

## Delighted with our return to Feria Habitat

After an absence of more than a decade, we returned to Feria Habitat in our home city, Valencia. For the occasion, our management and design team developed a stand displaying light fittings selected by our colleagues to be shown off at an event that brings together architecture, interior design and specification professionals, among others. The event's four days were stuffed with meetings and lovely moments with customers and professionals who came to visit us.

All the luminaires on display at our stand can be found in our TOP Design catalogue. It was a difficult task selecting which light fittings to display, and the result was a stand comprised of products that reflect the quality, in terms of both technology and design, in our TOP collections.
