MyCellHub

Cleanroom cleaning **simply done**, with **automagical paperwork.**

One year after implementing MyCellHub's cleanroom cleaning module, one of our clients ran an internal audit. This is what we found.

For a single customer site of theirs where 15 cleaners are involved, they have saved in just a year:

39%	**43%**	**2,080**	**€41K**	**1,087**
traveling time	documentation time	working hours	on general costs	sheets of paper

How?

Interactive work instructions
Custom-made digital work orders with facility maps, smart data collection and e-signatures to empower your team, streamline your operations and avoid errors and deviations.

Foolproof master planning
Clear-cut operational blueprints for each of your clients with masterplan versioning, precise cleaning frequency scheduling and processes automatically scheduled and shared with your teams.

Built-in compliance
A 21-CFR-part-11 compliant platform specifically built for GMP operations, with full traceability of any resource, process, or task, and enforced standardization across all operations.

Managing masterplans and tracking the status of cleaning processes has never been easier!
Vanessa Morini, CEO - TRU 100% Cleanroom Cleaning
