

## Vigatron Awarded Patent for Vi00103 NetMux™

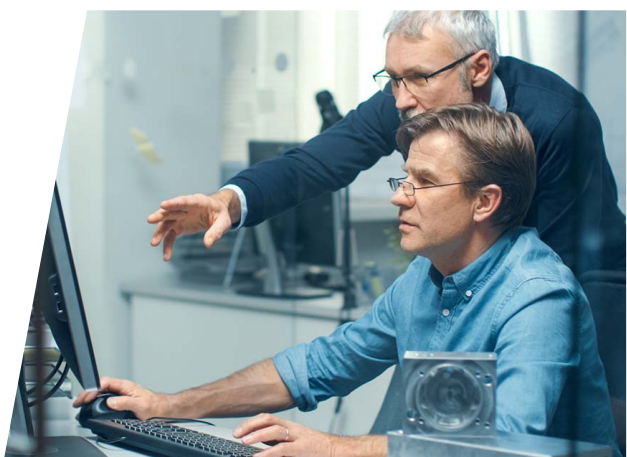

June 2023: Vigatron, Inc., the leading manufacturer of networking products designed for security applications, is pleased to announce that its Vi00103 NetMux™ has been awarded patent US-20220294654-A1. The Vi00103 is a cost-effective solution that enables the transmission of data and power to two IP/PoE devices over a single category cable. Since its introduction, the Vi00103 has been installed in tens of thousands of applications.

"The Vi00103 is another testament to Vigatron's ongoing commitment to meet the evolving and unique networking requirements in the security industry," said Neil Heller, Vigatron's VP of Business Development. By eliminating the need for additional cable runs, NetMux significantly reduces installation time and costs. Vigatron's engineering efforts are dedicated to developing reliable, efficient, and cost-effective products that align with the increasing demand for innovative security solutions.

### Free and without Obligation Network Design and Technical Support

Vigatron provides free and without obligation Design Services staffed by knowledgeable engineers. We believe the smallest details can have major effects on the performance and reliability of your network. Request Design Center and Technical support by accessing our website or emailing [support@vigatron.com](mailto:support@vigatron.com).
