, reliability and sustainability – we are part of the strong family-owned Kemmler Group with approx. 2,000 employees.

+

KEMMLIT relies on state-of-the-art EDP systems to optimise work processes and for project visualisation.

2 BINDING PROJECT PLANNING

Every project in our company – from the smallest to the large project – has a permanently assigned project manager, who accompanies you throughout the entire project and supports you competently with all questions.

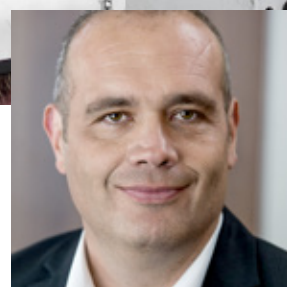

Production using state-of-the-art CNC machining centres.

Highly trained specialists ensure a consistently high quality.

"We are proud of our machinery and our highly trained specialists. Because quality has top priority at KEMMLIT – exclusively Made in Germany."
Dieter Tessmann, production planning

3 STATE-OF-THE-ART PRODUCTION

We manufacture your individual product on some of the most modern machinery in the industry, which is subject to consistent quality control in the factory and in all departments.

+

Delivery is made according to customer requirements with or without a forklift.

+

The cleanroom equipment is delivered pre-cleaned in dust-proof packaging.

4 ON-SCHEDULE DELIVERY

With our modern vehicle fleet, we deliver your cleanroom equipment to the construction site punctually on the agreed date. It is then immediately received by our trained specialist fitters without intermediate storage.

5 PROFESSIONAL ASSEMBLY

Our specially trained technicians install your cleanroom equipment on time and are your contacts on-site. Even assembly during cleanroom operation are part of our day-to-day business.

