# HPARTS AUTOMOTIVE SOLUTIONS

**Holding Parts** project is promoted by **Holding Industriale SpA** (Hind) together with RGR & CO (company in charge of its current management) and a Club Deal composed by both international and italian entrepreneurs.

HIND is a holding company based in Turin and Milan, founded by Claudio Rovere and Luca Ferraris. It is dedicated to small and medium-sized enterprises capital investments, having the aim of favouring growth processes, internationalization and generational turnover between them.

**Holding Parts** is a project focused on the aggregation of italian industries operating in automotive spare parts sector, with autovehicles, heavy vehicles and agricultural machinery applications. It seeks to turn into a point of reference in the long run and aims to benefit from the synergies arising from the aggregation of different realities, on both national and international levels.

In doing so, companies manage to cherish their own individuality and main features, thus being able to spend more time on their Core Business and special projects.

## FOUR EXCELLENCES

The group boasts the ownership of four Italian excellences.

**Air Top Italia**, based in Soliera (MO), is the undisputed leader in cabin air filters design and trade for automotive and agricultural applications. The company had been orbiting Hind galaxy since 2015 and many others joined it rapidly .

**CORAM**, based in Cavour (TO), which embodies an historical point of reference for production and trade of high quality bearings and kits for automotive, heavy vehicles and agricultural machines.

**GPC FILTERS**, based in Poirino (TO), prominent cabin filter producer and main supplier for trucks and earth-moving machinery European fabricators.

**GAMMAPLAST**, a leader in production and trade of plastic materials primarily used in automotive sector.

Coram is a company specialized in spare parts production which currently embodies an international point of reference in the automotive sector. Coram is committed to meeting market needs, by offering high quality products in the name of innovation and technological development. The society current structure covers a total surface of 6000 m<sup>2</sup>.

Our vertical, automated warehouses permit us to speed up the goods preparation, effectively optimizing our orders lead time. A cutting-edge structure for its product design and production: clutch release bearings, belt tensioner bearings, pulleys, distribution kits and auxiliary parts, wheel hubs, tripod and cardan crosses, shock absorber bearings and gearbox bearings.

Coram product range covers 95% of European portfolio. This allows Coram to satisfy customers' multiple requests.

**19  
78**

Alessandro Rosso founds Coram and starts loose pins production.

**19  
80**

Following market requests, Coram starts the production of clutch release bearings.

**19  
90**

New item types are introduced in Coram product range: wheel hubs, belt tensioner bearings, cardan and tripod crosses.

**19  
96**

Coram starts using internally designed and produced items as components for its own thrust bearings.

**19  
98**

The company obtains ISO 9001 certification.

**20  
07**

Installation of vertical automated warehouses, with the aim of enhancing services dedicated to customers.

**20  
18**

Ulterior implementation of Coram product range.

**20  
19**

Coram acquisition by HParts group.

ZERO  
POLLUTION

Air Top Italia history tells us about a 100% Made in Italy small-town company, which was able to conquer a dominant position in cabin air filtration market in just 30 years. This goal achievement was possible thanks to the high performance of its products in pollen, dust, bacteria and pollution abatement. Its growing production results in important structural enlargements, which lead the company to occupy a total area of 15000 m<sup>2</sup>.

Our production processes are completely automatized, for all item types: fiber, active carbon, combined carbon and antibacterial filters. We carry out each single phase of their realization internally.

Air Top Italia designs high quality filters for all principal application sectors and it is present on the market with the widest product range for the following sectors: automotive, commercial vehicle, truck, earth moving, agricultural, domotics and office.

All filters are realized with advanced filtering media, so as to guarantee a safer, healthier and more comfortable drive. Rigorous laboratory tests confirm that Air Top Italia filters are the result of the most advanced technologies in this sector.

The crown jewel of our product range is **3Active** antibacterial filter, which guarantees maximum protection (over 99%) against virus and bacteria in the cabin.

## 3Active

3.0000.0000  
pieces

GPC Filters represents a consolidated reality in the European OEM/OES market of cabin air filtration for industrial applications, such as truck, bus, construction, earthmoving, industrial and agricultural machinery. Our constantly updated range includes over 1.000 different filter types.

The newly built GPC factory occupies a total area of 21.000 m<sup>2</sup>.

This company satisfies the needs of European, American, Asian, Australian and African markets, through its high-quality products resulting from internal activities of design, prototyping, testing and analysis of materials.

GPC main collaborators (from the very preliminary stage of filter studying on) are the world most famous producers of agricultural and earthmoving machinery. Among them: **AGCO, SAME, KOMATSU, HITACHI, DENSO, CNH, CLAAS.**

**Gammaplast S.R.L.**, founded on 1982, is a company specialized in plastic materials manufacturing. It covers an area of 12,000 square meters, in which are located directional, administrative and commercial offices, the whole production area and the warehouse as well.

Gammaplast products are commercialized throughout the country and in the main foreign markets, in Europe and outside Europe both directly and through dealers operating in the Automotive market.

To include a very wide range of polyethylene films for packaging and industry applications, (films, tubulars, single-fold, bags, sheets, shoppers), obtained through extrusion blowing process, the production is especially aimed at the automotive sector with a whole range of products for vehicle care and maintenance.

Gammaplast has specially designed polyethylene items to respond to car owners' and workers' needs, taking into account factors such as products costs and practicality of use. Therefore, a line for car caring includes seat covers, floor mats protections, steering wheel covers, wheel covers, fender covers, car covers and masking film for body work, shoppers and spare parts bags.

All items are offered either in generic versions (without printing or with only the logo of the car manufacturer) or in customized versions with marks requested by the customer.