MORE THAN
50 YEARS OF
EXPERIENCE

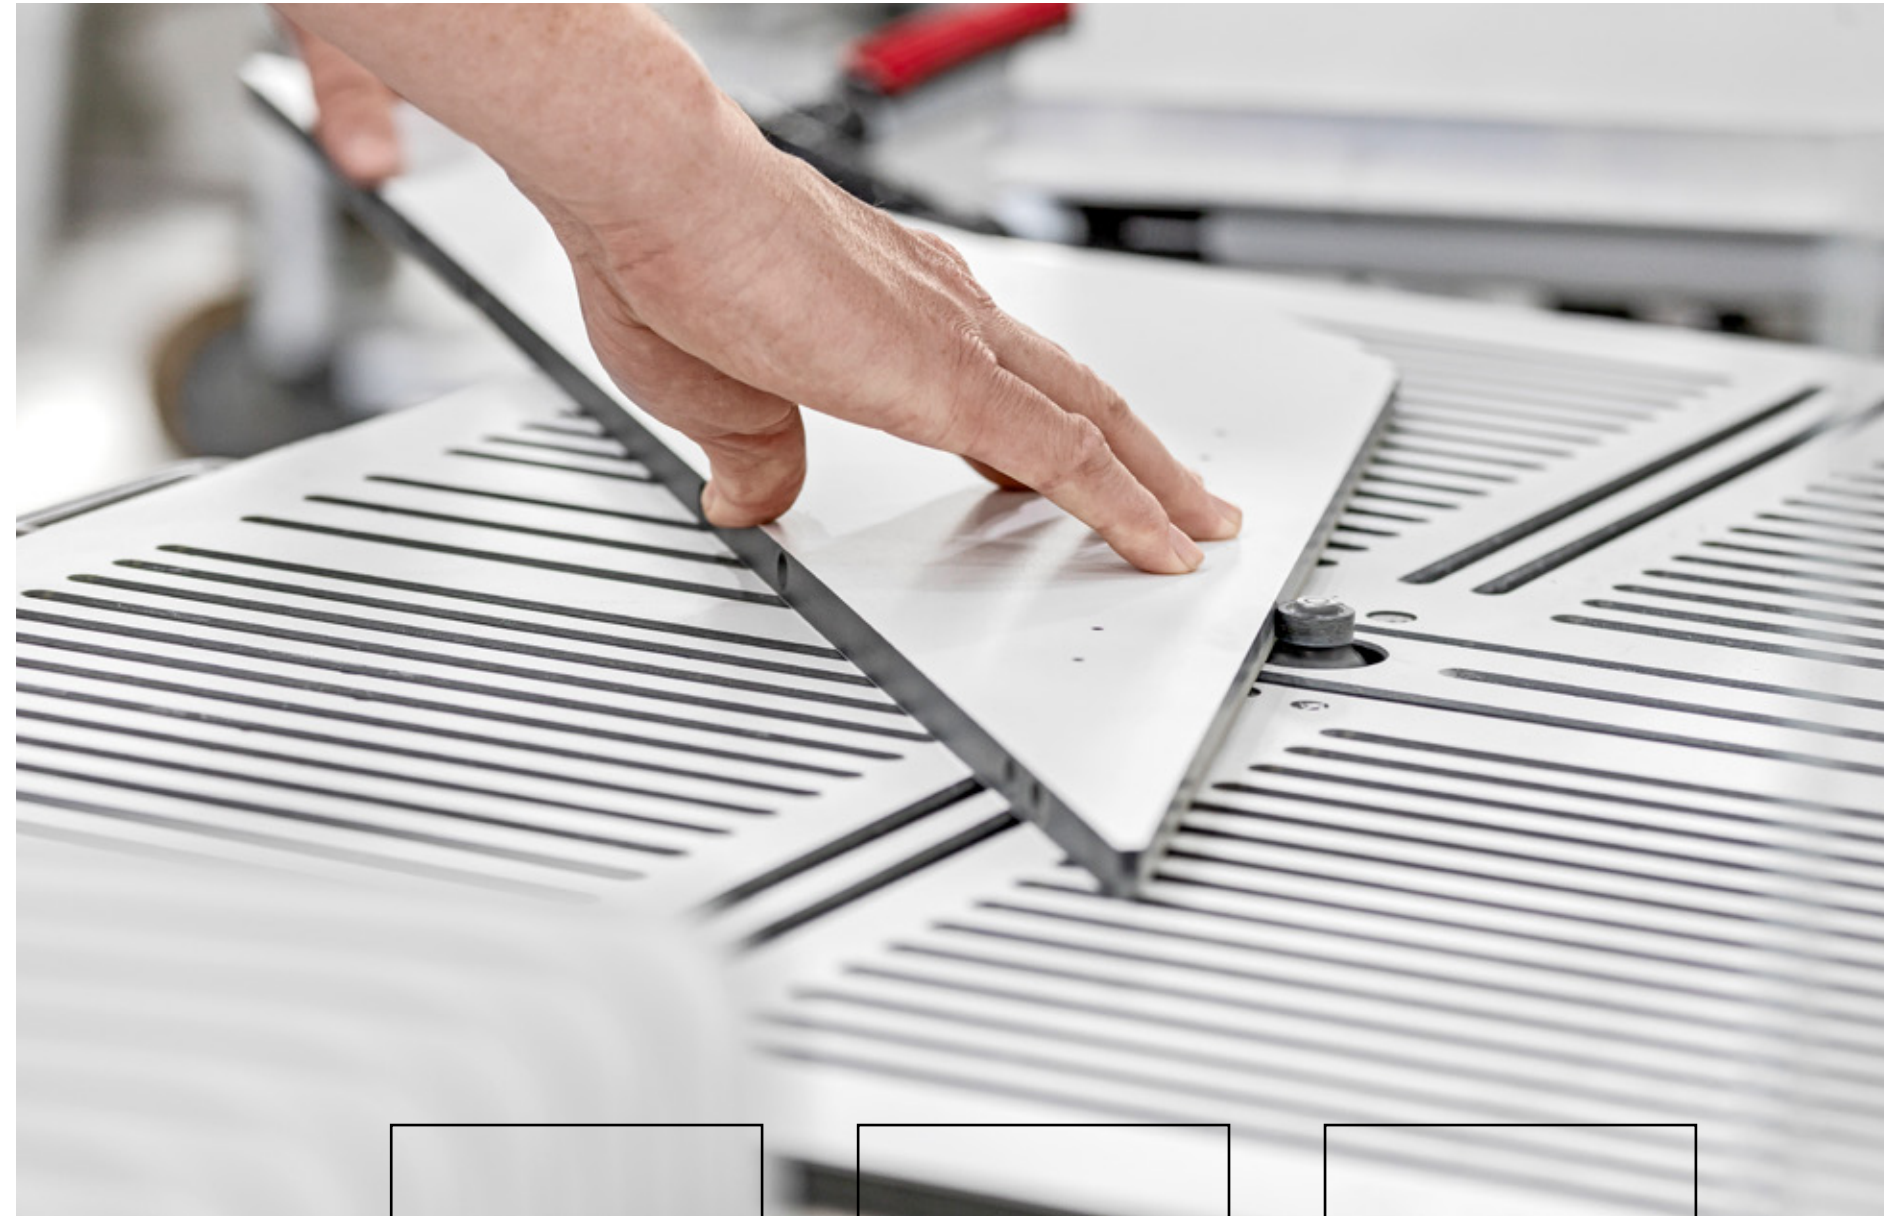

We use the following materials to manufacture our products: HPL solid core panels, chipboard with melamine resin coating and chipboard as a laminate board with an HPL coating as well as stainless steel.

For use in cleanrooms, the HPL solid core panel has proven to be the most suitable. We work together with the highest quality manufacturers in Europe: Fundermax and Trespa.

These fulfil the highest requirements – also in terms of functionality – and are suitable for applications in microelectronics, pharmacy or life science, for example.

The product lines are:

- HPL solid core panels with melamine resin coating or a surface finished with EBC technology.
- HPL solid core panels as a special variant for laboratory use.

Very high stability
and impact resistance

High resistance to
detergents, disinfectants
and chemicals

Water and moisture
resistance

6 FAST SERVICE

Of course, if you have any change requests or other suggestions after completion or during operation, they will be implemented quickly.

We guarantee to respond within 24 hours.

PRODUCT PORTFOLIO

MADE IN GERMANY

Z-locker with attached bench seating and shoe rack

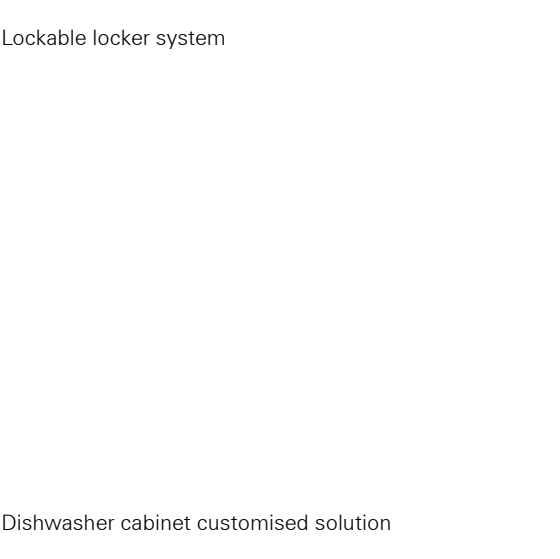

Locker system with 2-part design and integrated bench seating

Locker system with 1-part room-height design

Removal locker for aprons and overalls

Lockable locker system
